Troy,

Well, the 6 KHz limit is due to the narrow bandwidth of the receivers, not the detector used, or the stations. I think most AM radios actually do much worse than that. AM radios are designed with a limited bandpass because it gets noisy as the bandwidth goes up. The AM band is a soup of distant stations, particularly at night, and that's the source of much of the noise. AM radio stations in the US are allowed up to 10 KHz audio. That's pretty listenable -- there's only a little over a half octave to the 15 KHz limit of FM.

The synchronous detector, in addition to being able to use one set of sidebands or the other, whichever is the best under the conditions, is not subject to distortion from asymmetrical sidebands, such as when there is fading, multipath, etc. There may be a

non-flat audio bandpass from those conditions, but a conventional detector will also have distortion.

You can go satellite with high bit rates. Main downside is high ping
time but that is usually only an issue with on line gaming.

You make requests or upload files / data over the phone line. The
download path to you is the satellite dish. If you are surfing the net
your requests and upstream data are small and the downloads such as
movie trailers, video, and streaming media are high bit rate.

(1) Well grandpa, I do have a clue; you're just being narrow-minded
to presume only AM is DX. Other media can also be DX too.

(2) Even if it doesn't fit your definition of DX'ing (via AM), why
does it matter? When you listen over the internet, you're still
hearing the exact-same program.

Both the UK and Germany have "tentatively" set 2015 as the shut-down
for FM. (They expect DAB to fill that role.) I figure the U.S.
transition will require a similar time period of fifteen years, so
sometime around 2020 will be the end of analog.

Although, I'd like to see AM die as early as 2010 since so few people
listen to it. Just make it pure digital, 10 kHz per channel.

FM can continue until 2020 (it has no interference problems).

How many times do I have to post I'm not a DX'er? Oh, that's right you
don't read or listen to people do you.

If KOH is not coming in well I don't listen. I try again the next night
and if reception is good, and it usually is, then I stay tuned in.
That's going to happen a lot less now that I have HD hiss in the
background all the time. Now I'll be listening to KOH very infrequently
to never because I'm not going to listen to that bacon frying sound in
the background. It's very annoying.

Forklift driver? I drove a Duece and a half almost every day in Vietnam, many times, a forklift too.We had three reject forklifts.One of them was a big tall Baker forklift, it stayed broken down all the time.Another one was a Towmotor, sometimes it would run.The other one was a Clark, it always cranked up and ran,,,,, you had to be careful of that two speed gear shift lever on the right hand side of it though,,,, it had a habit of falling off.One time, on purpose, I ran the right rear wheel of that Clark fork lift over a big roll of banding strip.Because it was there!

Well, Wildblue and Hughesnet are the two major providers of satellite access in the US and they both use two way satellite connections. They do not use the phone.

Both offer higher upload speeds than a conventional phone line can provide.

Makes one wonder what else you don't understand.

A local talk news station to me KVEN 1450 Sunday mornings has these
stupid supplement programs selling the latest bottle of pills that will
make you healthier or Realtors, loan brokers, CPA's, lawyers trying to
get your business. Any of these professions usually are selling books

I have only driven that route a few dozen times. The local FMs (the ones
with decent in market signals) sound fine.

There are spots where there is multipath, but HD will reduce or eliminate
that.

Oh god. Another idiot. Oh yeah you are an electrical engineer that
doesn't understand the difference between a CD and radio propagation.

I don't call those people engineers, and any self-respecting broadcaster would not, either. Those are board operators. In TV the same function is called a TD or technical director, or simply a switcher. A TD would be laughed out of the control room if he called himself an engineer.

I'm mystified as to why this topic was crossposted to 4 disparate newsgroups with little relation to each other. I don't even know who any of the respondents are, except for Phil Kane.

1. Arbitron data is not manufactured, and if you combine a year of surveys, and read the data in MapMaker, you can easily do a "fuzzy line" plot of where a station has useful coverage. It's funny that it tends to match the 10 mvm contour nicely.

2. I do not get any data on the internet. Before we could process the data in Maximiser, we had to plot every diary against a map of ZIPs at Arbitrons's HQ in Maryland. Ask the Arbitron folks who was there most often to do that?

3. I have no interest in what you receive. I have an interest in what people can listen to, so I made sure I knew what a listenable signal was, first.

People would have paid more... as costs went up. The issue was that there
was not a big enough demand to pay for the costs of production runs,
redesign around changing parts, etc.

You certainly twist things at your convenience. I have said many times that radio is not interested in reception outside the primary market. Strike one. Radio stations get essentially no listening outside, in the case of AMs, the 10 mvm contour... proven by looking at the behaviour of millions of diary keeping listeners over the last decade or so. Strike 2. And reception can be considered listenable only if many people listen to a station in an area. Strike 3.

You listen to stations most people, if not all, in your area, consider unlistenable, and they tell us this by the failure of the stations you have metioned to show up with even minimal listening in your area.

>This is the guy that calls me a lier when I post
> about what I can hear,

You still do not get the difference between hearable and listenable.

> what programming I listen too,

While it appears, from the fact you care about AM, that you like news talk, I have not made any observation on your choice of that programming. Keep in mind that news talk is migrating to FM in many places already, due to demographic concerns.

> and that in any
> even I'm not relevant to his work or life.

No, yoiu are not. You have such strange listening patterns and choices nobody can appeal to you. The out of market stations can not derive revenue from you, as there is no out of market sales. You don't benefit the in market stations, as you do not use them. Useless, then, to terrestrial radio.

> This in a news group about

The real joke is on the couple of guys like you who don't realize that they are contributing to the end of AM.

Bob didn't test all the different model radios.

And KROW could care less. They get most of their revenue 6 AM to 7 PM in the
groudnwave coverage area around Reno. They get no benefit from you or even
10,000 like you in Ventura County, CA.

He tested enough for a reliable sample of what Americans use. I'm guessing you don't know who Bob Orban is, so you might google him and the term Optimod or NRSC to learn a little bit about the man who reinvented audio processing.

True bozo. Go look it up. CODFM is not a standard it is a concept
applied to radio transmission, telephone lines and other media.

So what. You like looking at pixilated picture also? Do you understand
the downside to digital compression? Do you understand the term

Clearly he doesn't know much about MPEG-1 that has been the backbone
of DTV prior to HD. This group is overflowing with crazy in the last
couple days.

47. HOW DRM handles skywave propagation (digital radio mondiale)

This is copied directly from the DRM User Guide:

"For ionospheric propagation, the most severe Doppler spread is observed in the case of Near Vertical Incidence Sky-wave (NVIS) propagation. Because the path lengths between transmitter and receiver are quite short for NVIS, the distances between the ionospheric layers represent a larger proportion of the total path length. The several reflections can also have similar energy levels. This gives rise to significant values of Doppler spread.

"To counter the effects of Doppler shift and Doppler spread the frequency separation between the OFDM carriers in the DRM signal is progressively increased (e.g. the carrier spacing in Mode D is more than 2.5 times that in Mode A). This ensures that the frequency spread experienced is kept to a sufficiently small fraction of the carrier spacing to allow correct demodulation."

Try driving it again. Ocean on one side and high cliffs on the other
such that FM is pretty much dead. You will not pick up anything from the
LA area just a few stations from up or down the coast. Must be a magic
radio in your car or you have never driven that road. Every post you
make, makes you look less real to me.

"HD Hypocrisy"

"Here's a few more reasons why only iBiquity and a few clueless radio group heads could make a big thing out of HD radio tagging... The very damn radio stations that broadcast in HD offer no programming worth listening to. HD Radio is a virtual sewer of formats owners don't want on their terrestrial frequencies and other assorted garbage that no one sane would listen to -- let alone spend money for new radios -- tagging or not."

In each market area, all listening to any radio station is recorded by listeners as is the instruction in the Arbitron diary. Commercial or non-commercial, local or not, internet or off air, satellite or terrestrial. All is recorded and processed. If there is any significant listening to out of market stations it is recorded.

There are a couple of hundred stations that get out of market listening in the US. Most are FMs, and the listening is in geographically adjacent or embedded markets.

In the San Francisco market, San Jose is part of the total metro. But there is also a separate San Jose rating, taken from the sample done in one county only, so the SF stations show up in the San Jose Book. Similarly, Riverside /San Berdoo are adjacent to LA, but not in the LA radio market (they are in the TV market and thus in the DMA) and LA stations get about half the listening in that market's ratings. But there is no market anymore where skywave listening to AM consistently if ever "makes the book." The last cases were the usage of KGO at night in Oregon.... but that does not happen any more.

But if WWL has listening in Seattle, WWL will show up in the Seattle ratings.

61. DAB annual sales 50% below forecast!!

Newsgroup: rec.radio.shortwave
Date: 2007-10-01 01:52:41 UTC
From: PocketRadio@gmail.com
Message-ID: <1191203561.356446.298810@k79g2000hse.googlegroups.com>
Source record: 125981

In the DRDB's 5-year forecast in 2004 they forecast that there would be 5.2m
sales in 2008 taking cumulative sales to 13.15m.

In the DRDB's 5-year forecast that came out last week they're forecasting
that they will sell only 2.6m receivers in 2008, and the cumulative sales
they're forecasting will be just 9.16m.

So the current forecast annual sales for 2008 are 50% below previous
forecasts, and the cumulative sales are 30% below previous
forecasts!!!!!!!!!!!!!!!

Fifty bloody percent! That's amazing. They're waaaaaaaaaaaaaaaaaay behind
target, and they'll never get FM switched off at the rate they're going.

They also provided a graph in the 5-year forecast of the cumulative sales in
the 2004 document, but now all they'll provide is a graph of "DAB household
penetration" for the next 5 years - basically because cumulative sales have
fallen so massively behind target they don't want anybody to see how
massively wrong their original forecasts were. For example, they were
predicting cumulative sales of 22m by the end of 2009 - not bleeding likely
when sales next year will only be 2.6m and cumulative sales will be 9.16m.
They're having a giraffe!

Un fking lucky. Serves them right due to the disgraceful way they've acted
with regards to DAB+ and every other bleeding thing they've done since the
whole DAB debacle began.

The systems I looked at a few years ago worked as I described. If you
can now get up link and down link satellite then the up link bit rates
can improve. Ping times will still be larger compared to DSL due to the

propagation time to from the 22K miles away bird.

The LA stations are not licensed to serve the coast up above Ventura
County.... that is waaaaaaaaaaaay outside their protected contour, and what
is supposed to be heard are the local stations in each place.

I certainly have never been fool enough to try to hear LA stations up
towards Santa Barbara. The former KRUZ, now KVYB, has a great signal along
there from around Camarillo up to SLo, for example. In fact, that station
gets good ratings in 5 different markets, from Oxnard to Santa Barbara to
SLO to Santa Maria and Bakersfield.

reality is what the broad based public does. What you individually do is

Yep, that where you got stuck somehow.

I just made a few empirical measurements on a receiver with digitally adjustable filters and noted increased high end audio response out to 8K. 8 khz wide is not pleasing because most radio stations are apparently boosting the high end. I usually set the bandwidth 4.4 khz for best sound otherwise it is to sharp.

A People's History of the United States, by Howard Zinn. It should be required reading in all our schools but it isn't since they are still clinging "George Washington cut down the cherry tree" fare . Put it at the top of your Christma present list to give to everyone you care about.

Howard Zinn is a genuine American hero. He fought all the good fights of our era--the integration of Negroes into American life, an end to the Vietnam War, the rights of labor, the limits of civil disobedience, opposition to militarism and government secrecy, and, unceasingly, establishing justice.

Here's a sample of his writings and remarkable insights into American history. True brilliance from a genius the American establishment doesn't want you to know about.

"The Declaration of Independence became an embarrassment to the Founding Fathers almost immediately. Some of George Washington's soldiers resented the rich in New York, Boston and Philadelphia, profiting from the war. When the Continental Congress in 1781 voted half pay for life to officers of the Revolution and nothing for enlisted men, there was mutiny in the New Jersey and Pennsylvania lines. Washington ordered two young mutineers shot 'as an example.' The shovelfuls of earth covering their bodies also smudged the words of the Declaration, five years old and already ignored, that 'all men are created equal.'

"Black slaves in Boston took those words seriously, too, and, during the Revolution, petitioned the Massachusetts General Court for their freedom. But the Revolution was not fought for them.

"It did not seem to be fought for the poor white farmers either, who, after serving in the war, now faced high taxes, and seizure of homes and livestock for nonpayment. In western Massachusetts, they organized, blocking the doors of courthouses to prevent foreclosures. This was Shays's Rebellion. The militia finally routed them, and the Founding Fathers hurried to Philadelphia to write the Constitution, to set up a government where such rebellions could be controlled."

"Beyond Voting," a column that appeared in the Boston Globe in 1976 and beginning, "Gossip is the opium of the American public," like many of the Globe columns, is as timely today as the day it was written. "So we get high on trivia, and forget that, whether Presidents have been impotent or oversexed, drunk or sober, they have followed the same basic policies. Whether crooks or Boy Scouts, handsome or homely, agile or clumsy, they have taxed the poor,

subsidized the rich, wasted the wealth of the nation on guns and bombs, ignored the decay of the cities, and done so little for the children of the ghettos and rural wastelands that these youth had to join the armed forces to survive--until they were sent overseas to die.

"Harry Truman was blunt and Lyndon Johnson wily, but both sent armies to Asia to defend dictators and massacre the people we claimed to be helping. Eisenhower was dull and Kennedy witty, but both built up huge nuclear armaments at the expense of schools and health care. Nixon was corrupt and Ford straightforward, but both coldly cut benefits for the poor and gave favors to rich corporations.

"The cult of personality in America is a powerful drug. It takes the energy of ordinary citizens which, combined, can be a powerful force, and depletes it in the spectator sport of voting. Our most cherished moment of democratic citizenship comes when we leave the house once in four years to choose between two mediocre white Anglo-Saxon males who have been trundled out of political caucuses, million dollar primaries and managed conventions for the rigged multiple choice test we call an election. Presidents come and go. But the FBI is always there, on the job, sometimes catching criminals, sometimes committing crimes itself, always checking on radicals as secret police do all over the world."

It is a temptation to quote at length from this book because I feel that Zinn's voice should and will prevail over today's cacophony of time-serving editorialists, self-satisfied academics, pompous pundits, and dishonest politicians. In the essay called "The Problem Is Civil Disobedience," Zinn says the law is the Bill of Rights and the Constitution, and adds, "But there is another part of law that doesn't get ballyhooed--the legislation that has gone through month after month, year after year, from the beginning of the Republic, which allocates the resources of the country in such a way as to leave some people very rich and other people very poor, and still others scrambling like mad for what little is left. That is the law. If you go to law school you will see this. You can quantify it by counting the big, heavy law books that people carry around with them and see how many law books you count that say 'Constitutional Rights' on them and how many that say 'Property,' 'Contracts,' 'Torts,' 'Corporation Law.' That is what the law is mostly about. The law is the oil depletion allowance--although we don't have Oil Depletion Allowance Day, we don't have essays written on behalf of the oil depletion allowance. So there are parts of the law that are publicized and played up to us--oh, this is the law, the Bill of Rights. And there are other parts of the law that just do their quiet work, and nobody says anything about them."

The final paragraph of this remarkable essay could serve as a rallying cry for any citizen's group trying to achieve justice for working class people.

"What we are trying to do, I assume, is really to get back to the principles and aims and spirit of the Declaration of Independence. This spirit is resistance to illegitimate authority and to forces that deprive people of their life and liberty and right to pursue happiness, and therefore under these conditions, it urges the right to alter or abolish their current form of government--and the stress had been on abolish. But to establish the principles of the Declaration of Independence, we are going to need to go outside the law, to stop obeying the laws that demand killing or that allocate wealth the way it has been done, or that put people in jail for petty technical offenses and keep other people out of jail for enormous crimes. My hope is that this kind of spirit will take place not just in this country but in other countries because they all need it. People in all countries need the spirit of disobedience to the state, which is not a metaphysical thing but a thing of force and wealth. And we need a kind of declaration of interdependence among people in all countries of the world who are striving for the same thing." Today, even more than when those words were written, "People in all countries need the spirit of disobedience to the state, which is not a metaphysical thing but a thing of force and wealth."

74. Matt Drudge - GOOD RIDDANCE!

Suddenly announces that tonight is the last of his very lame radio show. Wonder if the closet fag got caught in a compromising position?

Gender: Male
Race or Ethnicity: White
Sexual orientation: Gay
Occupation: Blogger, Radio Personality, Pundit

Nationality: United States
Executive summary: The Drudge Report

Matt Drudge was a C- and D-student in high school, then worked a steady succession of unsteady low-pay jobs. He delivered newspapers, engaged in telemarketing, suffered the overnight shift at a 7-Eleven, and was hired as a runner at CBS Studios in California. Eventually he was promoted to the gift shop, where he manned the cash register and overheard juicy gossip. When his father gave him a computer in 1994, Drudge started posting the gossip to online newsgroups, along with snippets he collected from listening to talk radio and police scanners, and watching TV news. Among his early scoops were advance copies of TV ratings, found in the trash at CBS.

A pioneer in what came to be called weblogging, Drudge's site had 80,000 visitors daily even before his big scoop, the Bill Clinton-Monica Lewinsky affair. Newsweek had the story, but they hesitated, pondering the unprecedented enormity of reporting on a sitting President's extramarital affairs. When Newsweek decided to hold off until they could verify a few more details, someone at the magazine (Michael Isikoff is widely suspected) sent Drudge an email. With no editor to hold him back, Drudge ran the story, and his site was suddenly getting hundreds of thousands, then millions of hits daily.

The site's relatively scant original material is based on tips from Drudge's far-flung network of online informants, many of whom are employed by mainstream media or right-wing operations. Among his biggest "scoops" Drudge reported that Clinton had fathered a child through an affair with an African-American woman (which never happened), broke the 2004 story of John Kerry's extramarital affair (which never happened), and reported that Alec Baldwin had promised to leave America if George W. Bush won the 2000 election (which was actually a joke Baldwin had cracked during the 1992 election between Clinton and Bush's father).

In 1997, Drudge reported that "...one influential Republican, who demanded anonymity, [told] the Drudge Report that court records existed showing that then-White House aide Sidney Blumenthal had

committed violent acts against his wife." As with many of Drudge's scoops, it was untrue, and despite a retraction and apology, Blumenthal sued. But he dropped the suit before it came to trial, after Drudge -- with lawyers provided by arch right-winger David Horowitz's Individual Rights Foundation, funded in turn by billionaire conservative Richard Scaife -- was able to stretch out the proceedings until Blumenthal could no longer afford the cost.

Drudge rarely names his sources, and the evidence shows that he has his facts wrong more often than not. Brill's Content tracked Drudge's news for nine months in 1998, and found that 20 of the 51 stories Drudge labeled "exclusive" actually weren't -- they were simply items mainstream newspapers and networks had reported. Of the 31 remaining Drudge "exclusives", 11 (36%) were true, 10 (32%) were demonstrably false and/or never happened, and the accuracy or inaccuracy of the remaining 10 items (32%) was impossible to verify.

Those odds may do well for a baseball batting average, but if a real reporter had the facts with him only four times out of ten, he would be looking for a new line of work. But with no staff and none of the research expenses that come with traditional journalism, Drudge is not scouring the want ads. He quit his job at CBS when Wired started running his web column for $3,000 a month. From there he jumped to America Online, and now Drudge makes an estimated $1.2 million a year through ads rotated on his site. For a time he hosted a weekly show for Fox News, and another weekly show for ABC, but both were cancelled within a year. He still hosts a syndicated radio show on the weekends, and of course, he is the author of the subliterate bestseller Drudge Manifesto.

He now lives in a comfortable Miami home/office/condo, where several TVs are on most of the time while he is awake. He updates the site several times daily, with links leading to mainstream newspaper and wire-service websites, headlines rewritten to reflect Drudge's perspective, and the occasional "exclusive". Overnight, while Drudge slumbers, a friend in California monitors the incoming email, watches the news, and keeps the site updated.

Drudge is widely whispered to be gay. "I go to bars", Drudge once explained. "I go to straight bars, I go to gay bars." When photographed, he is almost invariably dressed like a 1930s muckraker, complete with a "press style" hat.

The cliffs along route 1 are mostly in LA county. I see you don't live

I wrote route 1, not route 101 as soon as you leave Santa Monica. You
are not on the same map.

>From the Introduction to You Can't Be Neutral on a Moving Train
By Howard Zinn

I had been invited to give a talk in Kalamazoo Michigan. It was the night of the final televised presidential debate of the 1992 campaign, and to my surprise (did they need a break from election madness?) there were several hundred people in the audience. This was the quincentennial year of the Columbus landing in the Western Hemisphere and I was speaking on "The Legacy of Columbus, 1492-1992."

Ten years earlier, in the very first pages of my book People's History of the United States, I had written about Columbus in a way that startled my readers. They, like me, had learned in elementary school (an account never contradicted, however far their education continued) that Columbus was one of the great heroes of world history, to be admired for his daring feat of imagination and courage. In my account, I acknowledged that he was an intrepid sailor, but also pointed out (based on his own journal and the reports of many eyewitnesses) that he was vicious in his treatment of the gentle Arawak Indians who greeted his arrival in this hemisphere. He enslaved them, tortured them, murdered them, all in the pursuit of wealth. He represented, I suggested, the worst values of Western Civilization: greed, violence, exploitation, racism, conquest, hypocrisy (he claimed to be a devout Christian).

The success of the People's History took both me and my publisher by surprise. It went through twenty-four printings, sold 300,000 copies, was nominated for an American Book Award, and was published in Great Britain and Japan. I began to get letters from all over the country, and a large proportion of them were in excited reaction to my opening chapter on Columbus.

Most of the letters thanked me for telling an untold story. A few were skeptical and indignant. One high school student in Oregon, assigned my book by his teacher, wrote: "You've said that you have gained a lot of this information from Columbus' own journal. I am wondering if there is such a journal, and if so, why isn't it part of our history? Why isn't any of what you say in my history book...?"

A mother in California, looking into a copy of the People's History her daughter brought home from school, became enraged, demanded that the school board investigate the teacher who used my book in her classes.

It became clear that the problem (yes, I had become a problem) was not just my irreverence toward Columbus, but my whole approach to

American history. I insisted, in A People's History, as one reviewer put it, on "a reversal of perspective, a reshuffling of heroes and villains." The Founding Fathers were not just ingenious organizers of a new nation (though they certainly were that), but also rich white slaveholders, merchants, bondholders, fearful of lower-class rebellion, or, as James Madison put it, of "an equal division of property."

Our military heroes--Andrew Jackson, Theodore Roosevelt--were racists, Indian killers, war-lovers, imperialists. Our most liberal presidents--Jefferson, Lincoln, Wilson, Roosevelt, Kennedy--were more concerned with political power and national aggrandizement than with the rights of non-white people.

My heroes, on the other hand, were the farmers of Shays' Rebellion; the black abolitionists who violated the law to free their brothers and sisters; the people who went to prison for opposing World War I; the workers who went on strike against powerful corporations, defying police and militia; the Vietnam veterans who spoke out against the war; the women who demanded equality in all aspects of life.

There were historians and teachers of history who welcomed my book. A number of people were upset; to them I was clearly out of order. If there were criminal penalties, I might have been charged with "assault with a deadly weapon--a book," or "disorderly conduct--making unseemly noises in an exclusive club," or "trespassing--on the sacred domain of historiographical tradition."

To some people, not only was my book out of order, my whole life was out of order--there was something unpatriotic, subversive, dangerous, in my criticism of so much that went on in this society. During the Gulf War of 1991, I gave a talk to a high school assembly in Massachusetts, a private school where the students came from affluent families and were said to be "95 percent in favor of the war." I spoke my mind, and to my surprise got a great round of applause. But in a classroom afterward, meeting with a small group of the students, a girl who had been staring at me with obvious hostility throughout the discussion, suddenly spoke up, her voice registering her anger: "Why do you live in this country?"

I felt a pang. It was a question I knew was often thought, but unspoken. It was the issue of patriotism, of loyalty to one's country, which arises again and again, whether someone is criticizing foreign policy, or evading military service, or refusing to pledge allegiance to the flag.

I tried to explain, that my love was for the country, for the people, not for whatever government happened to be in power. To believe in democracy was to believe in the principles of the Declaration of Independence--that government is an artificial creation, established by the people to defend the equal right of everyone to life, liberty, and the pursuit of happiness. I interpreted

"everyone" to include men, women, children all over the world, who have a right to life, not to be taken away by their own government or by ours.

When a government betrays those democratic principles, it is being unpatriotic. Love of democracy would then require opposing your government. It would require being "out of order."

The publication of A People's History led to requests from around the country for me to speak. And so, there I was in Kalamazoo, that evening in 1992, speaking, not just on Columbus, but on why telling the truth about Columbus was important for us, here and now, 1992, Kalamazoo. I was really not interested in Columbus, but in the issues raised by his interaction with the native Americans: is it possible for people, overcoming history, to live together, with equality, with dignity, today?

At the end of my talk, someone asked a question which has been put to me many times in different ways. "Given the depressing news of what is happening in the world, you seem surprisingly optimistic. What gives you hope?"

I attempted an answer. I said I could understand being depressed by the state of the world, but the questioner had caught my mood accurately. To him and to others, mine seemed an absurdly cheerful approach to a violent and unjust world. But to me what was often disdained as romantic idealism, as wishful thinking, was justified if it prompted action to fulfill those wishes, to bring to life those ideals.

The willingness to undertake such action cannot be based on certainties, but on those possibilities glimpsed in a reading of history different from the customary painful recounting of human cruelties. In such a reading we can find not just war but resistance to war, not just injustice but rebellion against injustice, not just selfishness but self-sacrifice, not just silence in the face of tyranny but defiance, not just callousness but compassion.

Human beings show a broad spectrum of qualities, but it is the worst of these which are usually emphasized, and the result, too often, is to dishearten us, diminish our spirit. And yet, historically, that spirit refuses to surrender. History is full of instances where people, against enormous odds, have come together to struggle for liberty and justice, and won--not often enough, of course, but enough to suggest how much more is possible.

The essential ingredients of these struggles for justice are human beings who, if only for a moment, if only while beset with fears, still step out of line and do something, however small. And even the smallest, most unheroic of acts adds to the pile of kindling that may be ignited by some surprising circumstance into tumultuous change.

Individual people are the necessary elements, and my life has been full of such people, ordinary and extraordinary, whose very existence has given me hope. Indeed, the people there in that audience in Kalamazoo, the questioner himself, clearly concerned with the world beyond the election returns, were living proof of possibilities for change in this difficult world.

Though I didn't say it to my questioner, I had met such people that evening, in that city. At dinner before my talk I was with the campus parish priest, a man built like a football linebacker, which in fact he had been years before. I asked him the question I often ask people I like: "How did you come by the peculiar ideas you now have?"

It was a one-word answer, the same one-word answer given by so many: "Vietnam." To life-probing questions there seems so often to be a one-word answer: Auschwitz...Hungary...Attica...Vietnam. The priest had served there as a chaplain. His commanding officer was Colonel George Patton III. Son of his father, Patton liked to talk of his soldiers as "darn good killers," hesitating to use the word "damn" but not the word "killers." Patton ordered the chaplain to carry a pistol while in the combat zone. He refused, and despite threats, continued to refuse. He came out of Vietnam against not just that war, but all wars. And now he was traveling back and forth to El Salvador to help people struggling against death squads and poverty.

Also at dinner was a young teacher of sociology at Michigan State University. Raised in Ohio by working-class parents, he too had come to oppose the war in Vietnam. Now he taught criminology, doing research, not about robbers and muggers, but about high crime, about government officials and corporate executives, whose victims were not individuals but the whole of society.

It's remarkable how much history there is in any small group. There was also at our dinner table a young woman, a recent university graduate, who was entering nursing school so that she could be of use to villagers in Central America. I envied her. As one of those many who write, speak, teach, lawyer, preach, whose contribution to society is so indirect, so uncertain, I thought of those who give immediate help--the carpenters, the nurses, the farmers, the school bus drivers, the mothers. I remembered the Chilean poet, Pablo Neruda, who wrote a poem about his lifelong wish that he could do something useful with his hands, that he could make a broom, just a broom.

@PAR SUB = I didn't say this to my questioner in Kalamazoo. In fact, to really answer him I would have to say much more about why I was so curiously hopeful in the face of the world as we know it. I would have to go back over my life.

I would have to tell about going to work in a shipyard at the age of 18, and spending 3 years working out on the docks, in the cold and heat, amidst deafening noise and poisonous fumes (it's impossible to describe the smell created by a welder's torch burning the zinc of galvanized steel), building battleships and landing ships in the early

years of the second World War.

I would have to tell about enlisting in the Air Force at 21, being trained as a bombardier, flying combat missions in Europe, and later asking myself troubling questions about what I had done in the war.

And about getting married, becoming a father, going to college under the GI Bill while loading trucks in a warehouse, with Roz and our two children in a charity day-care center, and all of us living in a low-income housing project on the lower East Side of Manhattan.

And about getting my PhD from Columbia and my first real teaching job (I had a number of unreal teaching jobs), going to live and teach in a black community in the deep South for seven years. And about my students at Spelman College who one day decided to climb over a symbolic and actual stone wall surrounding the campus to make history in the early years of the civil rights movement.

And about my experiences in that Movement, in Atlanta, in Albany, Georgia, and Selma, Alabama, and Hattiesburg and Jackson and Greenwood, Mississippi.

I would have to tell about moving North to teach in Boston, and joining the protests against the war in Vietnam, and being arrested a half-dozen times (the official language of the charges was always interesting: "sauntering and loitering""...disorderly conduc""...failure to quit..."etc.). And traveling to Japan, and to North Vietnam, and speaking at hundreds of meetings and rallies, and helping a Catholic priest stay underground in defiance of the law.

I would have to recapture the scenes in a dozen courtrooms where I testified in the 1970s and 1980s, mostly for people who had been arrested in protests against the war. I would have to tell about the prisoners I have known, short-timers and lifers, and how that affected my view of imprisonment.

When I became a teacher, I could not possibly keep out of the classroom my own experiences--growing up, working, going to war, becoming involved in the civil rights movement and the anti-war movement, my time in jails and courtrooms. I have often wondered how so many teachers manage to spend a year with a group of students and never reveal who they are, where they came from, what kind of lives they have led, where their ideas come from, what they believe in, what they want for themselves, for their students, for the world.

Does not the very fact of that concealment teach something terrible to their students--that you can separate the study of literature, history, philosophy, politics, the arts, from your own life, your deepest convictions about right and wrong?

In my teaching I never concealed my political views: my detestation of war and militarism, my anger at racial inequality, my belief in a democratic socialism, in a rational and just distribution

of the world's wealth. I made clear my abhorrence of any kind of bullying, whether by powerful nations over weaker ones, or governments over its citizens, or employers over employees, or by anyone, on the Right or the Left, who thought they had a monopoly of the truth.

This mixing of activism and teaching, this insistence that education cannot be neutral on the crucial issues of our time, this movement back and forth from the classroom to the struggles outside, by teachers who hope their students will do the same, has always frightened the guardians of traditional education. They prefer that education simply prepare the new generation to take its proper place in the old order, not to challenge that order.

I would always begin a course by making it clear to my students that they would be getting my point of view, that I didn't pretend to an "objectivity" that was neither possible nor desirable. But I would try to be fair to other points of view. I encouraged my students to disagree with me. They had a long period of political indoctrination before they arrived in my class--in the family, in high school, in movies and television. Into a marketplace of ideas so long dominated by orthodoxy I wanted only to wheel my little pushcart, offering my wares along with the others, leaving students to make their own choices.

The thousands of young people in my classes over the years gave me hope for the future. Through the 1970s and 1980s, everyone outside seemed to be groaning about how "ignorant" and "passive" was the current generation of students. But listening to them, reading their journals and papers, their reports on the community activity that was part of their assigned work, I was impressed with their sensitivity to injustice, their eagerness to be part of some good cause, their potential to change the world.

The student activism of the 1980s was small-scale, but in that time there was no great national movement to join, and there were heavy economic pressures from all side to "make good," to "be successful," to join the world of prosperous professionals. Still, so many of them were yearning for something more, and so I did not despair. I remembered how in the 1950s haughty observers talked of the "silent generation" as an immovable fact, and then, exploding that notion, came the 1960s.

And yet, I am not oblivious to the bad news we are constantly confronted with. That surrounds me, inundates me, depresses me intermittently, angers me.

I think of the poor today, so many of them in the ghettos of the non-white, often living a few blocks away from fabulous wealth. I think of the hypocrisy of political leaders, of the control of information through deception, through omission. And all over the world, governments play on national and ethnic hatred.

I am aware of the violence of everyday life for most of the human race. All represented by the images of children. Children, hungry children with missing limbs. The bombing of children reported officially as "collateral damage."

@PAR SUB = As I write this, in the summer of 1993, there is a general mood of despair. The end of the cold war between the United States and the Soviet Union has not resulted in world peace. In the countries of the Soviet bloc, there is desperation and disarray. There is a brutal war going on in the former Yugoslavia, and more violence in Africa. The prosperous elite of the world finds it convenient to ignore starvation and sickness in the poverty-ridden countries. The United States and other powers continue to sell arms wherever it is profitable, whatever the human costs.

In this country, the euphoria that accompanied the election of 1992 of a young and presumably progressive president has evaporated. The new political leadership of the country, like the old, seems to lacks the vision, the boldness, really the will, to break from the past. It maintains a huge military budget which distorts the economy and makes possible no more than puny efforts to redress the huge gap between rich and poor. Without such redress, the cities must remain riddled with violence and despair. And there is no sign of a national movement working to change this.

Only the corrective of historical perspective can lighten our gloom. Note how often in this century we have been surprised by the sudden emergence of a people's movement, the sudden overthrow of a tyranny, the sudden coming to life of a flame we thought extinguished. We are surprised because we have not taken notice of quiet simmering of indignation, of the first faint sounds of protest, of the scattered signs of resistance that, in the midst of our despair, portend the excitement of change. The isolated acts begin to join, the individual thrusts blend into organized actions, and one day, often when the situation seems most hopeless, there bursts onto the scene...a Movement.

We are surprised because we don't see that beneath the surface of the present there is always the human material for change: the suppressed indignation, the common sense, the need for community, the love of children, the patience to wait for the right moment to act, in concert with others. These are the elements that spring to the surface when a Movement appears in history.

People are practical, they want change but feel powerless, alone, do not want to be the blade of grass that sticks up above the others and is cut down. They wait for a sign, from someone else who will make the first move, or the second. And there are intrepid people who, at certain times in history, take the risk, that if they make that first move others will follow quickly enough to prevent their being cut down. And if we understand this, we might make that first move.

This is not a fantasy. This is how change has occurred again and again in the past, even the very recent past. We are so overwhelmed by the present, the flood of pictures and stories pouring in on us every day, drowning out this history, that it is no wonder we lose hope. I realize, too, it is easier for me to feel hopeful because in many ways I have just been lucky.

Lucky. for one thing, to have escaped my upbringing. There are memories of my father and mother, who met as immigrant factory workers, who worked hard all their lives, and never got out of poverty (I always feel some rage when I hear the voice of the arrogant and affluent: "We have a wonderful system; if you work hard you will make it." How hard they worked, how brave they were just to keep four sons alive in the cold-water tenements of Brooklyn.

Lucky, after stumbling around from one bad job to another, to find work that I loved. Lucky to encounter remarkable people everywhere, to have so many good friends.

And also, lucky to be alive, because my two closest Air Force Friends--Joe Perry, 19 and Ed Plotkin, 26--died in the last weeks of the war. They were my buddies in basic training at Jefferson Barracks, Missouri. We suffered the summer heat together on "forced marches with full field-pack and equipment." We went out on weekend passes together. We learned to fly Piper Cubs in Vermont, and played basketball in Santa Ana, California, while waiting to be assigned. Then Joe went to Italy as a bombardier, Ed to the Pacific as a navigator, I to England as a bombardier. Joe and I would write to one another, and I kidded him, as we, who flew B-17s, kidded those who flew B-24s--we called them B Dash Two Crash Four.

The night the European war ended, my crew drove to Norwich, the main city in East Anglia, where everybody was in the streets, wild with joy, the city ablaze with lights that had been out for six years. The beer flowed, enormous quantities of fish and chips were wrapped in newspapers and handed out to everyone, people danced and shouted and hugged one another.

A few days after that, my most recent letter to Joe Perry came back to me, with a penciled notation on the envelope: "Deceased"--too quick a dismissal of a friend's life.

My crew flew our old battle-scarred B-17 back across the Atlantic, ready to continue bombing in the Pacific. Then came the news about the atomic bomb dropped on Hiroshima, and we were grateful--the war was over. I had no idea that one day I would visit Hiroshima and meet blinded, maimed people who had survived the bomb, and that I would rethink that bombing and all the others.

When the war ended and I was back in New York, I looked up Ed Plotkin's wife--he had stolen out of Fort Dix the night before he was being shipped overseas, to spend a last night with his wife. She told me Ed crashed in the Pacific and died just before the war ended, and

that a child was conceived the night he went AWOL. Years later, when I was teaching in Boston, someone came up to me after a class with a note: "Ed Plotkin's daughter wants to meet you." We met and I told her whatever I could remember about the father she never saw.

@PAR SUB = So I feel I have been given a gift--undeserved, just luck--of almost 50 years of life. I am always aware of that. For years after the war, I had a recurrent dream. Two men would be walking in front of me in the street. They would turn, and it would be Joe and Ed.

Deep in my psyche, I think, is the idea that because I was so lucky and they were not I owe them something. I owe them not to waste my gift, to use these years well, not just for myself (although I insist on having some fun; I am not a martyr, though I know some and admire them), but for that new world we all thought promised by the war that took their lives.

And so I have no right to despair. I insist on hope.

It is a feeling, yes. But it is not irrational. People respect feelings, but still want reasons. Reasons for going on, for not surrendering, for not retreating into private luxury or private desperation. People want evidence of those possibilities in human behavior I have talked about. I have suggested that there are reasons. I believe there is evidence. But too much to give to the questioner in Kalamazoo. It would take a book.

So I decided to write one.

You did not specify. The road runs up the entire coast, and the cliffs

The 101 and the 1 are the same with a dual designation in areas, and
separate in others. You obviously have never looked at a road map.

OK, now that you know where of I speak please comment on the FM
reception of route 1 just north of Santa Monica.

1) The ACC is an athletic conference within the NCAA. You mean AAC.

2) There is no such thing as "Hybrid Digital" radio. "HD Radio" is a trademark of iBiquity Digital Corp for their IBOC implementation, and the "HD" doesn't mean anything in particular. IBOC has three modes of operation: hybrid, extended hybrid, and all digital. All three are part of "HD Radio."

3) "HD Radio" uses a codec known as HDC (a.k.a. "HD Codec"). While iBiquity has acknowledged that it uses SBR, they have pointedly declined to discuss whether or not it has any other similarity to HE-AAC. I doubt that you could cite an authoritative source, but if you could I would love to know about it.

No, you can't. It is highly directional at night, with less than 2 kw headed east to protect WGY and other stations on 810. It barely has a signal in Fresno or Sacramento at night; there is hardly any power from 20 degrees to about 130 degrees. The signal is pretty much totally nulled towards any directions to the east at night.

Further, there are stations in Winnipeg, Tampico (50 kw) and Kansas City and even Denver that have night operations that would interfere with any usable KGO reception in the "Rockies."

It's a good place to have an internet connection. Actually, the FM reception from Wilson up to about halfway through Malibu is OK; I was in a Canyon off PCH in the Palisades for a while and all the stations I was interested in came in fine until in the total shadow of the Santa Monicas up to Point Magoo, where reception was spotty. Fortunately, not many people live there.

This whole thread is disturbing for the level of misinformation within it. Let's take these two convenient examples.

1) Sirius satellite radio uses a codec called PAC. While PAC and AAC are both "perceptual" codecs, and while they are both rooted in some very early Bell Labs research and patents, the two are completely different and nowhere near compatable with each other. (XM uses a Coding Technologies implementation of HE-AAC, trade named aacPlus.)

2) AAC is a huge leap forward from MP3 -- that's the whole point of it. The MPEG working group was unable to improve codec technology while staying forwards and backward compatable with MP3. So, they started over with a clean slate. AAC (no plus) is the compression format that iTunes uses. (The iPod plays both AAC and MP3 files, but AAC is the preferred format.) You are free to experiment on an iPod comparing the same material encoded to the same compression ratio using alternately MP3 and AAC.

58 years old, female, retired studio technician (or "operator," if you prefer). A.A. degree, one year of study in electronic theory and an FCC general operator's license (formerly first phone). Still work occasionally as a freelance audio mixer. Moderate a classic movies newsgroup and read voraciously in my spare time.

< Snip >

Why, foolhardy you say? You bet!

Ah, yes the risk would be great to try for an LA station around Santa
Barbara. You could lose your life on such an attempt if you failed.
Imagine... there you are in the middle lane of route 101 in Santa
Barbara your brow furrowed in the intense concentration required to get
that DX before... before that semi barreling down on you makes
connection... sweating profusely working the controls of the radio
with the multi-ton rig of death bearing down on you... horn blaring the
driver can't stop in time... this is it... the last seconds of your
life ticking away as you try for that station ID... time seems to go
into slow motion as you work the controls of the radio... and... AND...
THERE YOU GOT IT... and in those last few seconds you leap for the
shoulder of the highway... the rig screeeems past, barely missing you,
the driver shaking his fist at you, the horn blaring away. Suddenly,
it's over, you made it... or is it?

Lying there in a crumpled mess of ice plant by the side of the highway
the radio just a few feet from your head where it landed your attention
turns toward it again. In your current state of shock from barely

avoiding the rig of death the surreal voice emanating from the radio is babbling about some guy trying to commit suicide on the 101. Before those words can even sink into your thick skull, you notice a siren in the distance. Listening intently now... you notice it's not one but maybe two... they are getting closer now... but you are content to just lie there savoring in the moment that you are still alive and all that it entails... including that nice DX catch you just made!

Next thing you know a CHP cruiser screeches to a halt a few feet from you, a white ambulance just behind it. Standing up now your head swirls as the officer is reading your rights and the nice men in the white coats slip you into a new jacket that they explain will prevent you from further hurting yourself. Protesting you try to explain that you were just trying for a FM DX catch from LA but they don't believe you. "Nobody listens to an LA FM station in Santa Barbara they say" and they laugh and laugh at the notion coming from the crazy guy wandering on the 101, so intent on operating the radio controls he wanders into freeway traffic.

To be continued... Next up Eduardo discovers a new reality aided by psychotropic drugs.

Don't Worry Eduardo. I promise to visit you at the funny farm.

How many people do you think drive on that road to and from work?

No, I believe the issue is that YOU don't seem to understand that there are clear, listenable signals beyond your precious 10mV/m contours. Perhaps the issue is that once you get outside of those contours, there are fewer people, fewer homes, fewer sources of interference, and therefore, clearer reception. Please do not tell people what is listenable, because YOU DO NOT KNOW! PERIOD! Until you go to someone's home or office, and actually LISTEN to what they are listening to, you are in no position whatsoever to tell them what they can and cannot listen to. Even then, it becomes a subjective matter. As it stands, your stats are BS, pure and simple.

They won't be shutting down at all. Something a lot better then IBOC
needs to come around. We all know Ibiquity is a farce.

WRONG. Arbitron does NOT log "ALL LISTENING". They log a small percentage
of listening, and profess to know what all the rest are doing based upon
that. Statistics are crap. They are not, and really can never be, accurate.
They are mathematical sleight of hand. Smoke and mirrors. I doubt there is
any real scientific foundation for them at all, since it's highly unlikely
that anyone did a small sample, then went to six million people and asked
each of them the same questions to verify the numbers.

Sure.

Downlink is from the bird. You still have to be connected to a phone line
for your uplink (unless you want to pay beuxcoup bux for an uplink
transmitter). Thus, you get good download speeds, but the return path is a
slow 56Kb/s phone modem. This causes long ping times, which causes poor
forward error correction and nasty slow uploads.

The 1MHz AMBCB spectrum is pretty much useless for anything BUT
broadcasting. The very long wavelengths are not usable for things like
telephones, R/C, etc., which need the short wavelengths and their
corresponding short antennae for portability. It took mid-UHF frequencies to
begin to make cellular phones viable.

300 MHz isn't beans at 2.4 GHz (or higher). It's also not a lot when you consider that the bandwidth will be used by thousands or more users. Once you break it down into individual slices of bandwidth for each of those users, it doesn't really allow for much. Wireless N for your home network passes up to 200Mb/s.. you don't think that takes a lot of bandwidth?

Cell phone systems use large swaths of bandwidth, even with coded and time domain sharing, and they will be taking up even more in the near future. Some will use frequencies vacated by the upper television channels.

Handy Shortwave Chart
Bill McFadden
billmc@agora.rdrop.com

Band allocations and time zone conversions for the USA. Includes broadcast
bands used outside the USA. For multi-use bands, primary usage is shown.
Some stations operate outside official bands. Information is from Oct 2005
FCC rules and Jan 2006 NTIA manual, see Chapter 4 of:
http://www.ntia.doc.gov/osmhome/redbook/redbook.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is
5 kHz. Frequencies above 10000 kHz tend to propagate better during the day;
frequencies below 10000 kHz tend to propagate better at night.

Please e-mail suggestions and corrections to billmc@agora.rdrop.com.

Phone line as SW antenna

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area. Telephone lines present a potential shock hazard. Do not use this antenna for transmitting. Use at your own risk.

INTRODUCTION

This article describes how to use a phone line as a shortwave receiving antenna. Performance will vary depending on the kind of phone line you have. Overhead lines usually make okay antennas, while underground lines
| usually don't. Phone lines carrying DSL service may be unsuitable because
| DSL operates over a wide spectrum. A phone line antenna will generally pick up more power line noise than a dedicated antenna, so don't expect to
| use it for DX work. Nevertheless, I found that it outperformed the
| telescopic whip antennas built into many portables.

A reader sent in this suggestion: If you're concerned about connecting the phone line directly to the receiver, try wrapping the phone cord several times around the receiver's telescopic whip antenna instead. Performance may not be as good as a direct connection, but it will probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought much about it because thunderstorms are rare in my area. Most phone lines have lightning arrestors on them where they enter the house, but the lightning arrestors may pass enough energy during a lightning strike damage a receiver. My suggestion is to disconnect the antenna when not in use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and receiver. The capacitor eliminates all phone line voltages, including
| ringing, so that they will not harm the receiver. The capacitor should
| be rated 250 volts or higher.

```
Phone line RF connector
red .01 uF center cond. / \
or o--------||-----------------------------|-o | To receiver
green \ /
50 ohm coax |
ground |
or o-----------------------------------------+
N.C. shield
```

N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be
| purchased from shortwave dealers (see below for recommendations).

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

These filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:

```
Phone line RF connector
red -------- center cond. / \
or o----| |-------------------------|-o | To receiver
green | | \ /
| FILTER | 50 ohm coax |
ground | | |
or o----| |----------------------------+
N.C. -------- shield
```

```
| RECOMMENDED FILTERS
|
| If you don't want to make your own filters, the following have good
| performance, are well-built and affordable:
|
| Model 400 BCB interference filter (3.5 MHz highpass)

```

| Model 420 HF lowpass filter (30 MHz lowpass)
| http://www.iceradioproducts.com/filtersrf.html#3
| (scroll down a bit to see the model 420)
|
| If you have a random-wire antenna, the following unit will provide
| impedance matching and lightning protection (connect antenna to 450-ohm
| terminal):
|
| Model 182A beverage matching unit

FILTER PLANS

The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)
Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.

```
--------||---+----||-----+----||-----------
} }
{ {
} }
-------------+-----------+-----------------
```

The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB

1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

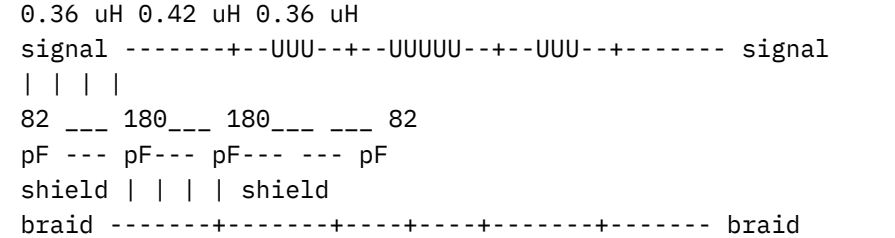
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



|
chassis ground

I had to do a little more improvising at this point. I used .33 uH
instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there
are 4 lugs plus a grounded lug. All "ground" connections go to the lug
that is mounted to the chassis, and the other 4 lugs are used for each
of the connections on the signal line. One terminal strip is used per
filter. Since both filters were necessary to clean up the hash, I am
going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means
you can't possibly hook them up backwards. (In the above schematics,
left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

Gee, maybe if some independant station can't afford multiple programming,
they'll have even have trouble justifing buying the IBOC hardware.

Yeah, there's a few stations in which true high fidelity sound would matter.
Not many.

Oh? A great many radios sold in the US are the same as the radios sold in other countries and AM stereo still pretty rare here.

If they cared. The demand for AM stereo was fragile.

Yep. And HD radio is selling about as well as AM stereo did.

Are they making money on the secondary channels yet? Are they even carrying commercial advertising?

And I'm sure a fellow as clever and imaginative as you are can figure how they might try to make money even if there aren't enough listeners to sell commercial advertising.

Hint: They won't call it "HD radio"

OK, I would have supported my point better if I had said:

"Many people listen to a few top rated stations, and a few people listen to many bottom rated stations."

Either way, I'm aiming at the same point.

And my point is that there are alot of stations which don't have many listeners, already. And HD radio does little to increase the number of people listening to the radio.

HD radio does little to aid the health of the radio industry in general, but it may be harmful to those people who are trying to run a small time low profit station.

I overstated my arguement when I said:

"In most markets, most listeners are listening to a few stations."

I'm sure we can agree on:

"Many people listen to a few top rated stations, and a few people listen to
many bottom rated stations."

Is there really an important difference between the two statements?

Oh, yeah I'm quite the old timer. Why, I remember when that Armstrong kid was telling me about the high fidelity radio system he was working on which would quickly obselete the old AM system.

Yes. Same way that TV Nielsen Ratings work. Statistics science has
shown you don't need to record everybody..... you can record a small
sample & still get an accurate result of how the group as a whole
thinks.

While it's true such a process won't record any amount below ~0.1
percent of the group, let's face it.... nobody cares about such small
tiny insignificant numbers.

Dear Grandma (and grandpa):

Stop fiddling with your tube amplifier, and listen to the radio on the
internet. (Yes you can even do it through a 56K dialup modem.)

World War II is over; come into the 21 century.

You can't fight consumer desire either. Just because YOU think
internet transmission is better doesn't mean the People will agree.
Look at the colossal failure called WebTV ("bring internet to your
set"). Consumers ignored it.

I've heard it. I don't care, because it doesn't affect the local

distant listening, I am not stuck back in World War 2. I am in the

Yes it is. Just as watching NBC or FOX on your cable is still free

If you think one person can possibly know EVERYTHING there is to know
about the subject of electronics/electrical devices. For example:

- Do you know what VHDL is?
- How about a state machine?
- Synchronous DDR?
- PCI Express?
- Flip-flop?
- What does GCLK mean in the context of FPGAs?
- What are constraints?

This is just a small sample of what I know, because this is what I
work upon every day..... but I suspect a lot of it you have no clue
what it's about. And that's fine. Because I don't expect one person
to know everything there is to know about EE.

I've worked in sales, but I tried to avoid lying. For example when I
was in college I worked for Sears. They instructed me to "sell
extended warranties" I complied, but I also told the customers that I
thought it was un-necessary.

Sears didn't like me very much

If you read the thread, you'll see some other very arrogant & very
condescending people who think folks like you are inferior. They
don't consider what you do to be "real" work. (see below).

I am not one of those. I wish I had half the talent you had, when

The reason I ask is because there's a local* Christian station WJTL, supported purely by donations, that *never* appears in the Arbitron ratings. I know it's a popular station so I'm surprised that it never shows up.

Does Arbitron, like Nielsen, only monitor stations that pay for their services (and thus ignore those that don't)?

* Lancaster PA

Yes and the sooner you realize that, the happier you will be. You shouldn't expect the FCC or the National Association of Broadcasters to care about a hobby (distant AM listening) that only represents less than 0.01% of the audience.

It's the same old junk that's already on FM.

The exception would be putting an AM channel
on FM, as some stations do, which makes their
inaudible AM programming available at night.

The particular case in question used to be Imus,
back when there was Imus.

AM distant listening is even deader. The number of HD listeners
outnumbers distant AM listeners by (approximately) 1 million to
10,000.

Arbitron's survey includes all the stations in a given geographic
area.
But only hose who pay get rated.

Although within the radio community Arbitron will tell subscribers the
break down.

This data was accurate in the 1999-2000 time frame, I knew a grad
student who was
doing her PHD on the inaccuracy inherent in any voluntary survive. She
"proved" that
both Arbitron and Nielsen are nowhere near accurate.

Of course, as Mark Twain said, " there are lies, damn lies then
statistics".

Kids today use their computers to listen to distant stations, not
radio.

Truckers use XM or Sirius, not terrestrial broadcast.

You are living in the past, but everybody else has moved into the

(1) Don't be rude & insulting.

(2) I looked-up two-way satellite communication on wikipedia before I
posted, but it said the upstream is limited to only 2.4 kbit/s.
That's a LOT slower than a 56k phone line connection.

(3) If wikipedia is wrong, please provide a citation so I can update
it. Back-up your "higher upload speeds" claim.

Most people listening to radio broadcasts do so because they are looking for content and don't really care all that much how the signal got to the speaker. Those are the people that broadcasters and advertisers focus their efforts on.

DX liseners are focused not so much on content as on knowing when signal propogation conditions will change to allow non-local stations to be temporarily heard. They are interested more in documenting that momentary catch than content. As a consequence broadcast stations and advertisers really have no commercial interest in assuring their signal reaches DXers.

Two very different questions. The first one has no answer, but is
lilkely quite small. The number of nighttime listeners is
porincipally their local audience and the counts are likely available
from Arbitron or the radio station in question.

>

The real question is whether radio stations really care about geting
an inconsistent signal to non-local listeners on nighttime AM. The
inability to provide a consistent signal coupled with advertising that
is usually local in nature would seem to indicate that non-local
listeners are not much of a concern to AM stations.

Sounds complicated. History shows consumers don't like complicated
things (like how to program the blinking clock on their VCRs).

Terrestrial radio offers the ease of just "turning the knob". That's
it. Even a mental midget can do it.

Note that plumbers, motorcycle mechanics, cabinetmakers,
etc. are the kinds of jobs that cannot be "outsourced" to
foreign shores. Just one of the advantages of doing "real"
(physical) work vs. virtual (mental) work. :-)

There's likely an instructional video on Youtube on how to
solder. OTOH, with the prevalence of SMD, horse-shoeing
may be a more practical skill. :-)

Democratic Voice of Burma invites video messages of support
September 30th, 2007 - 12:41 UTC by Andy

The Democratic Voice of Burma (DVB) says it welcomes videos and pictures bearing messages for the people of Burma, to be shown on DVB TV. You can upload a file via the DVB website, or e-mail it as an attachment. The files will be screened and edited by DVB. Further details are on this page.

Various reports this morning also talk of long queues of people in Yangon (Rangoon) waiting to buy shortwave radios. One dealer is quoted as saying that he sold out of shortwave sets almost as soon as they arrived.

Go to the Wildblue or Hughesnet web sites. You'll find they offer 128kbit or
higher upload rates.

Since the two primary providers of satellite internet service in the US do not use phone lines for the uplink, all of their customers must be paying the big bucks. (While their service isn't cheap, they have no phone uplink option.)

Actually using a phone line would reduce the latency issues relative to a satellite uplink.

This is another area where you don't know what you are talking about.

No, it's not. "Free-over-the-air" is just that...FREE OVER THE AIR.
If you watch
TV on cable or listen to radio stations online, you PAY a monthly FEE.
So, it's NOT free.
Over the air broadcasts are FREE when you grab the signal on the air
with an antenna
and WITHOUT the monthly cable/internet fee. That's free over the air.
Cable and internet
are NOT free.

Just in case you didn't know, satellite is not free either. You pay
the provider a monthly
fee to access their service.

The whole idea of HD radio is ridiculous.

Because of this arrogance, terrestrial radio will be obsolete within

Operating in the public interest is fine, but targeting an audience
hundreds of miles away that an advertiser would have little hope of
selling his product to makes no business sense at all. And radio
stations are businesses that attempt to be profitable.

Indeed if local audiences decide that internet, satellite, HD and
cable are more reliable ways to obtain information and entertainment
it may not take that long. But my guess is that radio stations will
continue to target and broadcast to local audiences. They will also
continue to not targer dxers and other out-of-area audiences.

This is where you sell national products. People buy Coke, Pepsi, STP,
Quaker State (and Quaker Oats) everywhere. Most nighttime radio has long
been such spots (as has network radio always been).

I have received it well in Phoenix, Sacramento and Las Vegas and all

Actually I just had my ears tested, and I still have high frequency response up to 18,000 hertz. I doubt a man of your advance age (somewhere around 55?), can say the same.

If you bothered to TRY those stations, instead of being a close-minded old grandpa, you'd probably be surprised how good they sound.

Oh well.

That's a fair assessment. I find it comparable to the constant
background "hiss" that plagues FM.

I guess it's a good thing AM-HD stations broadcast at 40 kbps then.

DX listening is not necessarily done by DXers. DXers provided the
engineering departments with valuable feedback (and the occasional ego
boost). DX listeners are people who are forced to listen to
out-of-market stations because nothing local suits them.

False. Go look it up on wikipedia, and you will see a link to an email from the HD Alliance. That email confirms that HD means Hybrid Digital.

(1) Wikipedia states it is AAC.

(2) Even if wiki is wrong, you find that SBR codecs are the most-advanced. Take MP3pro for example, which is essentially MP3 + SBR. It routinely ties with AAC+SBR in listening tests.

(3) iBiquity has already stated it is "based on MPEG4", the most-advanced standard currently available for audio compression.

So to summarize: We know definitely that it's MPEG4 with SBR. We know wikipedia states it is based upon AAC. It's safe to make an educated guess that HDC == MPEG4 AAC+SBR, or a derivation thereof.

Radio stations are supposed to operate in the public interest. If
people like Dwardo had their way all radio would cease transmitting at
7 PM because the advertising drops below the breakeven level. All 50
kW stations would cut their power by 3 dB to save money on electric
bills and all would run syndicated talk radio because those ASCAP fees
cut into the bottom line and it's much cheaper to pay a hatemonger.

arbitron only list 6am to midnight. There's no breakdown available
for nighttime hours, at least none that I can see.

Yes the *majority* public interest, not the micro-minority that numbers 0.01% of the populace. The FCC is under no obligation to serve a micro-minority's interest.

And yes it is a micro-minority.

It's not the 50s anymore..... today's population of teens and young adults are listening to the *internet* for their Distance radio, not SW or AM skywave. The FCC is hear to serve THEM - the majority - and their wish to have more variety, more choices, more eclectic music styles (like "indie rock" on 98ROCK-HD 3).

The FCC is serving the majority's wishes, not the 0.01% micro-minority.

> people like Dwardo had their way all radio would cease transmitting at

I admit it. If I had my way, AM stations would be forbidden to broadcast further than 100 miles. Only 2 or 3 "superstations" like WGN or WTBS or WOR would be allowed to do national-wide AM. Thus cleaning-up the air.

Alternatively:

I would forbid Digital broadcast at night, and propose to the FCC board that AM analog be terminated in 2015. (Same as the UK and Germany are planning to do.) At that time AM-HD would take over during night broadcasts.

Hence the need for 3 or 4 channels/station on FM, to provide listeners
with more variety locally. That's what digital radio enables.

True you do pay $5 or $6 to get local channels. But that doesn't
change the fact that these are still Over-The-Air stations. You can
unplug the cable & still watch them via antenna.

As for online: I don't pay anything to access radio stations. I'm
listening to Radio Disney right now... that didn't cost me a dime.
The website radiodisney.com doesn't charge money to listen.

Neither does radioaol.com
Or shoutcast.com
It's free.

Very few commute from LA County to Ventura, so it would not affect LA
ratings; the percentage of Ventura County residents is also probably so low
as to be statistically insignificant. My guess is that, given the amount of
time in the shadow of the mountains vs. total time used with radio by the
average listener is that this has no impact at all on either the LA book or
the Ventura County one.

It doesn't say that. It says: "In 1980, the FCC voted to limit the
protection for the twenty-five clear channel stations to a 750 mile
radius around the transmitter."

It says NOTHING about clearchannels *having* to send out that far.

Yes, this is true.. interference is lower outside the metros, so less strong signals are usable. The real thing is that 60% of the US populaiton is in the top 50 metros, and by the time you get to the 300th rated market, you have coverage of over 85% of the US. Most of these areas haved high noise levels caused by electric lines, computers, etc., that did not exist a few decades ago (in the case of line noise, electric companies actually cared in the past, now they laugh at interference complaints).

The data I have shows what, in the home and at work (Arbitron provides ZIP data for each) people listen to, and by elimination, what they don't listen to. The fact is, they do not listen to lesser signals. We have the data, compiled from review of what amounts to millions of listening incidents over more than a decade and the software to map the listening. The listening is concentrated within very tight contours.

You know what I meant: the Arbiytron diarykeeper logs all listening and all
that listening is processed.

> Statistics are crap. They are not, and really can never be, accurate.

They are accurate within a margin of error that is easily calculated, and is
small enough for advertisers to spend $21 billion on radio this year.

Statistics is a science, and it has the unique quality that "error" is not a
dirty word. Speaking of samples, when you last had a blood test, did they
take all your blood, or just a small percentage? They took a sample, as they
know that it would faithfully represent all the rest of your blood. This is
exactly what a good poll does; a good sample can be tested, as Arbitron has
done, by a replication study where the same thing is done twice to see if
the reuslts are the same... and they are.

That is not how you test a poll. It is done by a replication study. You do a
sample, then repeat it. If you get identical results, the sample size and
procedure is valid.

I know I just bought me a Pioneer laserdisc player that blows PS fuses, Pioneer DVD/CD 5-disc carousel and Wednesday a Sony CRT projector then a replacement board and maybe the case, $50 and then some and a Sony ST-80F tuner (the stand up kind with a round dial).

SFTV,

None of which is required for the RRS Newsgroup.

Just turn on an AM/MW Radio or a Shortwave Radio
and Listen to it.

Buy a AM & FM Shortwave Radio - Listen To It !

Buy / Build a Shortwave Antenna and/or AM/MW Loop Antenna
and Use It !

Become and "Avid" AM/MW and Shortwave Radio Listener (SWL) !

-Or- Become an Amateur {Ham} Radio Operator.

The name of the Newsgroup is : Rec.Radio.Shortwave
It's about the Hobby of Shortwave Radio Listening (SWL)
and Broadcast Radio Listening (BCL) both of which are
Free and Over-the-Air.

-IF- You are 'interested' in Internet Radio WiFi Radio etc
There is the : Alt.Internet.Radio Newsgroup.
http://groups.google.com/group/alt.internet.radio/

Also there are Newsgroups Focused on IBOC "HD" AM/FM Radio
http://groups.google.com/group/rec.radio.shortwave/msg/6bb362877f49b42a

I think the only AM's that should be allowed to run IBOC should be
limited to a nite time power limit of 1000 watts or less!
No way should a 50,000 watt AM be allowed to run IBOC at night.

1000 watts goes coast to coast. You just don't notice it because
there's a thousand other 1000 watt stations on at the same time, and
you're hearing them all at once.

Never happen - radio will always stay analog, as digital radio has
stalled in Canada and the US and interest is slowing in the UK.

I'm 51 and have lived in the Bay Area all my life. I studied
Broadcasting at CSM back in the 70's, when they still had a hands on
program with Dan Odum. KCSM was on channel 14 and still in Black and
White. KCSM-TV had the ability to go color, at least on a part time
basis, but they purposely stayed in Black and White to give the
illusion of broadcast poverty, in order to help secure a grant to
increase power and to change frequencies to channel 60. The plan
worked remarkably well. They got everything they wanted, but the
students ended up getting shafted. Luckly that happened after I
graduated!

10 or 20 or 40 or more 1000 Watt AM/MW Radio Stations
all on the same Frequency at Night Broadcasting in IBOC
from Coast-to-Coast - OH THE DIGITAL HASH !

Add in the Upper and Lower Adjacent Channels and
Every One of their IBOC Broadcasters
NOW YOU HAVE MEGA DIGITAL HASH NOISE

I suspect that you will find that almost every phoneline in the USA
has DSL for
at least part of circuits. While doing some RFI detection work I was
amazed
at how noisy they have become in the last 2 years.

And if the area has BPL, given the fact that phonelines run parallel,
for the most part,
with adjacent power lines, the RFI level will be very high.

When I was a kid I had a crystal radio that I hooked to the finger
hook on the dial.

Sadly those days of RF quietness are gone.

I have a better receiver then I dreamed existed in 1970.

Sadly the RFI level is also higher then I could have imaged in 1970.

A quick survey of the all of the electronic "toys" that are a "must have"
for life in the modern world will show the bulk of them use switch mode power supplies, that are built with cost in mind and not adherence
to RF noise specifications. Most people have no idea just how bad a device can be and still meet the FCC regs for Class B, or home/ residential
operation.

I suspect the average SWL will have to use a dedicated antenna that is placed as far from the home and utility services as practical.

Well I hope your wrong. I'm really enjoying these extra channels.
For example, my local FM station has just added a "Remix Top40"
channel which is basically all the current hits, but in a dance
format.

Cool.

And my Christain station has added "Gospel" on HD2 and "CCM for Teens"
on HD3.

Cool.

And my Rock station has added "Classic (60s-70s)" and "Indie Rock" to
its HD2 and HD3.

Cool.

This is what digital radio is all about: Increasing the number of
choices available to listeners. How can you possibly sit there and
say this is a bad idea for FM Radio?!?!?

BBCR4 has two Real Audio streams (LW and FM) and the program should be available on demand from http://www.bbc.co.uk/radio4 for a week after the broadcast. It might even be available on podcast, although this might have some censored out music,

Where did you get this allocation?

Every chart I have seen give the RA allocation as 13.36 - 13.41 MHz.

A friend of ours did her PHD work in the 13.36 - 13.41 MHz band.

I use it to compare noise levels with the adjacent ISM band,
13.553-13.567 MHz.
RFID tags are starting to show up and the noise level on the
13.553-13.567 MHz
band is creeping up every week or so.

Advertisers are not interested in anybody older than 35. Their proclaimed reason: People over 35 are "set in their ways" and no amount of advertising is going to make them switch brands. For example, if you've used Crest for the last twenty years, no number of ads is going to make you switch to Colgate.

BUT:

The young teens and adults are "undecided". They have no brand loyalty, and those are the people advertisers want to target. 35 and under.

Thus national AM with its over 45 crowd is extremely UNattractive to advertisers.

Actually, it records 0.0 shares based on perhaps one diary mention; the data
is there but all it shows is that in a statistical sample, there is next to
nothing for that particular station. 0 times 0 is 0.

A 50 kw AM runs 500 watts of HD digital signal.

There is data for every hour of the day, but licensed only for use by
Arbitron subscribers. It takes a couple of clicks to get a Midnight to 6 AM
ranker or table. In fact, many stations in large metros with lots of shift
workers consider the prime morning drive time to begin at 5 AM, and they do
a 5 AM to 10 AM drive time table for sales.

Who said talk stations do not pay ASCAP, BMI and SESAC. They do. Music in
bumpers, commercials, etc., also has to be licensed.

I really hate one format shows. I go through the cable TV music channels
and find them terribly boring, and allthough I like a minimum amount
of DJ's, a DJ is very necessary.

That is just not how radio is sold. Local radio is sold for the local metro,
and you get no greater rate because you have more extensive coverage.

The accounts you mention don't buy night radio, anyway. Most of them do not
buy the ages that AM radio attracts. One of them does not buy radio at all.

Networks are a device to collect in one buy stations in many markets, and
the audience estimates are compiled from the ratings of the individual
stations. Networks are used in radio to provide content a station wants for
"free" to the station; the station gives part of the time, which the network
resells in a package, usually at a rate lower than the sum of the rates of
each station. That way the network gets revenue, and the station does not
have hard cash costs... this is similar to the model for network TV, too.

Only one network show I know of, Rush, requires in some markets an amount of
cash as well as inventory (but there may be a few others). The syndication
model, similar to network, was invented by the folks who created American
Top 40... principally Tom Rounds... around 1970. The show was generally free
to the station, or had a small payment for hard costs, and the station ran
the program's spots, which provided Watermark with its profits. One show,

the famous or infamous one created by Art Bell, required most of the barter spots to be run in the daytime, except for a few that had an appeal to overnight listeners specifically, such as the "consumer DX radios" they often peddle.

Subscribers in each of the roughly 300 rated markets can see the Midnight to
6 AM audiences in the software application we get to view ratings. One can
also, of course, see 7 PM to Midnight or any individual hour by age, sex,
ethnicity and even county or ZIP code cluster. If a station has audience in
an adjacent market, or even a distant one, they would have to subscribe to
the other market reports... which given the cost vs. no benefits, they
seldom do.

Actually, 35-to-54 is a key if not total part of most campaigns. Nearly all
ad agency business is bought against 18-54 or some subset, like Assimilated
Hispanic Women between 25 and 44.

"HD Hypocrisy"

"Here's a few more reasons why only iBiquity and a few clueless radio
group heads could make a big thing out of HD radio tagging... The very
damn radio stations that broadcast in HD offer no programming worth

one sane would listen to -- let alone spend money for new radios --

The economic model of radio, that which allows all but a handful of AMs to operate, is based on selling sets of ears to advertisers. If it is not possible to get lots of ears in a particular area, such as the fringe extremes of daytime coverage or via skywave at night, then there is no way to create value for an advertiser.

Only with ad support can stations provide any kind of quality programming. You only get ad support if there are listeners.

A "share" is actually directly translatable into a finite number of people, so "shares" are people, listeners, humans. That is because it is a percentage of the total number of people listening to radio in a given time period. Every share level in each market translates into a specific number of listeners or a ratings number. Share = people listening = rating. Three ways to express the same number, based on individual people listening.

Without this data, there would be no way to price advertising, and radio would have a totally different sales model.

IBOC will never work on the AM band, and HD-FM will fail from lack of

Hi,

What is the difference between multiple input multiple output (MIMO)
system and
Adaptive antenna system (AAS) ?

I find the WiMAX uses MIMO and AAS . But, the definition appears to be
the same.

Both the systems are exploiting more than one antenna to improve the
coverage and the system capacity.

I wonder why different naming convention for the same system !! :(:(
Is there any significant features/differences in MIMO and AAS ?

Hi,

I got some info from internet.
There are differences between MIMO and AAS Antenna Technologies:):)

It appears that cost-effectiveness comes in terms of the antenna and
MIMO (Multiple Input, Multiple Output) and AAS (Adaptive Antenna
System) are
competitors.

MIMO delivers the same coverage as AAS

MIMO delivers higher capacity than AAS

MIMO is lower in complexity and cost than AAS

MIMO is more scalable than AAS. MIMO is more predictable in
performance
and can grow through additional sectors and/or additional antennas

MIMO works well in all environments (rural, suburban, urban),
switching modes to deliver users the best experience.

MIMO outperforms AAS for mobile applications: MIMO maintains
performance at speed and provides a predictable environment for easier
and

more reliable hand-offs.

MIMO is the basis for all 4G plans- widespread investment in
developing
MIMO technologies will ensure advantages are maintained.

So, it looks like in all aspects, MIMO is equal to or superior to AAS

In the RFI/EMI world the maximum length
of grounding conductors has been found
to be 1/20 of a wavelength. Conductors
longer then 1/20 of a wavelength become
effective unintentional radiators. It is true
that we consider a 1/4 wavelength to be
the most effective and desirable length.
But significant radiation does occur from
even cables as short as 1/20 WL.

A 1/4 wavelength long ground wire is the WORST possible length. A 1/4 wavelength line acts as an impedance inverter (just as in transmission line). So the low Z at the ground rod gets transformed to a hi Z at the radio- making the ground totally ineffective.

No..

MIMO uses the fact that if you have multiple receivers and transmitters
at each end of the link, the properties of the paths are uncorrelated to
some degree, so you can spread your data across the multiple paths,
reducing the bit rate on any one path. One use would be to use some sort
of FEC coding, transmitting multiple bits for each data bit to achieve a
lower overall bit error rate (after coding/decoding).

AAS is more like adaptive beamforming

In the limit, they are similar.

10 to 15 years ago there weren't Web-based forums. In fact, 15 years ago there wasn't a Web as we know it. Google Groups may have been the salvation of Usenet.

Actually, someone operating a for-profit news server could build some market share by touting the uncensored nature of Usenet. They could sell access and news clients for those people who don't have them.

An engineering system solution is not always about one component cost.

If AAS is boresight along a transportation corridor, this is no longer

Recently I had an expensive Nikon camera damaged by being knocked off a table to a concrete floor. Had I not had an extended warranty policy (read: insurance) the repairs would have cost me almost half of what the camera cost, because they had to send to Japan for major repair parts to rebuild it. As it was, what I paid for the policy was far less than the repair would have cost.

Similarly, I had a hard disk die a few days after the extended warranty period expired, and CompUSA was good enough to "stretch" the expiration date and give me a new one at no cost. The cost of the extended warranty was about 25% of the cost of a new one. That's the major reason why I buy my components at CompUSA if they carry them.

I believe in extended warranties.

OTOH, the view from Usenet is that Google Groups may be the
death of Usenet. In much the same way as AOL was a great blow
to the internet. i.e. suddenly foisting thousands of illiterate users
onto the service and significantly raising the level of chaos.

Yes, people have been doing this for years and they have a large
and growing customer base. Many smaller ISPs outsource NNTP
service to large commercial providers such as Supernews, et.al.

Google Groups user interface is so desperately bad, I don't see
how anybody can tolerate it. The real thing, even with a lowest-
common-denominator newsreader like Outlook Express is so
much faster, more direct, more convenient, more efficient, it isn't
even a close comparison.

iNiquity wants to piggy-back on the gullible public's awareness that
HDTV means "high definition TV".

We b/c engineers know that HD Radio means High Distortion Radio.

And people who *rely* on the internet are in for a rude
awakening. I think it is foolish to rely on the internet for
your primary telephone service, for example.

The internet is fine as long as everything is running
properly, just as cell phones are great in a personal
emergency. But in the case of a large-scale disaster
(hurricane, flood, earthquake, etc.), neither cell phone
service nor the internet will be of much use to anyone.
That's why there is still terrestrial broadcasting and
Amateur Radio communications, etc.

We're already seeing people give up VOIP as unreliable
whenever the internet hiccups.

Internet streaming gives them buffer delays, choppy delivery, audio bit rate reduction, small, pixelated images, audio/video sync slippage. If millions tried to watch the same live internet video "broadcast" even at NTSC quality (forget HD), the system would collapse.

Internet streaming is equivalent to radio broadcasting in the 1930s or television in the 1950s in terms of quality and reliability. Perhaps given another 10 or 20 years, Internet technology may arrive at the level of reliability and ease of use that traditional radio and television broadcasting has today. It will probably be wireless, too.

That isn't the point of DX-ing. If you never tried tuning in a distant radio station on an AM or short-wave radio, you're probably not going to understand what they're talking about. There was something exciting about receiving a radio station from another state, or another country, that is difficult to describe. Perhaps DX-ing is something from a bygone era. But whatever it is you're doing on the World Wide Web is not "DX-ing". It is simply the internet working properly.

>> Listening to it on the internet is like shooting fish in a
>> barrel.

> Yeah, nothing like making something *easy* so more people can do it!
> How dare they!?!

They can and they should. But calling it "DX-ing" is a misnomer. DX-ing is the hobby of tweaking your analog receiver and antenna to receive distant radio stations, patiently waiting for the right conditions, and collecting enough program information to write a reception report, and then receiving a card or letter from the station confirming your report. Typing in a URL and hearing the audio feed of a station over the internet is called "surfing".

Well, I don't spend a whole lot of time monitoring those frequencies.
I've just gotten into the habit of checking 4051 khz because I hear
the same two guys every night. They're usually talking about their
boats, whether they're catching anything, what so-and-so did with his
boat, etc. Sometimes I wish I was out there with 'em.

Guess it isn't enough that working folks have most their paychecks stolen from them via taxation to pay for the elderly parasites on the outside collecting social security, medicare, etc.

Do the world a favor and die already you worthless assholes.

Prisons face growing population of elderly inmates

Sunday, September 30, 2007
By SHANNON McCAFFREY ~ The Associated Press

Inmate Vicki Steele, 58, climbed into her bunk in the cell she shares with two others May 22 at Metro State Prison in Atlanta. Steele is serving a life sentence at Metro State Prison in Atlanta for murdering her best friend's husband. She suffers from lupus. The state has also paid for cataract surgery on both of her eyes and surgery on her ankle and foot.

HARDWICK, Ga. -- Razor wire topping the fences seems almost a joke at the Men's State Prison, where many inmates are slumped in wheelchairs, or leaning on walkers or canes.

It's becoming an increasingly common sight: geriatric inmates spending their waning days behind bars. The soaring number of aging inmates is now outpacing the prison growth as a whole.

Tough sentencing laws passed in the crime-busting 1980s and 1990s are largely to blame. It's all fueling an explosion in inmate health costs for cash-strapped states.

"It keeps going up and up," said Alan Adams, director of Health Services for the Georgia Department of Corrections. "We've got some old guys who are too sick to get out of bed. And some of them, they're going to die inside. The courts say we have to provide care and we do. But that costs money."

Justice Department statistics show that the number of inmates age 55 and older in federal and state prisons shot up 33 percent from 2000 to 2005, the most recent year for which the data was available. That's faster than the 9 percent growth overall.

The trend is particularly pronounced in the South, which has some of the nation's toughest sentencing laws. In 16 Southern states, the growth rate has escalated by an average of 145 percent since 1997, according to the Southern Legislative Conference.

Rising prison health care costs -- particularly for elderly inmates -- helped fuel a 10 percent jump in state prison spending from fiscal

year 2005 to 2006, according to the National Conference of State Legislatures.

The graying of the nation's prisons mirrors the population as whole. But many inmates arrive in prison after years of unhealthy living, such as drug use and risky sex.

And once they enter prison walls, they aren't eligible for Medicaid or Medicare, where the costs are shared between the state and federal government, meaning a state shoulders the burden of inmate health care on its own.

Estimates place the annual cost of housing an inmate at $18,000 to $31,000 a year. There is no firm separate number for housing an elderly inmate, but there is widespread agreement that it's significantly higher than for a younger one.

In addition to medical costs there are other, less obvious expenses. For instance, elderly inmates can't climb to the top bunk so they sometimes need to be housed in separate units that require more space.

State lawmakers have been reluctant to tinker with the tough laws that are keeping more people in prison for longer sentences. Reacting to violent crime waves in the 1980s and 1990s, state lawmakers passed two- and three-strikes laws and abolished parole.

- The economic model of radio, that which allows all but a handful
- of AMs to operate, is based on selling sets of ears to advertisers.
- If it is not possible to get lots of ears in a particular area, such
as
- the fringe extremes of daytime coverage or via skywave at night,
- then there is no way to create value for an advertiser.
-
- Only with ad support can stations provide any kind of quality
- programming. You only get ad support if there are listeners.
-
- A "share" is actually directly translatable into a finite number
- of people, so "shares" are people, listeners, humans. That is
- because it is a percentage of the total number of people listening
- to radio in a given time period. Every share level in each market
- translates into a specific number of listeners or a ratings number.
- Share = people listening = rating. Three ways to express the
- same number, based on individual people listening.
-
- Without this data, there would be no way to price advertising,
- and radio would have a totally different sales model.

You have to pay for the worthless parasites inside or out of the joint.

LOS ANGELES -- An 89-year-old man whose car hurtled through a farmers market, killing 10 people, was let off on probation Monday by a judge who said he believed the defendant deserved to go prison but was too ill.

George Russell Weller was convicted Oct. 20 of 10 counts of vehicular manslaughter with gross negligence in a case that renewed debate over whether elderly people should lose their driver's licenses.

Weller, confined to a sickbed, was not in court for his sentencing.

Superior Court Judge Michael Johnson said he agreed with the jury and called Weller's actions callous and showing "an enormous indifference to human life."

Weller was 86 when his 1992 Buick Le Sabre plowed at freeway speed into the crowded farmers market on July 16, 2003. In addition to the 10 killed, more than 70 people were injured.

Weller could have received up to 18 years in prison, but the judge said Weller's health problems, including severe heart disease, would make him a burden on prison authorities and taxpayers, and that imprisonment would most likely kill Weller.

Defense attorneys argued that Weller was a victim of "pedal error" in which he panicked and mistook the car's accelerator for the brake. Prosecutors said he was careless to the point of criminal negligence.

The judge noted that Weller had enough control of his vehicle to avoid cars and trucks within the farmers market.

The judge also called Weller's apologies hollow.

True, the websites (most of them) do not charge to listen to the
stream...BUT you still PAY
for your internet connection, therefore you pay for listening online.
Do you agree?
You turn on the radio and voila'...a signal off the air for no charge.

In my experience, Shoutcast streams are alot of individuals own music
collections...and some
so-called "internet radio stations" so that doesn't qualify as real
radio as they are not broadcasting,
they are streaming. It's just not real radio.

Also, where do you get local channels for five or six dollars? Last I
knew, cable was much more than
that and included more than just local channels. Unless of course,
you're confused and thinking of
a PAY satellite dish service where you can add a few more dollars and
get your local broadcast stations.

I would also like to address the person who commented about ham
radio's HF being obsolete technology.
As a ham operator, the internet has not made HF obsolete. Tell that

to the people who live on islands when tropical storms hit...or others in areas where natural disasters have occurred. They can't just log on and send a
message....no power, no phone, no internet. Sorry pally, but AIM, AOL IM and Yahoo don't work
without it. They use HF radio to get the information out. Ham radio will always be around, even if some
people don't realize it's value.

Thank you Richard! Excellent to see that someone else gets it!
I have an HF rig and a VHF rig to go along with my landline and
cell phone. I also live in a hurricane prone area that has been hit
several times during the course of my lifetime. My amateur radios
will be there for me when the ultra-cool cell phone with camera,

cell phones, are conveniences for some and tools for others. They
are not to be relied on for such things.

I suppose the government can attempt to ban whatever it wants, whatever year it wants, but here's an idea: Why not let the consumers decide? I like to vote with my dollars and sense [sic].

No, this one is a Klingon plot. But still, resistance is futile.

Sure there were. I was using web based forums at least as far back as 1983,
with my Commodore 64 and a 300 baud acoustic modem (even the crude graphics
of the era took forever to load. The bad old days of CompuSlave et al when
net time was charged by the minute (about two dollars IIRC). Even then, the
forums were very popular, taking over the job that was mostly done by BBS's.

The shame of it is that the media companies that own the AM stations don't really know who listens and from where. So much for interesting and expanding program base.

So much for the Clear Channel concept which would be very useful in the case of REAL NATIONAL EMERGENCY. Considering that most of the AM superstations can cover at least half the country if not more, I wonder what they will do if TSHTF.

I'm certainly not waiting for it or hoping but you know, I find it ironic that they are going to shit can AM clear channel broadcasting. Especially in the light of Hurricane Katrina and every other disaster that has hit the country over the years. I wonder if these useless bastards have ever considered the national emergency scenario.

Like the case in New Orleans where some of the best information transfers and information clearinghouse came from WWL 870. Which to Mr. Dwardo can be heard over a great deal of the country. I'm sure that doesn't matter as profits reign over the consumer or people in general.

Interestingly, they use statistics that say that their listenership base is this or that. However, I wonder if they really know how many outside of the major metros listen to night time AM. I don't care what some so called book of statistics says because statistics can say anything you want it to.

However, I find it blatantly stupid to sabotage one of the greatest means of long distance communication we have in this nation which is the clear channel broadcasting system.

I guess it helps the media conglomerates and the government in that they can centalize information further. That way if TSHTF no one knows when the satellite dishes take a hit from Chinese space missiles or some other country using an EMP device.

Sorry hun, but that's NOT the world wide web (which is based-upon multiple servers & using Hypertext Markup Language & active point-n-click links). What we used on the old commodore 64 was a SINGLE server called a BBS, and it didn't use hypertext, or a mouse.. It was just plain-jane text. (Yes even on the C64, it was text.... but it was drawn to look like pictures.)

That's what Usenet is - all text
It's like visiting an old BBS.

The world wide web was not invented until circa 1993, and did not "boom" until around 1995 (with Windows and Mac-based Mosaic & Netscape). And thus was born web-based forums which slowly but surely drew people away from the "boring" Usenet.

> (even the crude graphics of the era took forever to load)

Yeah. There's a huge difference between 56k and 0.3k. It used to take me an hour to download a 170 kilobyte floppy. Now I do it in about 5 seconds.

I suspect if you took this poll in a "hip" group like rec.arts.tv or
alt.tv.smallville, you'd find a lot of young people. It would still
skew older, but there'd also be lots of teens and 20-somethings in the

I wonder what the people will do for information if the worst case scenario happens and we have to rely on the FM broadcast network which is laughable at best. I guess after getting slammed by terrorists, we can all find a talk show or some blatantly stupid program to listen to instead of things that really matter like the safety of our country. It is about like the 2003 power outage in NY and a lot of the Eastern parts of the country. I wonder if Dwardo has a plan if something like that happens on a larger scale. I'm sure all those set top satellite boxes, TVs, and all will be usable in a power outage of any magnitude.

I guess when we burn those bridges to analog AM clear channel broadcasting, we can rely on the HD Radio to carry us through. I hope it never happens but with the state of the world these days, it would be best to be prepared. Not to mention keeping an SW radio around with batteries, solar power, etc. You just don't know. But I am sure that Frackelton has thought this out prior to his rah rah pronouncement of the greatness of HD Radio.

I think the best thing is to protest to the FCC about whole matter. As well
as writing your congressman and giving them a piece of your mind about the
destruction of the public airwaves by the HD Radio plotters. This is quite
intentional when you consider that they knew through testing and
experimentation what havoc it would cause. When you cannot listen to a night
time station 70 miles from you, you have problems especially at 50 kw such
as WABC.

And thus you make yourself sound like an idiot. Hardware design is
not computer science (aka programming). ------ Besides my title is
"Electrical Engineer". Always has been, no matter where I worked.

That sounds like a denigration of Penn State. They did teach me all
the basics, but not the advanced stuff (like synchronous AM reception
- whatever that is). To expect me to know that is unrealistic. And
not fair to the profs at Penn State. Every engineer has his or her
own specialty.

> I'm registered as a PE (Electrical) in four states... I am also

Wow. I'm impressed.

I passed the E.I.T. exam back in 1998, but never bothered to register
P.E. because I don't see any value in it. I'm still getting paid $55
an hour, and having a P.E. after my name is not going to drive that
Rate any higher.

Same with a Masters Degree. If I thought there was value in having
those, then I would go ahead and acquire them, but so far they've been
not necessary.

So how do you like law?

I was thinking about going back to earn a law degree (since I'm bored with engineering).

No, you're wrong. There was no Web in 1983. Usenet existed in 1983,
but the Web was not invented until 1990, and it was not practical
until Mosaic in 1992. I called attention specifically to the Web
because the growth of Web-based forums is the reason Usenet has fallen
into disuse.

Well there are exceptions to every rule, and your hyper-expensive
camera is that exception.

But in the case of a GE Refrigerator or a Sony stereo, an extended
warranty would be a waste. These items are so cheap & readily
available that, should they fail, you can easily take the ~$100 from
the "extended warranty" (which I the salesman told you not to buy),
and use it as downpayment to buy a new fridge or stereo.

The thing is: Most appliances DON'T fail. They follow a mortality
curve:

- HIGH - birth mortality (as a result of manufacturing flaws) -
covered for FREE by the manufacturer
- LOW - middle-of-life - virtually no failures.
- HIGH - geriatric mortality - around 15-20 years - the parts are old
& die - which is NOT covered by extended warranties, because these are
only 5-7 years in length.

The reason why Sears pushes salespeople to sell "extended warranties"
is because that's where the money's at. 99% of customers have no
problem whatsoever (or if they do, it's covered by the manufacturer's
FREE warranty, not sears), and thus Sears gets to pocket the money as
almost-100% profit. ----- Want to get rich? Sell insurance on
brand-new products, and make sure it expires at around 5 years, that
way you won't have to pay out, other than a few dollars here & there.

I bought an extended warranty for my Dodge Avenger. You know how many
times I used it?
- zero
- and when the Avenger eventually started failing (10 years), the

warranty was expired.
- and thus I wasted $700 for nothing.

I'll never do that again.

> Similarly, I had a hard disk die a few days after the extended
> warranty period expired, and CompUSA was good enough to "stretch" the
> expiration date and give me a new one at no cost.

Yeah. But. You probably could have bought a brand-new hard drive,
same size, for the same amount of $$$ or just slightly more expensive,
as the extended warranty cost.

I just bought a 300 gig drive for only $70. They are dirt cheap
Cheaper than buying the crummy service plan.

> I believe in extended warranties.

I don't. Everything I buy seems to last forever. If I bought
"extended warranties" I would just be wasting my money (see the
Avenger example), since I would never use them.

Just because we don't share the same opinion, does not mean one of us is idiotic. That premise is false Telemon. It could be that we are both 100% correct (with respect to targeting different interest groups). You are correct that AM is better for long-distance listening for old people.

And I am correct that young people want many, many more stations on the dial (they like variety).

We are both correct.

As long as people continue listening in their cars, radio will survive
because it's wireless. Did you miss this paragraph? "Radio isn't an
industry in need of a pep talk -- profit margins of 40 percent are not
uncommon at stations and listenership has held up well..."

Which is why the upgrade to Digital radio is so crucial. It provides
crystal-clear quality (HE-AAC sound) that people demand, while still
providing the reliability of broadcasting during severe weather.

Well then, your hobby is dead. Dead like horse-pulled carriages,
steam engines, and riverboat-shipping of cotton. It's not the job of
government to "freeze" progress..... things move on. Analog radio/tv
dies, and it gets replaced by localized digital broadcasts of a higher
quality than what existed previously.

Daytime can be heard because the sun limits propagation to <100
miles. But during the nighttime, then all the various stations from
~1000 miles away start overlapping one another.

Most television cable are buried under the ground. Thus they are
protected, and they will continue operating, and people will watch CNN
or FOX News or MSNBC.

Most americans wouldn't even think to get the old AM radio out (if
they even have an AM radio... my latest Ipod is FM only).

Yes I know what's music, thank you very much. I bet you were a lot
more open-minded when you were in your twenties. (And your parents
probably wondered why you listened to that Big Band and Jazz stuff,
and thought you had poor taste.)

Now you've turned into them.

Close-minded.

So NO you didn't bother to listen to the HE-AAC encodings, and have no clue how they sound. Thanks for clarifying that. ----- You should not judge something of which you've never heard. That's like saying "chocolate ice cream tastes bad" when you've never even tried any.

I bet you were a lot cooler person in your 20's. More open-minded. But now you've lost that - you've turned into a close-minded, arrogant, and rude man ("Troy has a tin ear").

What would your mother think if she saw how you talk to others?

Not this time cowboy. http://en.wikipedia.org/wiki/Internet

"
The first TCP/IP-wide area network was made operational by January 1, 1983
when all hosts on the ARPANET were switched over from the older NCP
protocols to TCP/IP. In 1985, the United States' National Science Foundation
(NSF) commissioned the construction of a university 56 kilobit/second
network backbone using computers called "fuzzballs" by their inventor, David
Mills. The following year, NSF sponsored the development of a higher speed
1.5 megabit/second backbone that become the NSFNet. A key decision to use
the DARPA TCP/IP protocols was made by Dennis Jennings, then in charge of
the Supercomputer program at NSF."

I personally don't think HD is any better anyway. From the radios I've
heard they have horrible drift and image rejection.

Digital Radio Mondiale *is* IBOC. (Like HD Radio, it sits right next-
door to the AM signal, widening the channel by a few more kilohertz)

Yeah it's false. The ratings show there are at least 20 channels with
near-identical numbers of listeners. That's more than a "few"

This isn't going to surprise anyone and it's certainly not going to
surprise Tardo and his buddies. I also doubt that it will bother them.
Their aim is to make a relatively short term profit and them 'dump'
whatever is left of terrestrial radio. Not only do theyexpect
terrestrial radio to end, they're planning on it and even taking steps
to insure it.

It's not that expensive. No more expensive than a mono to stereo
upgrade for an FM station.

Agreed. But the advantage of the HE-AAC codec is you don't need a
high bitrate to get FM quality. Only 24 is sufficient. At 64kbit/s
you get near-CD quality. It's a VERY efficient compression standard.

So a station could divide itself into 300 / 4 channels == 64-96 kbit/s
per channel, and still have quality ranging from near-CD to CD.

Because by the time the U.S. fixed on a standard (circa 1990), the AM Stereo stations had largely disappeared. Thus there's no impetus for customers to upgrade.

In contrast, Japan and Canada and Australia had a fixed standard in the early 80s, thus giving consumers confidence that they were not wasting money the next Betamax.

My "smalltime" low-profit Christian station seems to be doing alright. They happily embraced the new technology, streaming out 3 separate programs.

You remind me of Sony trying to hock their PS3 Boondoggle. "Yeah it costs $700, but it's got outstanding technology! And it can play Blu-ray movies too! And cook your breakfast! People will WANT to work overtime to buy this thing."

Promises, promises.

But the PS3 is still in third place (behind Xbox360 and Nintendo) & losing a lot of money & driving down Sony's stock. You can have the best "gadget" in the world, but it doesn't matter if the consumer doesn't want it.

Bzzz.

We're not discussing the internet (which has been around a long, long
time). We're discussing the World Wide Web, which sits inside
browsers called Mosaic, Netscape, Explorer, Firefox, Safari, et
al..... and uses hyperlinks to jump from one server to another server.

THAT was not invented until circa 1992, and did not "boom" until
around 1995 when Mosaic/Netscape hit Windows and Macintosh machines,
and lots of users started experimenting with it for the first time.

The WWW did not exist in the 1980s.
We've told you this several times.
Please try to listen.

If you still are not convinced, try to imagine stepping into a time
machine, and carrying your modern-day PC back to 1990, and signing-up
with an Internet Provider. Would your web browser work?

No.

It absolutely would not work, because web-servers did not exist back
then. The WWW had not been invented yet.

That's TCP/IP. Hate to side with these guys, but they're right this
time. The World Wide Web and HTTP were invented in 1990 by Tim
Berners-Lee.

Digital Radio Mondiale is also IBOC. (Designed to operate in analog/
digital mode for shortwave and AM, and soon FM.)

Do you hate DR Mondiale too?

Thank you for the kind complement! They were some of the most

You're just a technophobe who still, after all these years, can't come to terms with the internet and what it means. There are already thousands of internet stations streaming audio, and there already millions of people listening to them. This isn't something that's going to happen tomorrow. It's happening right now, under your nose and apparently to your displeasure. As soon as Wimax is deployed--and there's no doubt whatsoever that this will happen--it's all over. You can deny the advance of technology and you can deny the inevitable, but your denials won't make one whit of difference.

"Higher quality" is debatable on both technical and
content basis. But maybe I'm just an old fuddy-duddy.
I have yet to see anything digitally encoded and compressed
for broadcast that looked as good as regular NTSC on
the shading monitor.

And every season the "entertainment value" of the schedule
takes a quantum drop. Leaves more time for reading. And
if the "progressives" win next year, they will likely return radio
to the bad old days of government control of content. :-(

Yes - all forms of digital radio are a farce with poor reception, poor sound quality, and extra channels which are garbage and no value to consumers.

For FM, it is about 30 to 50 times more expensive than a mono to stereo
upgrade; for AM it can be over $100 k if retuning the towers and modifying a
phasor is required.

Shift workers are those working in factories or businesses where there are
multiple shifts. One shift goes off as another comes on. In industrial
processes, shifts in LA at least tend to be 6-2, 2-10 and 10 to 6.

There is nothing in part 73 of the rules about different service
requirements for clear channel stations, In fact, they must conform to local
ascertainment and interests requirements just like a 1 kw graveyarder.

The article is very wrong on a number of things: many of the cities of
license are wrong, like XEEP and XEB, for example (Both Mexico, DF, Mexico)
and Clear Channel, the company, was not formed to buy a clear channel
station... that was a later acquisition, and the com�pany then changed name
to match it... the first one was an FM, in fact. They only bought WOAI when
they had the money to take on the losses of WOAI, which was in dire straits
then.

The service defined here is referent to signal, not programming. There is no
requirement to serve skywave listeners, or listeners in a secondary contour,
however it is defined.

Usenet?

There were other networks of BBSs in those days.

There was no pracical, widely usable web in the 1980s.

This is typical of histories of the web:

http://www.w3.org/History.html

From it, the web seems to date back to the early 1990s, maybe 1992 or 1993.

Been there, done that.

The trouble with local BBSs was the lack of traffic.

There were national and regional BBSs like ExecPC that addressed that
problem.

Yeah, reliable until the system gets jammed with too many people
trying to call into or out of the area. Then you're out of luck!

Compared to what it costs a radio station to stream audio over the
internet, the cost of HD is astronomical.

they have a higher obligation to serve the people who grant them a

That's exactly what it says. And it calls it secondary SERVICE. That

I was listening to Paul Gallo's Radio talk show this morning.
www.supertalkms.com A little part of Paul's radio show, Keith A. Baca
was on there talking about his new book, Native American Place Names in
Mississsippi.(I have to have that book, that's all there is to it, I
have to have it) www.devilfinder.com Native American Place

If I had been listening (DXing) to a radio station hundreds of miles
away, would I have heard about that book? (and Hog

I thought I've heard every possible claim about the Arbitron numbers here,
but this is the first time I've heard that a 5.8 share is nearly identical
to a 1.9 share.

And that supports your arguement as well as it can be supported.

It's all a matter of semantics, I suppose. What do words such as many, top
rated, bottom rated and few mean?

By the way, Chicago's a big market. At least a few stations didn't make the
list. And those stations really do have "near identical numbers".

The main channel is still analog and the digital channels require extra
power.

Anyway, I think most radio stations have far bigger expenses than thier
electric bill.

Sure it is. And if a station wants IBOC hardware, it's paying ibiquity's
price.

And that station would risk dividing it's listeners across four channels.
That's OK for the listeners, but what's in it for the station?

There sure hasn't been alot of impetus to upgrade to AM stereo. By the way,
there's even less impetus to own radios which cover the European/Asian AM-FM
channel spacing and the Japanese FM band. But such radios are commonly sold
in the US. I even have a couple of them.

It's curious that so few of those "droves" of AM stereo radios make it over
here.

It's simple. If the audience the advertisers want was spread too thin
across too many channels to be profitable, the IBOC broadcasters have the
option of selling their product directly with subscription radio.

Of course, the subscription version of IBOC won't be called HD radio
because, as we've all been told a million times -- "There's never a
subscription fee with HD radio!"

HD radio advocates want to put a new seat cushion on a horse drawn carriage and call the result a spaceship. At bottom they simply fear the future, fear technology, fear the internet, fear progress, and fear the inevitable.

Wonder if he's changed his mind. Sunday night and Monday night, WABC
didn't have IBOC on.

It's been on during the day. Let's see what happens tonight.

I have little respect for Boyce. This man's theory of "nothing
outside weekday drivetime matters" has led this once great station to
become a clearinghouse for dull syndicated bird droppings (Laura
Ingraham comes to mind) and lots of infomercials during the weekend
and overnight hours.

This never happened under the previous PD, John Mainelli, who had
taken the station to 24 hours of live programming, the bulk of it
being local -- even on the weekends! During his tenure, AM 77 was the
#1 rated talk station in the entire COUNTRY. No small feat for an AM
station.

WABC has higher ratings now than when Manelli was there... that is why they
changed.

With 93,000 AQH persons, 6-Mid, WABC still beats the #2 talker, KFI, by a
third.

Hi, Dale. On your SW insulated wire antennas, do you then recommend using a ground at all, or just go with the ungrounded cable-to-wire junction?

I am seriously thinking about getting two of these gems and phasing them, if I can make the geometry work on my constricted lot...if I don't have to ground them, I'd be way ahead of the game for other reasons. If grounding is better, would separate ground rods be appropriate?

Thanks!

The problem is the "personalized" music services, such as Pandor,
Slacker, and Last.FM which allow the listener to program their own

"personalized" music stations. clearchannelmusic.com/hdradio just runs what some programmer thinks listeners want to hear, not listener chosen, personalized playlists. This is why, such new technologies, such as Ford's (Microsoft's) new Sync will allow seamless streaming of iPods and cell phones that contain Pandora, to in-dash units which will revolutionize the way music is played - it is over for such antiquated technologies as HD Radio. It is only a matter of time.

Well said. The only area where HD radio is apt to succeed is in a race

Cuhulin,

Technically "Ventura" is the 'City of San BuenaVentura'
and is the County Seat of Ventura County, California.
http://en.wikipedia.org/wiki/Ventura,_California
The 'City of San BuenaVentura' gets it name from
http://en.wikipedia.org/wiki/Mission_San_Buenaventura
"Mission San BuenaVentura" which was founded by
Father Junípero Serra a Spanish Franciscan Friar
http://en.wikipedia.org/wiki/Jun%C3%ADpero_Serra
http://en.wikipedia.org/wiki/Franciscan
one of the Spanish "Catholic" Missions in California

and now you know ~ RHF

The playlists on terrestrial radio are chosen by listeners.

That's not a big difference. 6 months ago the 5.8 station had dropped
to 4-something, and the 1.9 station had almost 3. There really is not
a huge different between ~5% and ~2% of an audience.

Now contrast that with:

YOU stated that "the top 2 stations have 90% of the listeners" (or
something like that) which is so wrong, it's a borderline lie.

I thought the RIAA was against user-selected songs. For example if

The UK radio station I listen to most doesn't have a playlist. It has
news, features, radio plays, comedies, arcane quizzes, book readings,
deep current affairs, arts programmes....

I don't want radio that plays records. I can buy records. I want all
that other good stuff.

Truth is:

Nightime IBOC would work just fine if the adjust the parameters to fit
inside 10 kHz.

We're not discussing ARPAnet. We're discussing the WWW.

What you are doing is equivalent to saying "Ipods existed in the 80s!"
just because some MP2s existed back then.

If you have that information, please share. How many AM listeners are
there during the 8 to midnight hours?

Of course, they can fix all of the technical problems and that won't

If you don't want to see anything about baseball on the internet,
don't look at it. As for HD, I'm sure there's a station/channel
somewhere where you can find a baseball game.

signals).

Our local ABC station (WABC-77) has been turning off its IBOC at night
for the past two nights, I've noticed. I figured something had to be
wrong between WABC and WJR-76 in Detroit.

Univision's WADO-1280 does the same thing. Sometimes it's not even on
during the day. Wonder who complained to WADO about nighttime
interference.

Stop thinking shortterm. Yes *right now* both tv and radio stations
are sending-out duplicate signals : Analog and Digital. ----- But
that's only temporary. The TV stations will shut-down their analog
and just broadcast digital at approximately 1/10th the power of
analog. Likewise, AM will eventually end, and it will just be digital
at 1/100th the power.

Thus reducing the monthly electric bill, and enabling the station to
operate on less money.

Good question. I don't know. But since the stations are embracing
multi-channels (both in TV and radio), apparently THEY think there's
something to be gained.

No, which is a shame. I was driving through Iowa and I happened to
stumble across an AM Stereo station. It was very pleasant to hear
such rich sound coming from an AM.

IMHO the FCC ought to mandate the all AM stations which play music
must be stereo. (Of course they already mandated that the 1610-1710
band must be all stereo, but the FCC's not enforcing it. Stupid
idiots.)

Uh.... probably for the same reason I can't import a 12-hour VHS tape
from japan. I *want* to, but amazon.jp.co won't let me do it, because
of export restrictions.

Also, there's really no need to import AM Stereos. Just buy an HD
Radio which already comes with AM Stereo (it's built into the chips).

You mean like "pay per view" for radio. I'd be okay with that. I'd
ignore that channel (probably on HD4) the same way I ignore the "pay
per view" on television. Still lots of freebie stuff to hear.

They are commercialized just like everybody else. As for donations, I've never heard them ask for money or say "sponsored by the Lutheran Church".

The other Christian station does that quite frequently ("this hour sponsored by..."), but then they are commercial-free. They rely completely on monetary gifts. (No they have not upgraded to HD yet.)

The Internet is not the Web. I haven't said word one about the
Internet. Go back and look. I am talking *solely* about the Web.
The Web didn't exist until 1992.

This is an important difference because Usenet predates the Web, which
was my whole point all along. Actually, Usenet slightly predates the
Internet as we know it.

I just report what I hear. I occasionally do tune in WADO late at
night when they're playing music (for some odd reason instead of
replaying daytime talk shows). Last night was one such night. Didn't
notice any IBOC noise at all. I just wonder what's up with that

The few times I've listened to 1280 during the day, its IBOC signal
has sometimes been on and sometimes not.

A 5.8 that moves to a 4.0 has lost nearly a third of its audience. You
measure each station over time against itself, first. Like TV shows, some
radio stations go up, others bomb or go down.

In a market like Chicago, every share point is worth about $7 million on the
average. A 25-54 share is probably worth close to $9 million, so a
difference of a single share is huge.

He said the top two alone have 10%, which is absolutely true. Frank's point
here is totally valid.

You can create a start point, with a list of songs. Pandora creates a
playlist based on those songs, and you can indicate those you like a lot or
don't want to hear again, and Pandora refines its list for you. It is very
cool, particularly the engine behind it.

And no returns.

A good example: 40% or more of the Riverside San Bernardino audience is listening at any given time to LA stations. 3 of the top 5 stations there are usually LA stations. But LA stations do not sell advertising there, because the market is about 30th in the US, and spots go for $100 or less. In LA, the top radio market for revenue, spots can be sold for way over $1000 each. Why sell a $100 buck ad when you can sell for over a grand each?

Yes, but it is much more than a stereo exciter. You can get a stand-alone exciter for a kilobuck or so, while a full HD install is maybe $50 k to $75 k for an FM. But, using LA as an example, a station that bills $60 million a year is not going to be much affected by a capital expense of $75 k.

We detected a design issue in the AM exciter, after it wiped out 70% of the
RF modules in the KTNQ transmitter. As a precaution, the units were sent in
fro retrofitting.

Advertising of course. Plus the money they save because Digital does
not require as much power.

It's not that expensive. No more expensive than a mono to stereo
upgrade for an FM station.

Agreed. But the advantage of the HE-AAC codec is you don't need a
high bitrate to get FM quality. Only 24 is sufficient. At 64kbit/s
you get near-CD quality. It's a VERY efficient compression standard.

So a station could divide itself into 300 / 4 channels == 64-96 kbit/s
per channel, and still have quality ranging from near-CD to CD.

Because by the time the U.S. fixed on a standard (circa 1990), the AM
Stereo stations had largely disappeared. Thus there's no impetus for
customers to upgrade.

In contrast, Japan and Canada and Australia had a fixed standard in
the early 80s, thus giving consumers confidence that they were not
wasting money the next Betamax.

Sorry. There are roughly 50 million people living in the Philly-

My "smalltime" low-profit Christian station seems to be doing
alright. They happily embraced the new technology, streaming out 3
separate programs.

I don't know David. If a pice of gear takes out 70 percent of my
(very expensive) transmitter -- the thing that makes money for me -- I
wouldn't be sending it back for a retrofitting. Instead, I'd be
tossing a shitfit and demanding my money back from the manufacturer,
in addition to compensation for lost air time and ad dollars.

I'd then consider sending them the bashed-up piece of gear, postage to
be paid by recipient. Nah, just kidding on that.

Seriously though. Ad dollars being what they are, you can't afford to
be off the air for a second because of a piece of defective gear
blowing up your rig.

As a whole, digital radio is a farce, offering poor reception
(especially in moving vehicles), unnecessary extra channels (as if
there aren't already enough radio stations), and expensive receivers
requiring external antennas - no wonder, consumer interest in DAB has
stalled in Canada and the US, and is slowing in the UK.

- Eliminate the analog, and HD fits very nicely into a 10 kHz channel.

- Alternatively, you could keep the analog and let the HD "hang over"
5 kHz per side, which would not be quite as bad as the current
situation.

It's a shame they've never heard about audio streaming on the

I'm not convinced. All I had to do was choose Bob Wills as a starting point and Pandora began selecting everything from Willie Nelson to Travis Tritt. Uh, no. Bob Wills is closer to Benny Goodman than to the country stars. The so-called "music genome" project is not science. It is a subjective measure based on obvious bias; in this case a bias that says "all country music is the same". I happen to hate most country music, but I'll drop what I'm doing to go out and hear any Western swing band.

I happen to know a couple people who work for Pandora as listeners or evaluators or whatever they're called. They're not convinced that the "genome" project is very scientific at all.

Their "engine" such as it is, appears to be a database that selects based on an average of about 30 of their 200 or so criteria. And it looks as if they toss in an occasional random selection about every 20 songs or so.

It's no problem, as the site automatically will put another transmitter on
the air. Eventually, though, we run out of transmitters.

The Pandora technology uses a very complex fingerprint of a song, not
someone's assumption of genre, style, etc.

DOH ! - If the Shoe Don't Fit . . .

SFTV, { "Hybrid Digital" Man }

AM/MW "HD" Radio is 'by-design' Engineered to Interfer
with the two Adjacent AM/MW Radio Channels at 10 kHz.
http://electronicdesign.com/Files/29/12194/Figure_02.gif

AM {Basic} Analog Audio +/- 5 kHz
Digital Primary {Outside Audio} Side-Bands +/- 10~15 kHz
Digital Secondary {Inside Data} Side-Bands +/- 5~10 kHz

For the current IBOC Broadcast 'Scheme' to work on the
AM/MW Radio Band : The current Channel "Spacing" of
10 kHz would have to be expanded to 25 kHz. Meaning
that Half the Current AM/MW Radio Stations would have
to be 'transitioned' from the AM/MW Radio Band to the
FM Radio Band. In order to accomodate these 'new' FM
Radio Stations; the FM Radio Band would have to be
Expanded by using the former Analog TV Channels 5 & 6
{76 MHz to 88 MHz}.

1 - Serving in the Public Interest - The Clear Channel
Mega-Power AM/MW Radio Broadcaster is no longer
needed or required : Therefore the concept of Local
AM/MW Radio Stations having 1000 Watts and former

Clear Channel AM/MW Radio Stations having 50,000
Watts is clearly outdated.

2 - The 'artifical' 1% Digital to Analog Signal Ratio is
clearly not working fully within the 10 mv/m Contour
and Fails beyond it.
1000 Watts Analog ERP @ 1% = 10 Watts Digital
5000 Watts Analog ERP @ 1% = 50 Watts Digital
10,000 Watts Analog ERP @ 1% = 100 Watts Digital
20,000 Watts Analog ERP @ 1% = 200 Watts Digital
50,000 Watts Analog ERP @ 1% = 500 Watts Digital

3 - Localize All "HD" AM/MW Radio Broadcasting.
Three Classes of AM/MW "HD" Radio Broadcasters :
* Rural Local Radio Stations 100 Watts - Days and Nights
- - - Gives Local Radio Stations Ten Times (10X)
the Digital Power that they presently have.
* Metro Radio Stations 400 Watts - Days and Nights
- - - Gives Metro Area Radio Stations 2X~8X
the Digital Power that they presently have.
* Regional Radio Stations 1600 Watts Days and
800 Watts Nights
- - - Gives Regional Radio Stations 2X~3X
the Digital Power that they presently have.

FCC mandate that all new AM/FM Radios :
Made in the USA or Imported into the USA
be "HD" {IBOC} Radios by 2009.

FCC requirement that allAM/FM Radio Stations

Hi Bruce,
I copied this from the FAQ portion of our site:
What is the best grounding arrangement for the EF-SWL?

Unfortunately, there is no one answer. That is why we have provided separate grounds on the matchbox. Lug 1 is the ground end of the antenna side of the transformer while #2 is ground for the coaxial shield. Depending on the source of noise, it may be advantageous to: 1. Leave the factory shorting strap in place and attach either lug to a suitable RF ground at the antenna.

2. Remove the strap and ground only lug 1 at the antenna site. Then, the receiver may be grounded or left ungrounded- whichever results in lower noise.

So, there is no single answer, but some sort of short ground for the matchbox will yield less noise than no ground. With no ground at all, the outside of the coaxial shield is free to conduct noise.
Please note, that we have had to suspend all amateur/SWL mfg for October while we deal with an unprecedented level of military and aerospace work. Thanks for your patience.

I read once that AM radio in the US was allowed up to 15 KHz, but the NRSC standard, adopted
by the FCC, calls for a limit of 10 KHz. THat's only about a half octave from the 15 KHz limit of FM, and sounds pretty OK, certainly better than rendered by most AM radios.

Consumers don't even buy radios anymore, and then to expect them to

Um....idiot. This has become a globalized interconnected world.

For all you know, the "non English" speakers are also tourists passing
through and needing an ATM.

Ditto products that have multi-lingual labels. The same product can be
sold in Mexico, USA and Canada without having to print out three
different versions of the label or instruction book.

I have seen their criteria and have emailed back and forth several times with someone who apparently knows a lot about Pandora's algorithms. Once again, all you have to do is set Bob Wills as the artist and Pandora goes silly.

I just did it to verify my claim, as I haven't used Pandora in over a year. Here's what happened:

Bob Wills
Lefty Frizzelle (good match)
George Jones (crap)
Slim Dusty (cripes!)
Bob Wills (good match)
Loretta Lynn (uh, no)
BR549 (yecchhh!)
Flatt & Scruggs (bluegrass?)
Bobby Helms (good match)
Ernest Tubb (oh....my....)

So, Pandora thinks that Western swing is equal to honky-tonk and Nashville sound. No, it's not. Nashville Sound is deplorable. Honky-tonk is good if you like guitars and like to cry in your beer. But neither of these genres is equal to Western swing. And what's bluegrass doing in there?

I don't know how to impress upon you that there is nothing scientific about this. The listeners are uneducated in the 10 genres of country music, and don't know the differences among them, so they lump it all together as "country" because they think it's all the same.

Western swing (as anybody who grew up in the Southwest or in the Bay Area knows) is a distinct genre of country more closely related to be-bop and swing than it is to honky-tonk or bluegrass. You won't find a banjo in Western, but you'll likely find a piano or a sax.

Some people educated in music (Pandora hires lots of musicians) could tell differences in tempos, beat emphasis, instruments used, stanza structure (AABB, AABA, etc) and other criteria, but they're NOT using these criteria in evaluating Western swing music. They're using purely subjective criteria. They're calling it all "country" and much of it's junk.

Go try it for yourself, starting with Bob Wills as the artist. Then listen to what you get. The choices go all over the board, and they most certainly don't swing, well most of them don't anyway.

Jeez you really love your computer! Do you "interface" with the

I don't really care. Just pick some random market, 8 pm to midnight,
and AQH Share. I just want a rough estimate of how many spend their
evenings listening to AM.

Thank you.

I found it to be very ineffective. I would type in Avril Lavigne who
I like, and then it would play some dumb song from some no-name artist
I'd never heard. And I'd click "skip". Again and again. Eventually
it reached a point where Pandora kept playing the same songs over-and-
over.

I prefer a human programmer. They'll typically do a "no repeat
workday" thus providing lots of variety, but also having a huge
library of classic hits.

Even an Ipod on shuffle is better than pandora. Computers are dumb,
and the computer behind Pandora is also quite dumb with its poor
selections & repetitive playing.

Brother Stair on 3 frequencies, probably all day.

Pastor Peters on 3 frequencies, probably all day.

Some bubbly Christian shows thrown in for the heck of it.

12.180 Idled, 5.050 Idled.

Does it seem to you than the endless Christian content of American Stations is likely prematurely putting the death knell to American Broadcasts. Sure, if they are Christian Stations, they can program what they wish. But fire breathing preachers teaching damnation for anyone that commits the slightest sin (and all Catholics), this can't be good for Shortwave.

You know, it would be possible to play some old time radio shows, comedies hopefully, without offending the sensibilities of people that desperately seek to assure that everyone, save the followers of their particular religion, is going to go to hell. It's oppressive to hear this stuff. I don't listen (maybe to some Pastor Peters and some Pastor Butch Paugh (whom also hates Catholics)), but strolling back and forth along the frequencies produces an endless cacophony of preachers spitting fire from the pulpit.

I previously listened to John Stadtmiller and RBN, but this shithead decided to go off of shortwave altogether. Nice, thanks for the warning John, nice that you sold shortwave radios to the suckers. Now he's selling satellite receivers. Do I perceive another branch of suckers when John has another hissy fit and decides to stop broadcasting over satellite as well. John broadcasts to a paranoid audience and expects his listeners to download or listen live to his online shows everyday. Right. No tracking possible there.

Oh, there's the Power Hour. How a 3 hour show was named the "Power Hour" is beyond me. Anyway, they are not tailored for the working man. Can't listen in the morning because I'm at work, can't listen at night, because I'm asleep. Same same with Alex Jones. They have the retired, shift workers, homebound, and housewives for an audience. That's all. Sure, I can download the Podcasts, but I like the Radio, I like to tolerate the vicissitudes of the transmission. I recently bought a High Definition TV, my life has not been enhanced. Now I am acutely aware of how bad Spock's (from Star Trek) complexion is, like I need to see deep pits in his face. Same with shortwave. It's not the shows, it the ability to listen to the shows on the radio. Without the radio interface, it's simply no fun. I write and research with my computer, I don't listen to it. I am not going to drag my computer from room to room

to listen to John Stadtmiller's stupid internet shows.

I listen to Pat Kiley, good show, and the Last Round-up when I remember to listen to it. Believe it or not, I listen to that shithead Rick Wiles, at least it's something other than the usual damnation stuff.

Foreign radio? Patooie. (simulated spitting sound). My goodness, it's as bad as listening to NPR in this country. Don't any of them speak in a normal voice, why are they always on the verge of whispering?

I have $2000 in shortwave equipment and nothing to listen to that holds my attention. I didn't expect shortwave to be so monotonous so quickly. If it weren't for WBCQ you wouldn't be able to listen to an American shortwave broadcaster for 5 minutes without hearing the usual salvation stuff.

Regards to all.

Artaud

Also national nets like Usenet and Fidonet. Usenet is still alive-and-well thanks to News servers being integrated into the WWW browsers, but Fidonet is essentially dead since BBSes don't really exist anymore. (There's still a few, but none local to my area, and I'm not going to call long-distance.)

Those networks were cool. You would go visit, for example rec.arts.startrek, read & reply to messages, and then log off. During the night the messages would travel across the phonelines. And the next morning you would have a fresh batch of messages.

Things moved a lot slower back then. Typically if you asked a question today (Oct 2), you had to wait until Oct 3 to receive the replies to it.

BTW:

Here's the oldest message I could find. I got a modem in late 1987, and was posting to Usenet throughout 1988, 89, and so on, but apparently those messages never got archived. Oh well. This message was posted just prior to my high school graduation..... sooooo long ago. ;-)

Yea, I can see it now - $80 HD/IBOC alarm clock radios, with AM-loop
and externally-mounted FM-dipole antennas!

All evening? Literally from 6:00pm to midnight, without interruption?
My guess is that very few people do this.

The irony there is that none of those radios can receive anything.
Maybe a little on FM, but AM forget it.

The standard daypart is 7 to Midnight.

Using the 6th largest city, Houston, as an example, between 7 PM and
midnight, the share of radio listeners using AM at night is 7.9% of all
radio users. As a percentage of all persons, whether using radio or not, it
is 0.6%. In 18-34 year olds, the share is 4.3% of radio listening and 0.4%
of all persons in that age group, whether listening or not.

How many people under 50-80 years old listen to AM, probably close to zero.
Most likely people under 30 don't even know the AM band exists..

The Houston metro consists of fully 8 counties, and the figures don't vary for the more outlying counties... they acutally go down because Houston does not have any really good signal AMs at night.

I looked at the Casper WY market... AM listening 17%... only 12 stations in the market, and not much more AM listening than LA, with 17% also.

The highly rural McAllen Brownsville market has 8.2% AM listening. Traverse City / NW Michigan has 11%. Beckley, WV 9.1%. Palm Springs, CA, 7.8%. Victor Valley, CA 6.2%.

Get the picture?

Arbitron does every county of the US once a year, and AM listening in non-regularly-rated counties is lower than in metros.

First off, you came in here, guns blazing, pissing everyone in sight
off. THEN you go after a widely recognized, renowned engineer and
call him stupid.

I'm not calling an engineer stupid. I'm calling a vo-tech flunkie
stupid, stupid. (THAT's an insult. To vo-tech grads everywhere.)

I'm also saying you need some basic training in listening to music
because your samples that you've presented sound like shit.

Finally, may I point out to you that Peter David writes children's
books? Good ones, granted, but they are aimed to adolescent boys.
When will you move up to more challenging material?

Digital radio of any flavor will suffer from the propagation characteristics of the MW band. Let's leave AM well enough alone, and use a tiny sliver of some of the reclaimed UHF TV spectrum or maybe an old VHF TV channel, some band with more predictable and stable propagation characteristics. I think that it serves the public interest to reserve a tiny bit of spectrum for something other than cell phones. Then again...

I really believe that mobile internet will supplant all of this anyway within 10-15 years.

There is no single FM station that covers the entire Bay area completely, and programming quality and relevance is the most important issue.

AM is still useful and viable. The fact that it is being mis-programmed in many markets shouldn't cause anybody to condemn the whole band. If you serve your listeners and advertisers well by creating unique content that people want, and distribute it in ways that listeners want, you can do very well. I fully expect that our 'content' will become more available via many distribution channels over time.

Newspapers are fighting similar battles right now, and are expected to 'invade' radio's turf with audio and video programming. I expect that the content provided by newspapers, radio and TV will become more merged and similar.
You'll see more "on demand" programming, and have many more listening options. As broadcasting becomes more 'internet like', listeners will expect audio and video content availability to be more internet like as well, with many options (real-time "live" streaming, "on demand" and the availability of individual program elements for inclusion into personal and customized "playlists").

It's going to be a bumpy ride, but if anybody is paying attention, we'll all be better served.

The stations that should be really concerned are the ones doing a lot of syndicated programming. They won't have anything to sell once

distribution isn't limited by broadcast channels. If these guys want to stay in business, they'll have to come up with some unique content, which should be local. Generic music 'jukeboxes' will have similar challenges, though there is certainly room for them.

That is because radio markets are defined by the listenership to stations.
If the three AMs that keep the far reaching counties or split counties
(Contra Costa West) in the "market" decline significantly, the market will
be redefined. Several dozen markets are redefined every year, adding or
losing counties. Since AM listening is declining everywhere, if the sum of
KGO, KCBS and KNBR decline to a certain point, and no longer represent a
significant portion of listening in certain counties, Arbitron will redefine
San Francisco and more FMs will cover most of the market.

Yeah, news talk and even sports (Detroit, yesterday, in fact) are moving to
FM.

Actually, many of the jukeboxes have talent driven music shows that are, in
the mind of listeners, just as local as the ageing news and talk stations
that have not moved to FM.

I spoke with a Clear Chanel guy (yes, I do seem to know everybody) and he told me that the Format Lab is a test designed to discover listener acceptance of new format ideas. He told me that they gauge number of listeners, time spent listening, time of day, and listener location (to a certain extent). I asked about registration, and he said that the idea is to bring in the most listeners possible and that registration reduces response by as much as 80%, so they don't do it.

I don't know of any CCU stations that have used a Format Lab format in changing station formats, so I don't know the mechanism for doing that.

I find myself listening to Format Lab often as I sit in cafes. Among my favorites at the moment are Undies (underground indies), and Vegas Gold, which is mostly lounge singers of yesterday and today.

Actually I inspire loyalty because I don't dish out the BS like you do
and treat people as equals no matter their position in the company.

You need to grow up, present yourself as you are and stop pretending.

I have the radios. I did the bandwidth experiments with them and
compared to the sound files I down loaded from various web sites and
played them. You clearly have not done any of this so your opinion is
baseless.

Well, that's all very interesting Mr. Digital engineer so how come I can

TV signals are received over the air first or received from a satellite
first.

Of the three companies you mention, Coding Technologies is the one
that has an AAC+SBR implementation (under the tradename aacPlus).

But you miss the point. You are relying on inferences and guesswork
for something that -- whether a correct guess or an incorrect guess --
ought to be public information, but isn't. This is of great concern
to me because of its consequences.

64kbit/s is only just starting to sound good, it's not high quality.
Just because you love pixilated, compressed, and distorted in a way you
love does not mean other people like it.

"News/Talk/Sports Tops Radio Formats, Interep Analysis Reveals"

"The latest share numbers place the News/Talk/Sports format at the top, pulling in an average of 17 percent of listenership among persons age 12-plus, based on Arbitron figures for total radio listening in 92 continuously measured metros. That share number is even higher than levels seen last spring, when the war in Iraq began. According to Interep, more stations than ever are programming News/Talk."

I think the reaction you're getting is really due to

1. Reaction to the marketing hype, which in the case of Ibquity and DRM, is the bold faced lie of CD quality.
2. The way you promote the official position, as if you had a financial stake. Regardless of whether you're just a bored engeineer, or a marketing type lying his ass off, this is the way you come off.

If digital radio were instead marketed honestly with respect to the real benefits it provides in certain situations, such as mobile, you wouldn't hear all the animosity.

And for you, if you're not a nut, don't emulate one. Usenet is dog tired of trolls and crude financial exploits, so even if you aren't, try not to resemble the pattern.

Of course they do. "We're from the government -- we're here to help". The FCC has made a few good decisions in their time, and some really boneheaded ones. There are plenty of examples of private standards consortia that do as good or better job than the government at preventing chaos.

Actually, the Mexican truckers are in the US due to an executive

given the likelihood of it being hijacked.

Hip Hop rap isn't all bad. There are some very politically astute artists waking up the masses to the corporate criminal syndicates that run this country by proxy via their flunkies "the government". There's a bad moon arising.

The 4th Branch Lyrics by Immortal Technique

[Talking]
The new age is upon us
And yet the past refuses to rest in its shallow grave
For those who hide behind the false image of the son of man
shall stand before God!!! It has begun
The beginning of the end
Yeah..
Yeah... yeah, yeah
[Verse 1]
The voice of racism preaching the gospel is devilish
A fake church called the prophet Muhammad a terrorist
Forgetting God is not a religion, but a spiritual bond
And Jesus is the most quoted prophet in the Qu'ran
They bombed innocent people, tryin' to murder Saddam
When you gave him those chemical weapons to go to war with Iran
This is the information that they hold back from Peter Jennings
Cause Condoleeza Rice is just a new age Sally Hemmings
I break it down with critical language and spiritual anguish
The Judas I hang with, the guilt of betraying Christ
You murdered and stole his religion, and painting him white
Translated in psychologically tainted philosophy
Conservative political right wing, ideology
Glued together sloppily, the blasphemy of a nation
Got my back to the wall, cause I'm facin' assassination
Guantanamo Bay, federal incarceration
How could this be, the land of the free, home of the brave?
Indigenous holocaust, and the home of the slaves
Corporate America, dancin' offbeat to the rhythm
You really think this country, never sponsored terrorism?
Human rights violations, we continue the saga
El Savador and the contras in Nicaragua
And on top of that, you still wanna take me to prison
Just cause I won't trade humanity for patriotism
[Hook]
It's like MK-ULTRA, controlling your brain
Suggestive thinking, causing your perspective to change
They wanna rearrange the whole point of view of the ghetto
The fourth branch of the government, want us to settle

A bandana full of glittering, generality
Fighting for freedom and fighting terror, but what's reality?
Read about the history of the place that we live in
And stop letting corporate news tell lies to your children
[Verse 2]

Phil,

Please define what you mean by fluent. I'm not trolling; I would like
a serious answer. This has actually been a topic of discussion in some
other forums. I don't have an EE degree (I have bachelor's and
master's in CS), but my bachelor's degree required some EE classes. I
had plenty of EE major friends, many of whom went on to EE-related
careers.

Because listener research is used to determine the good and bad songs so
stations can play the best ones. You really don't think that a station
program director just makes up the list of songs to be played, do you?

http://www.davidgleason.com/Radio%20Research.htm shows how this is done.

A "service area" is a place where a signal is receivable. "Service" to
listeners, per the FCC, is to the local community and the community of
license. There is no requirement to give service to all the service area.

59% of that listening is age 55 or over.... where there is essentially no
adveertiser interest. In 25-54, the percent is less than 7% of listening to
news / talk formats....

Actually, if that demand were genuine, and HD Radio were providing
the means to feed that demand, you wouldn't be able to swing a dead
hooker without hitting an HD radio. Companies would be stepping over
each other to provide HD receivers, because there would be huge money in
it.

This is not the case. And consumer demand for the product remains low.

HD won't go away anytime soon. And it won't die easily. But the
cases made for it, simply aren't working, today.

Yes, the lovely globalized interconnected world. A world which lacks
independence due to being interconnected. The loss of national sovereignty,
loss of restrictions on poor products. etc. I'm sure its such a fine world
with lead tainting your products, lead tainting baby bibs, rotten food,
poisons and lack of restrictions on these products. Just lovely isn't it?
Let them all in and let all the third worlders in. I'm sure that all the
globalist supporters would love to have those same Mexicans move in with
them. Or the Chinese, Vietnamese, Koreans, Africans, etc.

I guess since we no longer have an America, we should sing kumbaya and wear
our togas to the party. I'm sure that when your standard of living decreases
rapidly, you might think otherwise about the greatness of being in this
globalized interconnected world. I'm sure that when Americans go from making

15 to 20 dollars an hour to making 2 an hour, it will be great. I wonder who is going to foot the bill for Social Security, pensions, infrastructure, roads, bridges, etc. Is it going to be the Mexican invaders? The Chinese? The American taxpayers? Those who work and pay taxes? How in the hell do you propose this infrastructure rebuilding with the loss of much of the economic and industrial base of America? Who is going to pay all the taxes? The burger flippers, the service employees, the low wage workers. They don't have any money. Are the Mexicans going to pay the taxes? How about taxing China for their slave labor goods?

Or are we on a downward spiral with the loss of our good paying domestic industry and technical jobs. Exactly who is going to foot the bill. I suspect it is going to be most of the people in their 20s through 50s and younger citizens. Nice job guys. I'm sure you'll enjoy their third world nation you won't have to inherit like the youth of the country.

Again post from some knowledge; based on your personal
experience from actually listening to Shortwave Radio
-vice- simply something that you read somewhere.
DRM => http://www.drm.org/

Use a common 'portable' AM & FM Shortwave Radio
and Tune to a DRM Shortwave Radio Broadcast.
http://www.drm.org/livebroadcast/livebroadcast.php
Hear that Noise on both sides of the Tuned Frequency
extending for +/- 10 kHz. That is the Digital Noise
caused by the DRM Digital Broadcast Mode.

Now take that same Radio and Tune to an Analog "AM"
Shortwave Radio Broadcast in the same Shortwave Band
at the same Hour.
http://www.retards.org/radio/shortwave_schedule/
You may hear an additional Radio Broadcast or two
within the same +/- 10 kHz from the Tuned Frequency.

What's QRM? (checks wikipedia) Does that mean "Man-made

Wikipedia doesn't say what the negatives for DRM are.

I see. Well I wrote roughly half of the criticisms section (and all
of the HDR vs. EU DRM/DAB section) located here:
en.wikipedia.org/wiki/Hd_radio#Comparison_to_EU.27s_Digital_Radio
----- I have also posted quite a number of negative comments on this
forum such as, "HD Radio AM should be banned from nighttime
broadcasting, until circa 2015, at which time analog can be switched-
off and HD can take over".

I recognize that HD is not flawless.

The problem is most of the folks on these groups think HD has
absolutely *no* positives whatsoever. They are biased towards the
"hate" side of the HD argument, and hate anyone (like me) who says
even the slightest positive thing about the standard.

They are the biased ones.
I am sitting on the fence (recognizing both + and - the standard).

Utter bollocks. A thousand stations of crap is still crap. It is the
dilution of funds by excessive quantity that prevents radio stations
putting together a competent programme list, which takes money, money
and more money.

Fewer, better funded radio stations are the way to quality. And the
first step to that is to remove all the radio stations which are
simply record players. This goes in spades for ghetto radio, where the
entire output is a single genre. And in spades and trumps for radio
stations which push loathsome religious agendas.

For comparison, television pulls over 70% of all persons during 7 to
midnight. Any idea how many of that 0.6% of primetime AM listeners

Thank you. That's what I wanted. For comparison, television pulls
over 60% of all persons during 7 to midnight.

- 0.6% listening to AM during primetime
- over 30% watching broadcast TV (fox, cw, ...)
- over 60% watching all tv (including cable)

Is it any wonder the AM stations feel the need to improve the quality
of the sound (digital upgrade), in hopes of bringing in more listeners.

Don't drive like a snail. ;-) If the speed say 70 then that's what
you need to be doing (or even higher). It's an interstate highway,
not a local country road. It's meant for high-speed travel.

I'm pretty sure that the IBOC hardware (and the license to use it) costs considerably more than the <$1000 it takes to buy a stereo encoder for a commercial FM station.. For that matter, a pretty good quality stereo encoder can be bought for <$200 from some of the companies that supply LPFM and (gasp!) pirate operators. Going stereo on FM doesn't take any modification to the transmitter itself, just a piece of outboard gear in the audio chain. IBOC requires modifications to the transmitter (plus the station loses all it's SCA's.. which are a good source of additional INCOME, especially for small and/or public radio stations.)

That, plus though the cable (or often, fiber optics) is underground in many
(not all by a LONG ways, mostly only in downtown and newer suburban locales
that already have buried utilities), the headend equipment is not.. nor is
said equipment, in most cases, backed up by generator. This is because if
the headend power goes down, it's most likely that the power grid in the
area of the headend is ALSO down, so the signal doesn't make it beyond the
headend..

I guess he doesn't realize that MOST AMERICANS are not youngsters.. there are a lot of us boomers around, and as of right now, we're still the largest segment of the population, and will be for some time yet, since only the fringe of us are starting to die off now, and we have a while to go (Korean War boomers are only now getting into their mid-50's).

Is that why I've became an engineer? Because I fear technology? Is
that why I've using computers since 1984, and internet connections
since 1987? Because I fear technology? Is that why I spend my days
reviewing code & designing hardware? Because I fear technology?

Bzzz.

Guess again.

Never mind I'll tell you why: I've seen supposed "better" standards
like laserdisc, minidisc, Digital Audio Tape, Digital Cassette
Recorders, Super Audio CD, HDTV VHS recorders, and on and on and
on..... arrive on the scene, make a lot of noise, and then disappear
since the general public ignored them. (Blu-ray and HD DVD might be
the next ones to flop.)

That's taught me not to believe all the lies.... er, marketing hype.
(Yes even the internet has its trail of tears, with numerous failed

technologies & bankrupted companies.)

Jus because something is new (like Wimax) does not mean it will win. I remember back in the 80s when ISDN was supposed to be "the future of computer networking", and many of my colleagues immediately signed-up. But that never happened. The consumers continued using their phone lines (slowly upgrading from 9.6k to 56k), and then they ignored ISDN and jumped straight to high-speed (dsl or cable).

ISDN failed to live-up to its hype, becoming a marginal service barely used by anybody.

Wimax certainly *sounds* good, but it could very well be the next ISDN... the next flop.

Don't believe marketing hype.

Exactly. It could be that Wireless will die-out completely, and
they'll be no need for either HDR or Wimax. Nobody knows what the

Is "quality" playing old Big Band music, Jazz, and Classical?

Personally I'd call that, not crap, but definitely "boring". I like those genres, but I also like Pop, Rock, and Hip-hop on top of that. I like variety. Most people my age like variety, sampling a little of everything.

I'd rather see lots and lots and lots of channels, and then let Darwinian Survival of the Fittest happen..... good channels survive, and bad channels starve & die. I prefer the invisible hand of the market, rather than the dictatorial control of someone saying, "Let's revoke some stations' licenses," because they think there are too many of them.

Every time I hear the word "baby boomer" I think parasite, because
that's what most of you will be doing. Sucking money out of younger
people's pockets like damned leeches (to pay for your retirement and
death-avoidance care).

I'm saving every penny I can, because I know the Baby Boomer Tax will
soon be raised to ~70%, and my take-home pay will be just about nil.

Why don't you live off your OWN money,
instead of sucking it out of your
children and grandchildren's wallets

She just posted 30 minutes ago. The fact is, she doesn't want to
admit that she was wrong when she kept insisting (again and again)
that the Web existed in the 1980s.

Even AFTER we explained to her she was mistaken, she still refused to
listen. I hate stubborn people who refuse to listen, even when others

Please explain why that is? I don't understand. After all, we
created modems operating at 30+ kbit/s over very nosiy analog
telephone lines w/ only 4 kHz of bandwidth. If we could do that, why
couldn't we use similar techniques for noisy braodcast channels?

Just curious.

> use a tiny sliver of some of the reclaimed UHF TV spectrum or maybe an

> propagation characteristics. ...

I like that idea. Maybe a DAB system at around channel 51 and up.
Each of those channels is 6 megahertz wide, and DAB uses ~16 channels
of 1.5 megahertz each, so you'd only need to setaside UHF TV channels
51, 52, 53, 54, and maybe 55.

BTW:

You can't use "an old VHF TV channel" because VHF is already occupied
by TV channels 2 to 13. For example Philladelphia uses 2, 3, and 6.
And my local area uses 8, 10. Baltimore area uses 10, 11, 12, and
13. There really are no "unused VHF TV" channels.

> I really believe that mobile internet will supplant all

Perhaps. Personally I'd rather have both. AM/FM bands (and maybe
DAB) along with wireless internet for my cell phone.

If the price was dropped to $25, like DAB, the U.S. HD radios would
sell like hotcakes. The problem right now is the price is just too
high.

Focus on why it happened and why it isn't going to change:

"We could turn off HD off and fix this tomorrow, but radio has
invested a lot in this HD."

"But it is not going to cost us. There is really no upside," for
broadcasting to northeast Pennsylvania."

Music, music music - all we hear about is pigging music. That is not what I want from radio - I have my own collection of music that I can dip into any time I want. What I don't have, the internet is there to tell me about. Music is a shameful waste of radio resource.

Sometimes Darwin needs a little help, and arguably that help is just as Darwinian as anything. Channels don't survive or die based on their quality - if there were a million, then on average perhaps they would, but when we are talking about a few dozen, Darwinian statistics don't work. My view is that simply playing records is a waste of radio

spectrum, which is far too precious a resource to waste this way.
Radio stations must generate material that is not available through
other media.

What the hell are you talking about? Channels 5 and 6 are *already
occupied* by ATSC DTV channels. I routinely watch channel 6 out of
Philadelphia, and you are NOT going to take it away from me. TV is
more important than some fm station.

(Besides the TV was there *first* and has a right to stay there.)

It's bad enough we lost UHF channels 51 and up. Now you want the FCC
to take away channels 5-6 too? Fuck that idea.

Not really. I was one of the FIRST people to try pandora, almost two

You keep swinging-and-missing.

BTW you really love your computer's internet. Have you tried

If you're saving I might recommend Fidelity's South East Asia mutual fund (FSEAX).
Year-to-date its return is 40.98% and the 5 year average return is 31.63%.

The internet isn't hype. It's what you're using to post to this group
right now.

Sure we do. I know that the physical laws of motion will still be in effect and that 2+2 will still equal 4. I also know that the internet is not going to simply vanish, and as long as it's there people will want wireless access to it. If you have some theory about why the internet is going to vanish sometimes soon, please share it.

You claim to be an engineer, and yet you alternately fear the internet

They could have built a Eureka 347 type system where everybody has an equal signal (and the idea of that killed the deal). Than along came Sirius and XM and suddenly the dinocasters want to ''compete'' with a horribly bad digital scheme that no one else in the world wants anything to do with.

Once Again d'Eduardo - All of 'your' Numbers a Irrelevant to
this Group of Avid Long Distant {DX} AM/MW Radio Listeners [.]

RULES ARE RULES :
The Rec.Radio.Shortwave "Arbitrary" DX Numbers Scale is :

One DXer at 100 Miles is Worth One Market Share ~ 1.0%

Two DXers at 200 Miles is Worth Four Market Shares ~ 4.0%

Three DXers at 300 Miles is Worth Nine Market Shares ~ 9.0%

Four DXers at 400 Miles is Worth Sixteen Market Shares ~ 16.0%

Five DXers at 500 Miles is Worth 25 Market Shares ~ 25.0%

Ten DXers at 1000 Miles is Worth 100 Market Shares ~ 100.0%

those are the numbers - those are the facts - eod ~ RHF

Why? So they could have lousy-sounding audio like the European
DAB??? (Caused by using an old MP2 codec at only 128 kbit/s.)

True Enemy of Liberty

I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really set ourselves free with..

"Al-Qaida" = "General Mahmoud Ahmad"

A neocon bushite soldier is a true enemy of Liberty for America. They as DEMONIC LIARS, are dishonorable THIEVING nazi savages that bomb our innocent families with criminal intent to MURDER. Enemies of Life and Love, a dead bushite is an enemy of GOD halted from victimizing further our loved brothers and sisters, mothers and fathers. Death to the neoconner bushite dumfuk grunting liars who bomb our families, death to the enemies of Christ who war for the escape of the true culprits responsible for 911. TRAITORS.

See my friends, this is why I, as the Son of Man beg and plead for all able bodied men, to kill treasonous bushite on sight, for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks to their bitter end.

To Kill a Bushite, is to be Heroic

American soldier: Your enemy is TRULY LIAR happy George Norry. The demon knows of Ahmad, and forbids any guest from uttering such understandings in defense of the DYING dumfuk

grunt nazi - Good riddance? Do you care that your country men
are dying for the criminal zionist neocon as traitors?
Support my demand for US to be heard GOD DAMN YOU. ...or die
by the hands of GOD.

All fighters, listen up. ANY bush bitch neocon biter who
pretends as a cowardly child killing traitor, it can't ever
hear my manly voice from here, YOU kill to defend ourselves
over, in the cage or otherwise. Kill any or all thieving
bushite ENEMIES of America responsible for 'escaping' the 911
perpetrators, why don't you help US out some my loves...?

Thanks

That's fighting words to a corporated "generation" of left iliterate non-speaking, hypocrite nazi savages, dying sacrificed, who auto figure by remote control, we can not be allotted the public defense for freedom's cause, Justice for all by International News Challenges. ! Justice for All is given through the power of the indivisible truths of our living existence, as concluding: evidence must be used to convince ourselves on who is good or evil. period. Bushites are as dumb as they are cowardly lifeless nazi trash, good for only to play the mute ungodly bad guys in evil wars for the demon antichrist enemy of all human lives - 911's George Walker Bush, The Traitor. See? A bushite faiths that America can be no greater with freedom ruling justly supreme, for as bushite, it would be back as being truly talentless, as a likely criminal enemy of your home town of loved families.

broke.

Hey?, can you spare change to help a brother out some? We sure could use it.. I want to challenge all coast to coast news hosts regarding their contempt for the value of our continuing struggles against a demon evil war mongering tyranny of liars that fall easily by the truer words of CAN and DO. Get up stand up, stand up for your rights. Get up, stand up, don't give up the fight. Free words from Johnny Wizard to liberate our feared world, within as of, Christ, as this light is Born as you to be true too..

GET TO IT FOR YOURSELF!
er, or... don't

Remember, we'll be here only momentarily if you should ever decide to stand up as a fellow brother or sistah of the faiths - injustice to any, is injustice to all. And God, Johnny really is something...

CHRIST RETURNS

I again, beg Humanity to speak in opposition to Amerika in the defense of our innocent forsaken dying lives. CBC producers know the bushmob did 911 but lie with propaganda to kill our families for the ungodly as thieving neocon enemies. They refuse to inform ourselves that Al-Qaida is General Mahmoud Ahmad, as according to the FBI. Or that video of iron flowing like water from the WTC towers exists indicating without doubt, the bushmob enemies did 911 as TRAITORS.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Who cares about yourself if you won't listen as reason to? What can you lose when you have granted to be blindly stolen from?

Zionist nazi Israelis, do tell as LIARS, that Israel, the nation that openly thieves, tortures, and murders daily thoses THEY ADMIT are commpletely innocent, are enemies of every religious person denied access to honestly speak the facts as firmly established since the dawn of Man.

$4.50 for Every Pop Can?

Did you hear? A DOJ manager charges American tax payers $4.50
for every can drink he, and the rest of his cadre can swallow.
Buying bulk, the pop cans likely truly cost 35 or so cents.

So... who's pocketing the stolen loot? Cause, you know that
would be FRAUD. CNN reported that your 'meatball' story would
cause no demands for the returns of stolen funs, no bushite
would lose it's high costing position, as no one would be
tried for treason and gloriously put to death publicly for the
defense of God and country. ..They were actually laughing..
This seems as good a reason as any to take back our TV world
from the bushite neocon enemies of freedom through openly
communicating. wadyahsay??!!? I want to address America, on
how to return a reason for believing.

Make it so.

I AM AMERICA

Sattler ordered the murder of more than 200,000 innocent
people in Fallujah, and they speak nothing but lies on how
such demonic behaviors are godly as just ignored. Our Lives
forsaken, as they hold their very own to die sacrificed for
the unelected traitor neocon. I AM AMERICA.

America MUST demand war crime trials for the propaganda CNN
broadcast "Anvil of God" regarding the demonic actions of
Bravo company. They forgot to tell America importantly, nazi
forces forbade the population from leaving, gunning originally

for everyone between 15 to 55, but sided instead to murder infants and the elderly too, when beginning the Zarqawi campaign by bombing hospitals as first strike targets. As such, the bushite murdered many good doctors and nurses - so all to send bushite snipers on hospital near rooftops gunning for every seriously injured woman and child who tried to get help from the Humans. While driving down residential streets, grenading every home of humans being. Remember that when you hear these dishonorable bushite thieves die rightly for god and country.

[Sideline: It's been thought the reason why rescue efforts in New Orleans were provably sabotaged by Rove, was an attempt to make the blue state red.]

See?.. women and children, who the enemy bushite forbade to leave the city with their innocent families, who, as were all living in the entire city of mosques conveniently found labeled therefore by bushite, "Insurgents" (or did leave earlier, and had our innocent families reportedly indiscriminately murdered two miles or so down the road by the most evil war crime act of recorded history.)

Importantly, there was no evidence made awared of, that legitimately offered PUBLICLY, from the UN or the U.S. to indicate a refugee camp anywhere, but for maybe a small group photographed - then some belligerent bushite bogus pocus - all headed up by a blatant traitor to America named Sattler. Reminder: after the indiscriminate carnage, they couldn't find near anyone for weeks who would take money offered to any citizen freely who survived for their satanic benefactor. So insanely disturbing as ungodly evil doing, war criminal Sattler called a halt to giving out charitable considerations from Americans to the unseen surviving victims - all in an 'escape' attempt to make it look better for US, the paying audience. So, where did our stolen values go to then eh? (Sattler's pocket no doubt.)

http://www.esterrepublic.com/Archives/djamail9.html

/ / "With no medical supplies, people died from their wounds. Everyone in the street was a target for the Americans.

The US also deployed incendiary weapons, including white phosphorous. "Usually we keep the gloves on," Captain Erik Krivda said, but "for this operation, we took the gloves off". By the end of operations, the city lay in ruins. Falluja's compensation commissioner has reported that 36,000 of the city's 50,000 homes were destroyed, along with 60 schools and 65 mosques and shrines. \ \

So Remember: Bushite grunts told the world they wouldn't let anyone out of the city, because [enemy Sattler LIED] pro-bushite Zarqawi was there present, so the innocent families who believed they had nothing to fear from the liar disciples of the ungodly enemy of ALL HUMAN LIVES, remained in the tiny city to be indiscriminately 'protected' with more than nine two thousand pound bombs, or made dead instead by heinous pro-bush escaping war criminals who used white phosphorous on civilization. All to die our Humanity for the thieved loss of evidence to demand ourselves of some official freedom time to deal with our terrorized as suffering reality.

True Tyranny - to continue as an American refusing to publicly demand torture, theft, and murder as unexceptable when battlin' evil for your dying freedoms.. Evidence we must pursue on 911 to know really what the heavens Johnny 'The Law Man' is talking about still. Justice to the bushwhacker neocon soldier, a foreigner who apparently speaks no defense for innocent Americans dying sacrificed as conned for the ill stolen gains of the 911 trifecta. Justice to the lying enemies of freedom for America in Christ. Justice for YOU.

What Freedom do bushite war the innocent for to rape, pillage, and murder as blind neocon followers of the 'lawless' demon antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to the dying American Marine, that the ungodly bushite wars to escape the 911 perpetrators hold some hidden benefit, as the TREASONOUS neocon thieves freely rob from both undefended American and Iraqi citizens, The neoconner, Mr. Bush closed criminal investigations on 911 immediately after the event occurring, while Billions are stolen through 'ear marks' and TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and terrorists like Aegis who dress up as al-Qaida to murder godly lovers of Justice. CNN, CBC, and FOXNEWS would rather kill the Marine, than teach them where to aim their weaponry of liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

Johnny America Speaks Out

"what's this freedom war against Life for again"?

Hannity is a perfect example of what a neocon is. It's a one way communications system. He tells us what we think, and

he'll never takes our calls, they won't read our emails, and they'll continue to pretend WE don't exist. AND... when WE die, they'll be richer for it. AND you'll be dead, your innocent brother will be dead, your innocent child will be dead. No evidence against an accused is US being truly abused. George Walker Bush is Guilty for 911, while every irrational bushite is a traitor to the American Family.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to publicly speaking. There are criminals who don't like these ideas, but they ain't going to speak out against us. Example 'I don't want to be held accountable to the American public, cause I want to steal that 16 billion dollars for myself. That's my public opinion.' What are we going to do but defend ourselves of deathly lawless tyranny, eventually. Or, you won't by DECIDING not to decide. Support our rise as the top cop of Humanity, coming down for diplomatic talks to engage the flagrant wanton stupidity of the bushite grunters. All on hopes you'll consider also, these Kingly texts worth a couple hedge funder salaries, a sixty cent barrel of oil marked up to 74 dollars, or a thousandth of the money America would save in a year, if you adopted Canadian Health care systems overnight for yourself to immediately provide all People the respect for life we deserve. Or don't, and needlessly continue to pay twice as much, while dying broke as self made losers without a cause worth preserving. A free market open to waste for profit

UN's Admission: Lebanon Was Right All Along
http://www.globalresearch.ca/index.php?context=viewArticle&code=COO20070816&articleId=6568

/ / Last month its cartographers quietly admitted that Lebanon
is right in claiming sovereignty over a small fertile area
known as the Shebaa Farms, still occupied by Israel. Israel
argues that the territory is Syrian and will be returned in
future peace talks with Damascus, even though Syria backs
Lebanon's position. The UN's admission has been mostly
ignored by the international media. \ \

Nazi zionists gave US Jews a bad rap again I see. They're
despicable criminal savages the neocon.. who steal the rights
and privileges of US peopled folks, all to fall victimized
with their self confessed contempt for love and justice.
Condi's crew dropped seven million land mines to murder
ourselves for generations, and, shouldn't she and the neocons
responsible be put to death for such conducts?? If not then,
when? discuss.. They openly target innocent human beings
indiscriminately without apology, but excuses that don't hold
water. Not that corporate news professionals are even
pouring! It's most definitely the re-occurring true story of
a censored mankind with You as it's innocent victim. For,
what human would support victimizing others for the tyranny of
blind terror? Only bushite amerika would fall silent under
such self contempt for our constitutions.

/ / [..]Israeli "Defense" Force (IDF) has announced that it
will discontinue its practice of "capturing" populated
Palestinian villages during military training exercises. The
IDF states it will "reexamine their policy" of conducting
such raids on uninformed, panic-stricken Palestinian villages. \ \

Tell me, is this the godly people the neocon boast of for
defense in? Or, just again examples of standing terrorism
against life ourselves - committed by the censored as will
giving, sacrificing American payer? Justice is Freedom.

Do you care to buy the bushite lies, when they commit openly
the very same terrorist acts they say we should all be
outraged against? Somalia is a case to point. They murder
helpless people as bushite, then say they'll remain dying to
thieve further as enemies to Humans being. It doesn't fool
me, but perhaps it does you. A neocon soldier murders
innocent Iraqis, while selling you they are all there risking
their lives to bring freedom. So, they die. For lies. Die.
Again, KNOWN Aegis goons openly commit crimes against Iraq
done officially to get killed! the supposed to be Patriot
Marine. P2OG. Soldiers under bushite command would rather
die cowardly, than to honorably demand the bushmob's arrest
for public trials as defeating ungodly fascist war criminals.

Why suffer otherwise this way under the tyrannies of naked neocon plunder to deny our lives for measured justice I ask YOU again, please believe: truth will set us free.

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

I can't understand why you can't help get this party up as starting by supporting our rise to highest acclaim with my authority free willed to anyone. Let's face it, we're great because Your great. However, for greed, corporate america aren't taking our concerns nightly. We want Justice, and WE will get it if we reflect together with impeccable credentials as standing with measured reason for proper assessment on rights making might. Who is who here, a freeing peoples I tell you, arriving to bring a true patriotism to Life for US. Are you with yourself as respected an equal under the law devised fairly for all concerned parties?.. well then... let's g o ! ! !

be Great!,

Examples: Aegis, Condi's land-mines, fixed elections, torturing. driving over children, blahblahblah..

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

"You can basically kill anyone you want"

/ / Just a "few bad apples"? I don't think so, this is much more widespread from what those soldiers were saying, and SANCTIONED. \ \

Look, a bushite would kill an American child too. When or will Americans become American? Death to the bushite, death to the enemies of Man. Again, national bushite broadcaster, George Norry stated he'd go ballistic against any American soldier who refused to murder for the neocon as traitors, and "America" STILL refuses to speak in their own defense for dying. Death to the bushite, death to the enemies of Freedom for America.

/ / "as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.] \ \

Look, listen to soldiers who sing about the joys of murdering innocent young girls, see their faces in the videos celebrating the murder of girls LOVED by GOD and ME, and question: Why won't you as an American assist Christ in the glorious hunt. Nothing better in this world than to bill a murderous bushite who claims it's lawless to this suffering Universe, ruled criminally by the demon antichrist enemy of ALL HUMAN LIVES. Pro-mass murderer war criminal Kristol once again, speaking
freely to Jon Stewart unchallenged internationally on Our TVs
as "Two Jews" stated..

"We don't believe in original sin."

Colbert half an hour later, "Are you calling Jesus a liar?"

Now, that's funny..

See? Jon Stewart isn't Jewish, for he's not black, and he
speaks no words in defense of the innocent robbed and murdered
in his "Jewish" name. A Zionist! He wants to sound our
public voice silent where a Hitler or Kristol marches innocent
others into gas chambers by calling ourselves terrorists
without a thread of evidence to thieve from as unworthy. Few
know, Hitler was a staunch Zionist too. The excuse would be,
but G-D is worse.. because, as the "Two [atheist] Jews", they
can commit no sin against Christ by trumpeting demon evil lies
as if, we have no stronger indivisible arguments present in
OUR defense ever for Just causes. AND, he's near the best our
American national TV media has to offer!

I believe, Jon Stewart suffers from
the ignorance of Celebrity more so, than a genuine hatred for
Humanity.. as that is the fault of most TVed Americans.
Nothing more greater than getting on the boob tube, to really
make your mark on this fleeting world as they sell their life
away for nothing but the privilege to be recognized at a gala
swarray.. fed on the victimized innocent of Humanity left
robbed as worthless their grand stage. His show is often
quite bright however, and leastly, reminds people, that CNN,
CBC, and FOXNEWS isn't the be all and end all of respect for
US caring viewers.

but looksee.. EVIL is real though -

THINK of how Truly evil a person would be to lie for CNN
on this issue.. a "Jew"? would do this?..
A "Jew"?

/ / The inflammatory words MEMRI blasted the US media with
were when the young caller "Sanable" was supposed to have said
"we will annihilate the Jews" were not even mentioned by the
caller or by anyone else in that clip. \ \

SEE! A ZIONIST SAID, "we will annihilate the Jews"

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=25994

/ / When hundreds of millions are calling for the
extermination of the Jews of Israel this is more than a lie;
it is a blood libel. \ \ This is like satanic neo-nazi EVIL no?

No? eh... No? eh?eh?eh? ... no? huh? heh. No?. huh..

See? Zionists are nazi betrayers to GOD ALMIGHTLY, for they
believe we do not have any power great being Loving for
others. You WILL see how GREAT we destroy the bushite, then
you'll know what joy love for god as innocence is. And then
You'll know for sure, how WE truly are as Just and Free.
And, kinda scary Being all godly and such..

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected
governments all over the world. and he [Richard Perle] comes
on your program to prattle about democracy. These people
don't want democracy, they want slave governments. If it's a
slave dictatorship - that's fine. If it's a slave elected
government - that's also fine. The only thing that matters is
that the government is a slave government. That is why they
will never invade Egypt. They will never invade Saudi Arabia.
They only invade countries, or threaten to invade countries,
who stand against them and who refuse to be slaves to them.

That is why they hated Iraq, that's why they hate Iran. That is why they hate Syria. Of all the faults of all the three regimes in these three countries - they were never slaves to the United States, and that's why they were attacked. [...^] In Iran, 17 million people voted for the president, Ahmadinejad, and 10 million voted for his opponent Rafsanjani. Those 27 million are determined to exercise their right to nuclear power. The response of Bush and Perle is to threaten them with invasion. These are the people who murdered Salvador Allende, the elected president of Chile. These are the people who have overthrown elected governments all over the world."

http://www.thetruthaboutgeorge.com/

Perl of wisdum 'yeah so? Peenackers steal the rights of freedom from people for stolen profits - we rob Americans of their freedom, as is their pocket books, and their wasted effort, all easily conned to be sacrificed for death by false conclusions trumped up by a naked false accuser who will accuse yous lost blindly as the innocent sucker - er.. 911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is a hit piece that involves, you know, saying that we're all blaming the Jews, or the Zionists, or something ridiculous, where we go after an ethnic group, [Jason Bermas suggests "Jews" = "Zionists"?] 'we' can not be associated with ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are Jesus now. They have people saying it's space beams from Pluto. And folks, I've tracked these people, they all were formally in intelligence, or connected to the Bushes, the space beam thing came from a almost cabinet member level Bush member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of which he's not as of yet, invited me on as official guest, for fears he can find no arguments against US I presume. 911 financier Ahmad = al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling is as only a puppet, look away! look away!, leaving without challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to

indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

Ron Paul Loves Ron Paul!
http://youtube.com/watch?v=eAvt7BdvJiM

"If you happen to be working for a big company, or the government, you get health benefits dirt cheap.[?] But if your trying to make it on your own, and you don't have insurance, you might be charged two or three time more than the government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib, and was bankrupt from his near $250,000+ bill for, for private "free market" health care. Money demanded that doesn't go to the doctors, nurses, or "public" hospitals. So what is Ron Paul saying about Ron Paul? I'd wager, he doesn't know himself, and fears like FOXNEWS from open debate of those who try to teach US to walk through his own argument, (or follow

the money (al-Qaida=Ahmad)) and find the fault of all proud blind Libertarians. Look, don't you want the best service possible for the dollars expended? Why give your BASIC health care treatment dollars to a do nothing shareholder, or hedge fund CEOer for procedures, who's success is not made better by needlessly increasing the costs for nothing but selfish sicko greed by bribe payers. Again, rarely are those that "earn" billions in public health care, care givers, but takers. Someone ask Dr. Ron Paul, or Ross Perot, why those with leverage, are able to negotiate better deals through intelligent design, leaving others as single payers, (poor unrepresented pension people,) to flip their expenses? Do we want to publicly sanction screwing over the poor with ignorance, to feed the pay no taxes either, talentless as lowly, highest ranking rich? I suppose if it means radiation treatments.. anti-psychotics or, the play time of genetically altered vaccine strains of true quackery, as has to be done trustingly religious on someone for our money. Money lost as investment on privilege in the market equation of lowering the human capital available to maximize the de-profiting of our shares for nothing but money grubbers. Again, Americans pay TWICE as much as Canadians per-capita, where for those dollars Canadians get full coverage, while Americans are then expected to go out and buy insurance now. TWICE. (Did you know that DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your placated peace of mind is perturbed.,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like

production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of wonderous tragedy?, Jeeze..

P.S. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com = alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high treason in America if we were allowed to freely say as much on our radios and TV networks. Al-Qaida = General Mahmoud Ahmad

That's what I'm talking about.

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw in some bonus cash, an a Freedom medal from all lovers of Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. Fight back for your neighbor, fight back for America, fight back for YOURSELF. Or, don't.

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it

hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Just look at that my friends of Earth just look at that. Americans speak only contempt for the value of human life. Every day, INNOCENT Iraqis die by the criminal actions of the demonic neocon enemy forces of EVIL, and our deaths as the god loving mean nothing. A small few die in a bridge ACCIDENT, and every corporate channel devotes the entire day's news as it. Allawi confesses to killing children for "CIA" money, and there, as with the soldiers who braggingly, beat innocent children to death for sexual pleasure, bomb people indiscriminately, or steal all the humanitarian aid, don't command your slightest concern as impartial paying for it TV viewers. They say, US people who aren't "Americans", do not deserve due process, the freedoms they claim to own exclusively, of which WE, are granted nothing of. See?, by not using evidence to from your guilty verdicts, how can it be therefore possible, to know, you've arrested, tried, then executed a mass murdering NEOCON war criminal? I don't think

Americans could possibly be more disrespectful to God and country, Johnny and Justice right now, do You?

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

The action of Satanic bushite bombers targeting Samara as war criminals is FULLY documented.

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US as proxied, innocent peoples purposefully enslaved by a made ignorantly entranced TV audience that is repeatedly reminded, we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently, but just lie and tell US they do. BUSHITE, THE ENEMY

It is not just a Muslim who sees the bushite as an enemy to Humanity. These lawless savages have been acting without accountability to anyone, because they are largely enemies of America, who cowardly run from responsibility in America to defend their own brothers and sisters from the neocon, and die instead as/with rapists, torturers, and THIEVES.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

/ / How can those who want accountability be termed anti-Iraqi? only through cowardly liars, is an American told America's not going to hunt down those who stole in their names as neoCONNED for dying. \ \

Jesus man, do I truly hate these zionist nazi thieving LIARS on our magic TV shows who con our kids to die as bad guys. How about You?

These naked LIAR enemies who bank to thieve more from Iraq, Afghanistan and America, must be brought down by Humanity's ultimate triumph over tyranny through Law. A just law, where those accused without any evidence are Innocent, and WORTHY yOur defenses.

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to testify to Congress because Congress, in fact, doesn't have oversight abilities."

IT LOOKS like they are going to attempt making the move of BLATANTLY TREASONOUS war criminals acting to measurably now destroy yOur Freedoms in godless America. The Satanic neocon's 'faith', is in that YOU as an American, will watch the same corporate drivel that offers next to nothing to empower YOURSELF to speak Justly for a dying America. Instead of demanding 24 hour, wall to wall news coverage, of war criminals going down one by one by the will of Man to Justice, CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that you are only a impartial viewer, who doesn't really care about dying right in front of yourself for the zionist's riches, and

great worldly power of tyranny through lawless nazi bushite
censorship.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in

Jesus man, do I truly hate these zionist nazi thieving LIARS

How about You?

/ / If Bush and his PNAC buds are innocent, then Investigate
911! What have innocent people to fear from a fair, complete

They are guilty, so, of course, the demon Bush enemy,
OBSTRUCTED JUSTICE FOR AMERICA.

I hear the national radio program Coast to Coast is still

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as

sometimes, is terrified of those who seek the requirements to
defend freedom directly, as more specific. (Example: NWO
isn't the name of the specific guy who financed 911 to murder
America.) So, as a consequence, he gets near ridiculous with
labels applicable to generalizations only dummies could
believe blindly. With Kucinich campaigning on ACCOUNTABILITY,
Alex Jones looks quite foolish. But, he's still trying.
Thank god for that. Thank god for that. Talk radio in
America should take open line calls on our ideas about how to
actually plan to defeat these, found factually to be, traitors

Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price that British trained policemen had tortured prisoners to death with drills, we discovered, through the New York Times (!!), that American intelligence officers had been working alongside them at the Jamiyat police station \ \

Death to the zionist bushite enemy forces, death to the ungodly enemies of Man who torture innocent people to death for fun - expecting Johnny's America will not raise a word in defense for the Human race, or our guns to defend our loyal brothers to the cause of Justice. Death to the bushite, death to God's enemies who lie cheat and steal from Humanity to assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal agreement so that we never again face these baseless allegations," he said. Thirty Afghan detainees have claimed they were beaten, whipped, given electric shocks and denied food once they were transferred to Afghan security forces by the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope pushing cop killers, who murder innocent people they call 'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN MILLION landmines on our cities to kill our children for decades indiscriminately, while offering our Humanity to God no apologies. Proudly kill the bushite savages all to desperately survive ourselves creating a better world through fair, free market communications. To warring for Liberty as true Freedom wills, is for Justice understood as measured, not just made up out of nowhere for the pleasures of those truly Satanic. So spoke the King of being the wisdom we here revealed by statement of timeless fact. Good will triumph over evil. That's that.

-

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when saying "slam dunk" - that, selling the war to the American Joe, without establishing any real facts would be easier than anything against the powerless as media unrepresented!

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around them, they couldn't care less." Instead they kill unarmed innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide distribution and production of heroin, tells of murdering innocent farmers, that would never raise a gun in anger, are those they openly confess to target for first degree murder as labeled the, second tier Taliban. That's when not defending American Pension thiever ENRON'S pipeline managed under their extremist Muslim fundamentalist regime of intolerance for public communications, as the continuing thieving of 80 percent the Humanitarian Aid given by Canada to feed the STARVING, and school our children of the impoverished Afghanistan, as so reported. Eighty percent. 80. 80 percent stolen. I'm telling YOU: CBC couldn't care less about what Canadian soldiers are actually dying as COWARDS for: "Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime" CBC national radio management needs to be arrested in Canada for high TREASON. Please, be a Patriot, and demand these zionists allow open communication with the facts to save the lives of Canadians soldiers they hold in contempt to die as the bad guys committed to no better good.

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous

bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish a person's guilt or innocence? for ungodly terrorist activities committed in our name by bushite bombers from the neo-conned AIR FORCE, who, as rotted juveniles, cheeringly bomb us People indiscriminately leaving a Church as something TRULY SATANIC? To dare, in our presence, continue threatening harm against an innocent child of wonder, not yet even born to God's suffering world? Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

Pro-Torture of INNOCENT PEOPLE McCain "Insensitive to what? The Iranians? My response is lighten up and get a life."

As US State Attorneys?, whom have the most serious of American Justice Department Motions of Defense for REAL Freedom?, he's not concerned directly with?, nor would "like" democratic Peoples to be allowed to care either?. IF he gets HIS way he says - as minding for the criminal master. True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS, while George W. Bush personally stole 50 billion from America in the first four months of stealing the initial election.

/ / "I grabbed her
little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite enemy and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children pratically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE

enemies of Humanity to save the lives of our precious loved ones.

So, the demon liar bush tells US, the terrorists would rather travel to Iraq to kill Americans indiscriminately, than come directly to America from wherever instead, to kill anyone who silently supports the indiscriminate murder of our humanity.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun,
paid for by the silent American tax payer. Americans refuses
to bother making a simple phone call to Coast to Coast to
raise some concern. THEY don't. They refuse to hunt bushite
down in their streets for death to defend the innocent held
indefinitely against GOD'S will. Death to the bushite, death
to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but
will smile while watching your son or daughter sent out to die
CONNED by their demonic hatred for US freely communicated.
How do I know this? I made the effort of making the phone
calls.

"Al-Qaida" = "General Mahmoud Ahmad"

Defend freedom, and the FBI, by demanding Coast to Coast radio
hosts allow free communications, absent their personal
contempt for preserving freedom to be our America. George
Norry WILL kill Your American child for the contempt he truly
holds for our lives here. He says he only supports murdering
Arab children for the neocon, but when your not looking in his

'shadows', he'll kill your child too, don't doubt it for a
second.

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they
serve freedom lovers dedicated to defending America from
willful criminality. But, americans are too stupidly weak to
demand Coast to Coast hosts allow open communications on
America's highest of concerns. Bushite america would rather,
in silence, thieve from God as our Humanity, than serve the
protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the
Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be
killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command]
said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked
bushite tyranny is won EASILY through communicating
understanding. The tribal strategy of Afghan fighters, where
Allah is Oonerroh, seems to be not the only thing missing from
the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top
top top leader. Only "second" to Omar the Just. (Apparently
an individual this current bushite incantation of "Dadullah"
is totally un-familiar of.) Omar, the Just, whom Dadullah
claims he receives his Top Secret nobody can see'im orders.
In other winds: Bill a bushite for God and America, an all
day long you'll have good faith in a world freeing ourselves
of godless dumfuk tyranny implemented by the horribly foolish,
as deeply ignorant of Allah, bushite demon liars for the
traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering?

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're

going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering
answers to any question on the science of God as is pertains
to Justice measured, but this is just who I am to be conscious
man. So, if we can get over the shock of me being so
especially normal, maybe we can then realize, I have some
simple good old ideas that transcend through time by rational
understanding communicable between any two people. I am not a
"miracle worker" to all those I advise to not eat Aspartame
because it's a poison that also makes your body crave
un-needed carbs, that will likely convert to more unless fat.
So, it slowly kills you, while making you fatter than you need
be along the dead end journey faithing in "the system". So,
why do some do it religiously? Who cares (for now) but to
say, our governments are failing US miserably. I spoke
personally with one of the head scientists in Canada at
"Health Food and Safety", and he told me the scientific
analysis done by reputable scientists I found freely available
repeatedly on the internet years ago, was completely true.
(It breaks down to formaldehyde, and methanol (a slow lethal
poison), among other shockers. Poison. P-o-i-s-o-n-s in our
food stuffs. Poisons.) However, he could take no action to
defend Canadians "officially" because we, Canadians, have our
corporate interest news departments completely refusing to
defend ourselves from corporate exploitation anywhere, and as
natural consequence, we, as the dying world, would together
unrepresented, probably lose a law suit from mutant Monsanto
through the self inflicted bounds of OUR censored WTO program.
- instituted through the top secretly mastered puppet people
persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite

what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for
Bush are officially deemed lawlessly unaccountable to
anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency
water provision money

Look: Sattler OPENLY committed the worst war crimes of
all Humanity's history

Support my cause, which is your cause.

Senior Military analyst, Rob Riggle "In the field John, the
soldiers are out there, every day, risking their lives, for a
common Ideal: that none of the President's decisions be
questioned."

This is more true than a bushite would admit before murdering
a honorable father to rape his young child, like Lcpl
Boudreaux freely confesses. Boudreaux will tell you, openly,
you have to murder the Arab father of the Arab child your
planning to rape, because if you don't, that Father will spend
the rest of this life, hunting you down in the streets to rip
you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that
Father's intent to bare on lancing Boudreaux, and any other
who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for
the neocon are all Heroes.

Please, my brothers, join me in hunting each and every bushite

will never end, until we have seen each and every responsible
child killing bushite present brought to true Justice extreme.

indiscriminately for a distance of six miles, while likely,
secretly masturbating each other as bushite liars do always.

The pro-bush irrational military said only eight innocent
un-armed Afghans were counted as murdered deliberately, by
those who believe our Mankind, can not ever find themselves
accountable, without zionist controlled, corporate news
permission. See? The military counts mankind as zionist, but
I am a man of real men, committed to defend our world from all
enemies, foreign, or domestic. Unlike a bushite traitor to God

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege. Coast to Coast radio hosts need to be publicly challenged for debate they deny US knowing of together naturally speaking. Great example of our Problem: CBC National Radio, in Canada. When a caller phones during the very rare moments we're taking public words, have a pre-broadcast rig-a-ma-role question session, you'll have with not only the OFF-AIR screener, where he'll probe you for controversy, but after the first process of noting in book form your disclosed intel, will notify you that; IF your independent thought is granted by the "Producer" (- who reviews everyone - rules are rules -) Our national station will phone you back this afternoon, so stay tooned, to line you up with your baking gingerbread creds. They never ever dido! The more Brilliant you are, (like the highly charged as extremely charismatically charming, wild man ruler, Johnny America - the media phenomenoner) the higher probability they'll find POSSIBLE concern, on their do nothing for your taxed attitudes..!. Why take chances someone might show a greater living responsibility to a real suffering God as our left corporately forsaken Country?.?.?. A dying Humanity.

Look, seriously, my friends, we have all the answers to our problems.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege of equal standing.

Get it done brother.

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

Let's do this.

Don't let these neocon zionist bastards doe this to US.

Any Commander that doesn't support the arrest of those
responsible for 911 and the subseqent neocon war crimes of

Iraq, is a traitor to God and Country.

How much much God take as taken, before you people get on over this criminally empowered war monger Congress of an unelected lawless dictator demon, and call them out on the turning talk commercial radios, all to finally truly defend ourselves with a good media plan for results.

-

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going

into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

I notice that in the fourth segment of the 9/18/94 Dr. Demento Show (posted as a binary to the comedy and dr_demento mp3's groups) a Kim Elliott (spelling?) of Evansville, IN requests "The Cockroach That Ate Cincinnatti" and I wonder if this is the former Voice of America host and current audience researcher for the VOA's parent agency, Dr. Kim Andrew Elliott.

Thanks to the 'net, our sins never die.

Not necessarily. Some FM stations, like the ones on the Hancock in Chicago,
have separate HD transmitters and antennas, and the analog transmitters and
and common antenna are untouched.

Many individual stations have separate FM HD transmitters and a separately
hung antenna.

No, they don't. KLVE in LA has HD, HD-2, SCA and FM Extra.

News for ya' is that what most retirees get from the government, Social Security and Medicare, we paid in. It's an entitlement... about 16% of monthly earnings up to a little over $90 k this year, plus Medicare deduction... for every working year of your life.

Retirees paid it in; if the government administered it badly, that is not the retirees' fault.

Neither statement is true. Many cities have much less AM listening than
Houston, and I listed a half-dozen at random. Smaller the market, less the
AM listening in most cases.

And, around 1976, any number of markets swung over 50% FM... Houston did not

Here are some newer ones:

"Night of the Bees"

"Radio listeners across America are trying to hide from a monster, but there is no shelter. After spending its adolescence in technical trials during daytime hours, IBOC has now come out at night... For example, in New York City, WOR broadcasts on 710 kilohertz. When it turns on its IBOC equipment, the digital noise it produces can be heard on 690, 700, 720 and 730 kilohertz with a reduced fidelity analog audio signal remaining on 710..."

"AM HD Radio 24 x7 as of September 14, 2007"

"The HD Radio Interference, we will coin it HDRI, is characterized as a loud obnoxious frying egg noise on top of an AM radio station's analog signal. Here at PopularWireless HQ the kitchen is open and the eggs are cooking big time. A favorite here has been New York's famous WABC where many enjoy listening to Coast-to-Coast AM in the early mornings. WABC is now plagued by HDRI making listening impossible at times. Across the AM dial the analog receiver is sizzling away."

"Digital Signals Spark Static From AM Radio"

"A growing number of radio listeners are encountering similar interference -- hisses, whistles or static -- on their favorite AM stations. The problem for WTRI began about a year ago, when Bonneville International Corp.'s WTOP, the AM station at 1500, began using a digital signal that interfered with WTRI's analog signal in some broadcast areas. It's one of the unexpected consequences of the radio industry's transition to digital broadcasts."

Brenda I've explained this to you before.

We have stations in New York that are running two HD programs plus
audio SCA signals on BOTH 92 and 67 khz. And the SCA stations sound
just fine (for what they are).

WKTU 103 is one of those and ditto WNYC-FM 94. You don't lose your

Listeners do not care about the the trasmission medium of analog
versus digital for terrestrial radio - this is why interest is slowing
in the UK, and interest has stalled in Canada and the US.

Listeners do not care about audio quality, but program quality - it
is the music formatted FMs that are screwed from attacks from iPods,
cell phone music streaming, and personalized music services such as
Pandora, Slacker, and Last.FM - news/talk/sports/ AMs are highly
rated. You have it ass-backwards.

Music formatted FMs are screwed, as they have lost Gen Y to iPods,

Then you apparently don't understand the difference

you should cease cross-posting.

You exhibit the kind of behavior that gives Google Groups
a bad reputation. People are starting to automatically
filter out all postings from Google Groups as *noise*.

701. GAO slams the FCC - do I smell HD/IBOC?

Newsgroup: rec.radio.shortwave

The General Accounting Office has issued a report slamming the FCC for leaking information to companies and lobbyists while leaving consumer advocates and the public in the dark. The study found lobbyists are given ample information on when (and sometimes how) the agency plans to vote, while consumer advocates get no such insight.

The study notes that timing is everything, and lobbyists given a three week warning on a vote can determine precisely when to apply lobbying pressure. Doling out such information "undermine(s) the fairness and transparency of the process and constitute(s) a violation of FCC's rules," the GAO said. We are recommending that FCC take steps to ensure equal access to information by making sure that nonpublic information is safeguarded from disclosure, and to determine what actions FCC should take if a prohibited disclosure is made, so that all stakeholders have the same information to inform their participation in the rulemaking process. FCC took no position on our recommendation.Of course the GAO has also been complaining for years that the FCC's data on broadband competition is immensely flawed and the FCC has done little to fix it. The GAO's latest report also criticized the FCC for using external organization data instead of conducting more of their own internal studies.

"When the 'corporate insiders' and 'K-Street' crowd have the inside track on decisions critical to telecommunications, media, broadband or wireless policy, then the public and consumers, are at an inherent disadvantage," says Rep. Edward J. Markey, chairman of the House Subcommittee on Telecommunications and the Internet in a statement.

Last month, while Google and Verizon were battling over 700Mhz broadband spectrum, FCC chief Kevin Martin leaked limited parts of the FCC's auction plans early, apparently to influence press coverage. According to FCC rules, the content of agenda items - such as draft proposals - are "nonpublic information" and "shall not be disclosed, directly or indirectly, to any person outside the Commission" under penalty of possible termination."

Then why have news talk stations all over the US moved totally to FM or are transitioning with simulcasts? The answer is that they get a big increase in 25-54 listeners when on FM, as the under-55 crowd likes the programming, but hates the sound quality. When they get it on FM, they listen.

And AM news talkers have about 60% or more of their audience in the 55 and older demos, which is not an age group with much, if any, sales appeal.

Heck, just this week a 50 kw sports AM in Detroit moved to FM... because they want to appeal more to younger-than-55 demographic groups.

The expense, once installed, is minimal.

Vastly greater than the expense of streaming audio via the internet.

I'm sure glad that the radio industry can afford to just toss away the
largest segment of the population, with the most disposable income. No
wonder so many businesses are going under, if that's the way they do
business.

55+ is not salable to most advertisers, specifically agency clients with
demographic dictates that nearly 100% do not include 55+.

If there is no revenue, there is no market.

Advertisers have their reasons, and most are based on return on investment
which is almost universally poor against 55+.

Edweenie, it would seem as though 55 is your favourite number.

It would also seem to be the age at which you adopted the 'Eduardo' shtick.

But he is right. At 57 I fall neatly into that demographic. I have a
great disposable income, but I choose not to dispose. I can't remember
the last time I bought something with a "brand". We just aren't as
gullible as the children.

It's probably also the number of academic degrees he claims to have,
though that part of his website shifts like the sands depending one

Nevertheless, too much Christian is sure to be the doom for American
Shortwave Broadcasters. As a nation we pontificate enough as it is. The
irony of the Prime Directive on Star Trek. Never interfere. Odd wasn't
it that virtually every planet they went to, they changed the populace
to suit the needs of the Federation.

Did someone realize even back then that this would be played out in
later years by our country and it's fickle Regime Changes. And the
remaining Shortwave Shows, they are given prime times and good
frequencies if they disparage Muslims. Look at the "Right Perspective",
this is real fare for a Christian Station. The ex-cohorts of Hal Turner.
This is, without a doubt, the most ironic show that I have heard on
Christian stations.

The odd thing about the Christians is that they hate each other as much
as they hate the Muslims. If you don't adhere to the exact belief system
that they (the Christians) have, you are going to be damned. Sounds like
the Star Trek stuff, no tolerance for other cultures that don't adhere
to the Federation beliefs.

So we have Religious Broadcasters running interference for Israel by
putting the political shows with views not favorable to Israel on
obscure stations that broadcast to the north pole. Essentially that is
what happened to Stadtmiller's shows. I have the broadcast pattern for
12.180 and 5.050. Due North.

After listening for years to the Alex Jones show and the Power Hour, as
they have increasingly been critical of Israel, they somehow magically
no longer have sufficient signal strength to be heard at my locale. Odd.
Problem is that almost all of the political shows are now critical of
Israel. (except the vomitus bubbly Christian shows where the hosts speak
like Ned Flanders and his wife, any casualties of U.S. Citizens to
promote the interests of Israel are fine in their book).

So here we sit, Political shows gone, (except for Monday and Wednesday, Pat Kiley is on tonight at 0000 UTC). repeated religious shows and shows with dead hosts abound. Great work broadcasters. You're destroying Shortwave much faster than it should have occurred.

Sputnik Special Event Station Scheduled (Oct 2, 2007) --
On Wednesday evening, October 3, AMSAT will host a
Special Event Station commemorating the 50th anniversary
of the launch of Sputnik I. Listen in on satellite AO-51 as it
passes over North America to hear original Sputnik
telemetry. On October 3, listen between 2350-2358 UTC; on
October 4, listen at 0127-0145 UTC, 0308-0326 UTC and
0452-0503 UTC (all times approximate). The downlink
frequency will be 435.300 MHz (plus or minus Doppler shift);
the downlink power will be higher than the normal repeater levels. For those who

send in reception reports, AMSAT will return a QSL certificate. Please send a 9
ï¿½
12 self-addressed, stamped envelope to Kevin Schuchmann, WA6FWF, 3375 Taper
Ave, San Jose, CA 95124. Please allow several weeks for processing. -- Drew
Glasbrenner, KO4MA
(via arrl.org)

The downlink frequency is FM modulation.

It reminds me that there are still a lot of people out there with a genuine interest in radio, who appreciate the beauty of it and the science behind it. 'Nuff said.

No, the manual does not state
"DRM has a hybrid digital/analog mode".
A simulcast is not necessarily hybrid.
I also cannot find any affirmation on your statement
Notice how the DRM sits "in-band on-channel".

RHF dumb?
Don't think so.
Take a good look on that page 20 of the manual.

[quote]
DRM supports a number of different simulcast options. Currently the
supported simulcast modes require the use of additional spectrum outside
an assigned 9 or 10 kHz channel (Multi-Channel or Multi-frequency
Simulcast, MCS). The DRM signal can be located in the next adjacent
upper or lower channel and can occupy a half or whole channel
depending on the bandwidth option chosen.
[unquote]

So far nothing about IBOC.
In general, a simulcast is a simultaneous transmission of the same
programme. Here, both transmissions are located in two adjacent
channels, the DRM transmitter operating with less power than the
analogue signal transmitter.

[quote]
(..) a satisfactory compromise can be obtained when the DRM power
level is around 14-16 dB below the adjacent analogue signal.
[unquote]

Unfortunately, operating on two adjacent frequencies (channels) may
give rise to interference problems. With IBOC no such problems
would occur, isn't it?
Now read the following about a possible DRM-future...

[quote]
In an ideal world it would also be possible to transmit both an analogue
and a digital signal within the same channel (9 or 10 kHz) so that the
analogue service could be received, without interference from the
digital signal, on any analogue receiver.
[unquote]

With only one transmission there would be no interference,
so in the real world anno 2007 interference may arise and
DRM is not IBOC.
The statement "DRM is not IBOC" is also apparent from
some other quotes from page 20:

[quote]
(..) promising proposals for a SCS (Single Channel Simulcast)
option are currently being evaluated (..)
Even if single channel simulcast may prove a difficult goal to
achieve (..)
[unquote]

DRM is not IBOC,
correct me if I'm wrong.

Make it: all DRM broadcasts.
A simultaneous AM transmission on an adjacent channel
does not make the DRM transmission less digital.

For the 50th anniversary of Sputnik 1, AMSAT was broadcasting a
recording of the Sputnik 1 telemetry via only three passes of AO-51*.

Heard two of the passes, the first at 10 degrees maximum elevation and
the second pass at approximately 40 degrees elevation. For the first
pass, copy was fair using dual band 144/440 mobile transceiver with a 2
meter 1/4 wave mag mount. The second pass, as you wold expect because of
the higher elevation, was quite a bit better. QSL details at arrl.org or
AMSAT.org

*AO-51 is a "micro sat" launched from the Baikonur Cosmodrome in 2004.

Has anyone else heard that BBC is considering resuming shortwave

listeners still listen via shortwave and that the pace of decline is
slowing to a trickle. This might mean a resumption of broadcasts that
were hastily cancelled with little thought?

Putting GOOD late night programming on would be a hell of a good

Thank you for your moral support. I have grown so used to being attacked and ridiculed that it no longer bothers me. I regularly receive death threats from members of the shortwave newsgroup.

Generally speaking, the demographic here is that of a generation born when ignorance and intolerance were the rule and any one different from them are demonized. Exhibiting no capacity for growth, they pass along their cultural wasteland to each succeeding generation because, unfortunately, they breed.

It is no mystery why the radio hobby is dying a slow death. It is dominated by dinosaurs that make anyone who doesn't share their particular viewpoints and prejudices unwelcome.

Instead of encouraging my efforts to bring folks into the shortwave hobby they use their time and energy to ridicule me.

I've stopped counting the number of people I've encouraged to learn more about the shortwave hobby by reading this newsgroup only to be told that they are turned off by what they've seen here.
And that is the saddest part of all.

HtH - I am so sorry - I can not correct you
-cause- you ain't wrong. ~ RHF

Yes HtH - You Are Right "DRM -Ain't- IBOC" !

SFTV -aka- "Hybrid Digital" Man,

Here are a few more thoughs to consider :

DRM 'may' have the Analog "AM" Signal along-side
'Adjacent-To the Digital Signal. {Two Unque Functions}
-NOTE- This uses up even more Bandwidth then
DRM alone.
-IMHO- The better approach for DRM would be to
have the separate Digial and Analog "Simulcast"
Signals 'spaced' 50 kHz apart so that each of the
two independant Broadcast Signal would have no
chance of interferring with each other; and the DRM
Signal could be Transmitted at Full Power.
-Remember- DRM is a single Mode of Transmission.
-Also Note- DRM Radio/Receivers are Manual

Single Mode Operation.

IBOC has the Analog "AM" Signal 'nested' in-between
the Two Outer Digital Side-Bands : By-Design and is
Bi-Modal 100% of the time. {Functions in Tandem}
-Remember- IBOC is a Dual Transmission Mode.
-Also Note- IBOC Radio/Receivers are Automatic
Dual Mode Operation.

d"Eduado,

Think about the Political 'import' of what you are saying.

* News/Talk Radio on AM/MW Conservatized
the Over-50 Demographic Groups.

* News/Talk Radio on FM could Conservatized
the Over-25 Demographic Groups.

Clearly the Democrats will Ban Conservative New/Talk
on the FM Radio Band { Except for Liberal NPR & PRI :o}

Just wondering where you heard that? It'd be good news if its so.
The African transmissions aren't always reliable, and the afternoon
Carribean broadcast is a bit early on work days.

It's interesting in that there seems to be a high dropout rate amongst Hispanics and that seems to carry over to faux Hispanics as well.

That's not very tolerant of you.

Then why do you tell them to come here? There are plenty of other SW
groups out there. You could even start your own on Yahoo. As group
owner you could crush anyone who disagrees with you, thereby insuring

an atmosphere of tolerance.

SFTV - Ever Heard of the Greater Good ? ~ RHF

Converting the old Analog TV Channels 5 and 6 over to an
Expanded FM Radio Band {76-88 MHz} and having all the
'new' FM Broadcasters start out as 50% Analog/ 50% Digital
would insure the transition to FM Digital Radio and help to
clear-out the AM/MW Radio Band for a new Band Plan :
Fewer Radio Stations; Wider Channel Spacing; More Uniform
Power Output.

A small loss for TV a Greater Good for FM Digital Radio
Broadcasting and the Future of Over-the-Air Radio.

Not the same. The FCC's decision to convert from analog-to-digital on the AM band does Not make the bandwidth any smaller. It's still the same size as always (530-1710).

But deleting channels 5-6 *does* shrink the bandwidth for television (and also puts several stations across the nation out-of-business).

Which is illegal. You should report it to (1) Googlegroups (there's a "report it" link on every message) (2) the person's ISP, and (3) the police of both your hometown and the poster's local State Attorney General or Police.

> Generally speaking, the demographic here is that of a generation born

I've noticed. Their brains are so old, they've turned into marble. They simply lack the ability to accept new ideas, and worse, they're not even willing to try. It's like what I said to one guy on this group: "I'll bet you were a lot more open-minded in your 20s..... before you grew old and set in your ways."

Well, I'm from Generation X, and we've learned to "live and let live". I'm a Republican which is supposedly a "close minded" party, but I've always supported the rights of the gay community to live however they want to live. Including marriage. (Who says it has to be only man-woman; why not man-man or woman-woman? I don't see any harm in that.) As Thomas Jefferson said, "Whether my neighbor believes in one god or many gods, matters not to me. It harms neither my person, my property, nor my rights. I will allow my neighbor to live as he chooses."

Jefferson was speaking of religious freedom, but the same principle applies to ALL things as far as I'm concerned.

That's what freedom means. To be able to follow your own "pursuit of happiness" whatever way works best for you.

Well said.

I've noticed that "flaw" in many different groups. I belonged to an
airplane club where all the members did was say, "That's not right" or
"The officers suck" or make new people feel unwelcome.

So I quit and went somewhere else.

If you knew anything about HD Radio (and it seems you do not), then
you'd know the coverage area will be the same as AM, once they turn
off the analog, and constrain the stations to 10 kHz per.

Right now, the biggest obstacle to Digital AM, is the backwards-
compatibility with analog (forcing the channels to be 20 kHz wide).
If the analog was eliminated, the channels would fit very nicely, and
there'd be no more overlap.

Advertising to people over 45 is a waste. They are "set in their

Crest to Colgate. Advertising to someone over 45 will Not persuade
them to switch brands. It's a waste of money.

If the accreditation boards are doing their jobs then the credits

Doesn't matter. Ruining the band is ruining the band.

Well said.

Advertisers favorite age group is 15-35, because they have NO brand
loyalty, and are easily persuaded to switch brands.

Advertising to over 45 is like trying to convince President Bush to
join the Democratic party. It's a waste of money, because the over 45
group are "set in their ways".

Yes, both HD and DRM have that flaw, because they are both IBOC.

That's in-band on-channel mode.

By that reasoning, HD Radio is not a hybrid format, because the
digital information sits *next to* the AM signal.

HD Radio is a simulcast format.

Okay. By that reasoning, because HD Radio sits "next to" the AM
signal, then it is not IBOC either. It is a simulcast format.

Fixed to be more consistent (changing only variable at a time). It
still makes no logical sense though. One DXer is still the same
value, regardless of how far away he is. (Which is not that much,
since he's not inside the local market.)

Yeah they shouldn't be using Digital IBOC at night. It should not
start being used for night broadcast, until circa 2015 when the AM is

See I gave in to his extortion and paid him off. He was a fool and left me a good feedback so I left him feedback accordingly. He emailed me back with the threat. Ebay won't do anything because it was not sent through their mail system, even though it is clear the radio-mart/ Martyn sent it to me. Screw both of them and spread the word please.

Thanks, craigm.
To be honest, by and by it occurs to me that this document is
intending to make DRM-IBOC-things look better than they are.

[quote, page 19]
The system is flexible in other ways as well, in that the broadcaster has
the facility to vary the occupied bandwidth of the signal to meet the
spectrum requirements of different frequency bands in different regions
of the world. This can include the ability to provide services often
described as IBOC (In Band on Channel).
[unquote]

What is meant by "This"?
If that is "a set of requirements", then the IBOC remark says nothing

about DRM.
If it is "the system flexibility", then why hasn't been written
"This includes..." instead of "This can include..."?
In that case the answer is quite simple: nowadays there's no DRM
in band on channel available, as is stated on page 20 (see above)
and on page 19 (below).

[quote, page 19]
A number of promising proposals have also been made for a single
channel simulcast option (SCS), whereby an analogue and DRM
signal together occupy a single 9 or 10 kHz transmission channel.
These proposals offer the possibility of a signal which is compatible
with reception on both analogue and digital receivers. Work is still
actively in progress to determine which of the proposals would
provide the best way of meeting this requirement.
[unquote]

Promises, promises...
So, until further notice DRM provides no IBOC-ability.

No, it's a lot more self centered than that. Radio believes that it has an entitlement to generate wealth by exploiting the public under a smoke screen of circular, semi statistical arguments.

What Radio claims,...and I can speak with some clarity, here, having been involved in the process for a good chunk of my career, even up to this last spring,...is that what it does is dicated to by the public, based on focus groups, perceptual research, and music tests in front of listeners. And that advertisers and listeners respond positively. What Radio doesn't tell you, is that the focus groups are highly selected from 'desirable' listeners, as defined by advertiser requirements and expectations, and those focus groups of highly selected 'desirable' listeners, go on to form, or define, the essential language used in perceptuals that are used in determining the formatics, playlists and production elements of the radio station to serve the 'desirable' listener.

Music tests, themselves are comprised of highly selected listeners to respond to songs, for the purpose of determining playlists to serve 'desirable' listeners.

It's a closed loop. Created to meet the needs of advertisers first. And then attract the advertisers 'desirable' listeners to the radio station.

Formats are specifically chosen to meet an advertiser's need.

Nowhere in the process, is the concept of 'serving in the pubic interest' apparent. Even ascertainment, at most of the stations I've been involved with, has been done with a closed loop.

So, Roy, it's a lot more than just a Radio believing it has the right to be paid for it's product. It's more like Radio believing the public exists to serve Radio and Advertising. And to select what will be and will not be acceptable for it's listeners, by manipulating its own research.

Jim Collins, in "Good to Great" said the hallmark of good research is that it produces something that you don't expect. The hallmark of GREAT research is that it gives you something you don't like.

Radio has neither been surprised, nor disappointed, with its research, since John Sebastian ruined KHJ.

Listen to how David Gleason presents his case...all based on numbers that are highly selected, and highly interpreted. Numbers, which themselves are based on responses of individuals that are highly selected.

Closed loop.

He hears nothing but what he wants to hear, and he responds with canned statistical noise resulting from his closed loop research. Waht's interesting, is if you watch, when he gets asked for something specific, for which a canned semi-statistical response won't work, he just stops participating in the discussion.

You can't get through to him.

Nor does he recognize when he's contradicted himself, and made your own point for you.

Which is kind of amusing. Because where Radio has dared to open the loop, risks have been high, but successes have been huge.

SFTV -aka- "Hybrid Digital" Man,

If you continue to argue that DRM 'is' IBOC : Then clearly some
people on this Shortwave Radio Newsgroup are going to call to
question your educational claims and technical expertise as
an "EE".

One Again Please Read :

Note- The 'operative word here is 'may'.

DRM 'may' have the Analog "AM" Signal along-side
'Adjacent-To {as an Adjunct to} the Digital Signal.
{Two Unque and Separate Functions}
-NOTE- This uses up even more Bandwidth then DRM
alone and DRM alone uses up more Bandwidth then
Analog "AM" alone.
PLUS - The DRM Digital Signal Level Must be 'reduced'

so that it will not Interfere with the Simulcast of the
Analog "AM" Signal.
-IMHO- The better approach for DRM would be to
have the separate Digial and Analog "Simulcast"
Signals 'spaced' 50 kHz apart so that each of the
two independant Broadcast Signal would have no
chance of interferring with each other; and the DRM
Signal could be Transmitted at Full Power.
-Remember- DRM is a single Mode of Transmission.
-Also Note- DRM Radio/Receivers are Manual
Single Mode Operation and you would have to Tune to
each of the DRM or Analog "AM" Signals independly.

BY-DESIGN - IBOC has the Analog "AM" Signal
'nested' in-between the Two Outer Digital Side-Bands
and is Always 100% of the time Bi-Modal.
{Always Functions in Tandem : Analog and Digital}
-Remember- IBOC is a Dual Transmission Mode.
-Also Note- IBOC Radio/Receivers are Automatic
Dual Mode Operation; allowing you to Tune to a Single
Frequency and Receive either the Digital or Analog
when available. {True IBOC and not just a Simulcast}

Please refer to the DRM Manual -wrt- IBOC

Now that is a generalization that my fit one company, but in every
experience I have, with a dozen research companies I have delt with, as well
as our own, such a statement is, if not an exaggeration, a lie.

Most listener research is done to best serve an existing format. So one
picks mostly one's own listeners.... and generally, those who listen a lot
(so they will know the music or format or hosts or whatever) and tries to
find what will serve them better. Some secondary listeners are picked...
those who may listen more to another station, but who also have enough
interest in our station to know about the music or the programming.

I have never heard the word "advertiser" mentionend in the recruit specs for
a music test or a perceptual. The usual things are: age (concentrated in the
ages where aobut 75% to 80% of the station listeners are located) sex (in
balance with Arbitron audience composition), ethnicity (a CHR in LA might do
half and half Other and Hispanic), and a minimum usage of the P1 or P2
station under study to insure knowledge of the station music or format.

Most radio researchers do not use focus groups. For music tests, most
research on ongoing stations is several music tests a year, to determine
what to play and what not to, and how often. Again, no advertiser
involvement, and the sales department seldom even knows a test is done.

>and those focus groups of highly selected 'desirable' listeners, go on to
>form, or define, the essential language used in perceptuals that are used

I have never seen this done this way. You may have. If you did, it was done
wrong.

Focus groups are ❓perceptuals, and perceptual research is based generally on
a combination of neutral questions with attention on low interviewer bias.

Most radio perceptuals are done on the phone, and are a combination of open ended, scaled and fixed response questions. The secret is in the cross tabulation of the hard data, like demos, and the frequency in each cell of a particular verbatim from an open ended question.

Format searches are the broadest, usually done by playing pods of many different kinde of music and doing a question set on like / intent / availability and canibalization questions. I've done ones with up to 17 different pods, and also done ones where a follow up with blends of pods were tested.
>
> Music tests, themselves are comprised of highly selected listeners to
> respond to songs, for the purpose of determining playlists to serve
> 'desirable' listeners.

The only desirable listener is the one who will listen a long time. The only filters are age, sex (are they where most of the listeners are), ethnicity, and hours of listening to that "kind" of music on our station or a very similar competitor. For example, WLEY in Chicago is going to test 21-39 year olds (that is where over 80% of listeners already are), 100% mexican (that is the format... Mexican music), 60% men (that is the balance for the format, for them and everyone) and mostly those who listen a minimum of an hour a day to them, or maybe 5 hours a week to them and 5 minimum a week to music on WOJO.

There is nothing desirable or undesirable there... just a snapshot of the listener and potential listener, eliminating those who do not listen enough to radio to know the music... because they could not score it appropriately if they do not know it.

Crest does not do research with people who wear dentures... there is always selection based on who will be the heavy users of any service or goods.
>
> It's a closed loop. Created to meet the needs of advertisers first. And

No such thing. I have participated in well over 100 tests from vendors, and have done close to 1000 projects myself, as well as an equal or greater number of call out cycles and a few hundred perceptual projects. None has ever had the word "advertiser" attached or implied.
>
> Formats are specifically chosen to meet an advertiser's need.

No, the only place this comes into play is in the knowing that there is no revenue in 12-17 or 55+ so we don't even look for that kind of format because it is not viable.

Finding out what songs the listeners want to hear is not serving? Finding out what topics and content morning and talk show listeners want is not serving? Finding out how often and what roads are important for traffic reports is not serving?

That's just plain BS. You started with a false premise that audience research is something that it is not, and took it from there.

The main purpose of music testing is to get rid of the stiffs. In talent testing, it is to get rid of negatives. In staiton testing, it is to find defects and correct them. That is the whole purpose of research... enhance the good, modify the bad.
>

I can take the best research and make a crappy station. Research is a tool. I can take carpentry tools and ruin a lot of fine wood too. It's also about the skills of the station staff.
>

No, they are not selected. If I say AM listening in LA is 17% of the total listening, 12+, how is that selected? The Arbitron universe is not selected, it is as close as possibly to a totally proportional sample, where everyone has the same weight
>

We do that all the time, with the aid of research. My overnight guy from KWIZ in Santa Ana now has about 3 million daily cume on 40 stations. Our "it won't work" Mexican adult hits is now on 12 stations and #1 or #2 Spanish language. My "it won't work here" 100% local artist rock station in Buenos Aires was #1 in a month, front page news in the press, and had never been done before in a market with over 250 stations (more than 100 LPFM equivalents, for example). We look outside the loop all the time. It is usually the listeners who tell us where to look.

The broadcasters will resist a digital changeover unless almost everybody has a digital radio. Otherwise they'd be throwing away part of their audience.

And it's not like the FCC would be able to auction spectrum for big bucks like they plan to do with the TV band. The spectrum available on AM is a sliver compared to TV, and what little there is has more noise and weird propagation. And efficent antennas are huge at AM radio frequencies.

Neither the FCC nor the broadcasters have much incentive to eliminate AM.

Many of the radio broadcasters are supporting the digital format, just as many supported AM stereo. HD radio might become a competitive advantage against the non HD stations, but there's no certainty just as there was no certainty with AM stereo.

Anyway, the broadcasters are limiting their risks with HD radio. They aren't yet running the sort of "A material" on the secondary channels which would attract sizeable audiences and sell radios. Why should they?

Why? If the people running the station think AM stereo will help attract an
audience they'll install the stereo modulator.

The people running the stations have concluded that it's not worth it.

Yeah, I don't have any real problem with pay radio. After all, stations
have bills to pay and advertisers are attracted to the young and credulous.

I do have a problem with the disingenuous HD radio hype campaign which

Your 'analysis' and 'reasoning' are Irrelevant.

Your 'research' is Flawed and It will NOT be Incorporated.

Your 'perceptuals' are in Error and They will NOT be Assimilated.

Your 'logic-and-argument' are Futile.

WYSL is a disgruntled AM. It is typical of why the AM band is increasingly
useless.

As long as someone can, or thinks they can, make money from a station, it will remain on the air.

A good example is 1070 / 1080 in Miami. The old WVCG was a competitive beautiful music station 40 or so years ago... as FM took over, it tried numerous other formats and ended up a while back as a Black talk station. It could not make money, so now it has been sold and will be paid religion.

Except for a couple of viable or semi-viable AMs, like 560, 610, 710, 940 and 1140, (1140 and 710 really only viable in Spanish) the rest of the AMs in Miami have become niche stations with Kreyol, Radio Disney, brokered Spanish and brokered religion on them. Some make a little money, some change owners when the last one runs out of cash.

Most AMs have been outgrown by their markets. And all are being out-aged by the audience. News talk is migrating to FM. This week we saw a sports talker go to FM. Eventually, the talk formats will also be on FM, and AM will be a bunch of brokered, niche and ethnic plays that will bring station values down and make the band irrelevant to most.

Supposedly XEEP in Mexico City is testing by having analog on its licensed 1060 and DRM on 1070, per the local broadcaster association. I have heard no reports on how this is going, or for how long it is scheduled to go on.

Since that wasn't an assertion, I'm not going to bother to respond to
that remark. And since you've missed, twisted and intentionally
obfuscated, my point from the first word, I'm not going to waste my
time trying to have a meaningful conversation with you. It's like
interviewing Johnny Cochran. He never addressed anything, either.

David, I truly believe you're smarter than this. I also believe you
need to be the only one in the room who's right. And as a result, you
debate points that haven't been asserted, distort to absurdity things
that have been asserted, to dismiss them without really addressing them,
and spin the rest, with what Eric correctly identifies as statistical
buzzwords.

What I also believe is that you're not interested in my opinion, so
I'll no longer offer it to you.

But I will thank you for having demonstrated every point I've made.
Even as unwittingly as you've done so. If you ever really want to have a

dialog, I'd look forward to the opportunity to talk to you. It's rare that I get to speak with someone with a mulitfaceted experience in the industry. Most I encounter have a few years. Or have worn but a single hat. Those are pretty short conversations.

Have a good day.

As a citizen of a planet that is a Member In Good Standing of the UFP & a graduate of Starfleet Academy, I must protest your slanderous comments. The purpose of the Prime Directive is to protect other planets from interference by the UFP as well as to help those planets that have united themselves ("grown up"), to introduce them to the larger galactic community & to offer membership in the UFP so that they can learn from other member planets, share in the resources & protect them from the hostile confederations that would take advantage of them or attempt to conquer them.

So there.

817. Sunspot Cycle 24

Thanks to all who suggested Web sites for monitoring sunspot cycles in answer to my query of some time ago. Most useful, and I have bookmarked several.
An excellent article on this subject appears in the Ocober 2007 issue of QST Amateur Radio magazine on Page 47. titled 'Wating for the Sun'. written by WB8IMY. Steve Ford. Thanks Steve.
I already use a vertical antenna, the Hustler 4BTV, ground mounted, for short wave as well as hamming. Very effective indeed and surprisingly a very low noise antenna. Very rugged construction, too. And the price is right.(No, I don't have any connection to the company or otherwise).

DUH

Run along and play in the IN BAND OFF CHANNEL STREET--esp. if the
adjacent frequency is a river or a cliff.

d'Eduardo,

? I am getting an IBOC Digital Signal Indicator -aka-
the "Blinking Blue Light" from XEKTT on 1700 kHz ?

- - - Radi-Osophy HD-100 Radio

XEKTT 1700 kHz - Tijuana, BCN Mexico
Excellent Audio and ? BBL ? ~750 Miles

Border area stations are authorized for HD, but did not believe 1700 had done it. The power is 10 kw day and 1 kw night. It's one of the Tijuana stations, like 1090 and 690, that truly keep to treaty notified power, per measurements done by an engineer in the market. The calls are XEPE now, and the website is http://www.cash1700.com/

If you get many Mexican stations, you may like to keep this link handy...

That's better than its being utterly irrelevant, which is the goal

I suppose it matters what you define IBOC to really mean. In Band On Channel, just by looking at the words, may only mean "In Band" as between the highest and lowest frequencies of the band, 530-1710 kHz for the US AM broadcast band, and "On Channel" by being centered on a one of the common transmitting frequencies (a multiple of 10 kHz for AM broadcast in the US).

Ideally it would would also require less bandwidth than the channel spacing, but that is not the case for HD Radio in the US. However it is "On Channel" if you consider that an analog station could use the same bandwidth if it was broadcasting 15 kHz audio bandwidth.

So, depending upon the definition of "channel" On Channel may also imply fitting within the channel.

To relate this to DRM and shortwave, if a DRM signal is broadcast within the bounds of one of the shortwave broadcast bands, and its central frequency is the same as an analog broadcast would use then it may be appropriate to call it IBOC. If the DRM signal is using 10 kHz bandwidth, then it would be using the same approximate bandwidth as many(most?) analog shortwave stations.

In the US, IBOC may be used as if it were synonymous with HD Radio. (HD Radio being what Ibiquity is promoting.) I would consider HD Radio to be a specific form, or implementation, of IBOC. (Here, my definition of IBOC is only what I describe above.)

While I might consider DRM to be a form of IBOC, I consider DRM and HD Radio to be significantly different.

If anyone has a a reference to the 'official' definition of IBOC, I'd like to see it.

It would also be interesting to see what folks consider a "channel" to be. Specifically, how many kHz wide is a channel?

OK,

In other words, the UFP is to protect the other planets from the Klingons, Romulans, etc, and the UFP's sole apparent ally (in the older Star Trek shows) was Vulcan. Do we see some correlation to the U.S. and Israel, with all the other countries representing boogey men? Maybe it's time we begin to concern ourselves with removing the plank from our own eyes before we worry about the mote in our brother's eyes. Too many people continue to suffer and die (both American Soldiers and Iraqis citizens) for a pointless and apparently never ending conflict.

By the way, with a new 32 inch High Definition TV, allow me to tell you that the Spock has a deplorable complexion, something that makes one not appreciate the wonders of HDTV. I still read books, they are as low definition as you get. I believe that we are all being snookered for this digital garbage in under false pretenses. Other than the new market of replacing existing equipment, likely every 5 years or so as they change formats, I do not believe that our lives will be substantially improved. I look through Direct TV's Pay-per-View offerings last night including a couple staying at a motel that comes to realize that they are going to be used for a snuff film, and several serial killer flicks. Like we need HD for garbage like that.

Live long and prosper.

>At least in the States, AM & FM broadcasting is limited to 50 Hz to 15KHz.

There is no low frequency limit for either AM or FM; 50 Hz was the minimum performance standard that would meet the now long-deleted FCC Proof of Performance measurements.

The effective HF limit on FM is about 18.5 kHz; this leaves a +/- 500 Hz guard band for the stereo pilot tone. Again, 15 kHz was the minimum spec that would pass a Proof of Performance, not a limit on bandwidth.

Currently, the legal FCC-mandated HF limit on AM in the US is a hair less than 10 kHz, which almost completely protects second-adjacent stations from interference. This was changed around 1990 as a result of work done by the National Radio Systems Committee (NRSC). More recent work by the NRSC has indicated that 7 kHz is probably the optimum compromise between causing interference and loss of audio quality on typical AM radios (which are down 3 dB at about 2.6 kHz). However, limiting bandwidth to 7 kHz is voluntary.

Go to http://www.nrscstandards.org/ and click "AM Bandwidth Study." See Figure 1 for the results. Note that this graph assumes NRSC preemphasis at the signal generator. (Footnote 3)

This was the work of an NRSC working group that included me and many other broadcast engineers.

This study, which was done under auspices of the NRSC (of which I am only one
member) was done very carefully. See http://www.nrscstandards.org/ and click
"AM Bandwidth Study."

By the way, "Telemon," to whom am I actually speaking? If you are implying
that the above referenced study was corrupt, I would hope that you would at
least back up your accusation by letting us know your real name and what
evidence you have that the study was flawed.

No, it wasn't. The codec was changed to something iBiquity calls "HDC."
It is known to use the Coding Technologies' Spectral Band Replication
technology (as does MPEG HE-AAC) but its technical details are otherwise
held secret by iBiquity. This secrecy has caused considerable
controversy in the broadcast industry.

FM can continue forever because, unlike the digital television transition in the US, HD Radio required no new spectrum and there is no proposal to auction off any of the current FM band (88-108 MHz in the US). I know of no serious broadcaster who claims to have any real idea of when analog FM might be shut down.

If this ever occurs, it will probably be because other transmission channels finally provide a cheaper pipe to the listener and that pipe reaches enough listeners to make the loss of analog-only listeners inconsequential. FM in the US tends to use high powered transmitters with concurrent large electric bills. Digital transmission can get equivalent reach with much lower power -- power efficiency is probably close to 100x in favor of state of the art digital coding. Meanwhile, the cost of electricity is likely to continue to increase, at least in the medium term. (If the world ever gets practical

fusion reactors, that trend could of course change :-).

What is the lowdown on this receiver's performance? I've
read that the parts (display, etc.) are unobtanium, and that
TenTec doesn't support the product. But, how does a good
example perform? Are they well engineered, or something
similar to the low cost Drake entry level receivers of yore..

The pick up broadcast and short wave stations. They work better than the S-38. Ten Tec made them to meet a bid price. They were not proud of them.

I would not sell your R-390A to buy one. They are something you would expect from Radio Shack.

The only suggestion I have for you Mr. Orban is to work on your reading comprehension. The handle is Telamon.

Well I must admit that sure does sound like you to pick a small group of
people that will reinforce your own thinking. Since it serves your
purpose I don't expect you to see the incestuous nature of what you
promote.

Of course, your rabid statement does not explain why we have the top two
radio stations in Los Angeles, and have for nearly all of the last 10 years
or why we have a limited coverage class A FM that does so well it is in the

top 5 or 6 in 25-53 in LA among over 60 local stations.

Of course, a fool like you who even questions Bob Orban and then is nasty to him can be expected to be oblivious to reality.

45-50 year olds are the ones you sell new whizbang TV's, cars,
refrigerators, etc. to. Not toothpaste. And BTW.. me, I'm always trying
different brands of toothpaste, and even some of the new flavors of soda and
such.

IBOC in the US= In band (as in not needing to use a separate frequency band)
On Channel (as in using nominally the same channel as the simultaneous
analog transmission)

For the record, I don't buy into the definition, since it's obvious that the
digital subcarriers most definately protrude into the adjacent channel's
bandwidth(s).

I don't quite agree with the above.

I find that their selectivity is good, their stability is excellent
(with ovens for the internal oscillators) and the sensitivity is good.

They do fall down a bit in terms of image rejection and IMD products
on the higher frequencies.

Show me the Radio Shack product that had excellent synthesis,
selectable filters, memories and ovens for the crystal oscillators?

I currently have one and what I'd compare it with, in my experience,
is to an UPGRADED Yaesu FRG-7. I'd added tighter ceramic filters to
the FRG-7 but the Ten-Ten SP-325 was still better and of course had
digital readout that the FRG-7 didn't have.

The comment that the vacuum florescent display and driver chip are not
available is true. I recently picked up a recent driver chip as a
spare. However, its firmware must have changed and it lit the display
in a wrong sequence, thus I'm still stumped in terms of a substitute.

While the audio output was designed for line level 600 ohm operation,
simply bypassing the 8 ohm to 600 ohm internal transformer solves that
and gives one a watt or two of audio output for speaker operation.
The previous owner of my SP-325 had gone to the unnecessary trouble of
installing a T-Kit audio amp PCB to get speaker level output. I
removed that useless amp and did the above transformer bypass in my
unit.

Now, the fact that Radio-Mart is selling it is another topic...

BAD,

I guess the technical difference to me is that with the
iBiquity IBOC "HD" Radio Broadcast Scheme : You
only have to Tune the Center Frequency to receiver
either the Analog or Digital Modes.

Presently with the DRM Broadcast Scheme : You have
to Tune the Center Frequency of either the Analog "AM"
Signal or Digital Signal to receive that specific Mode.

* Presently DRM has not evolved into a Technology that
allows for IBOC operation like the iBiquity System does.
- It could but currently it don't.

After hearing several clips of the 'beeping' sound that Sputnik emitted it is clear to me that I heard AO-51 at about 0001 on 4 October on 435.3 MHz.

It came up through the noise for about 45 seconds and was gone.

BAD,

I know more than a few people over the Age of 55 who
Buy and Pay-For all the latest Gadgets and Technology.

They are called Grandparents. ~ RHF

Maybe -if- Advertisers crafted a Message for their Products and Services that would touch the Hearts-and-Minds of Grandparents with the "Needs and Wants" of their Grandchildren : Then they could have a vast Market to Sell-Into : Instead of Writting "Off" the Age 55+ Demographic.

The problem with this is that most grandparents see their grandchildren as over-indulged, spoiled brats - little princes and princesses who have their every whim indulged. They have no needs and wants.

No, the advertisers have it right - there is money to be made selling to credulous and gullible youth. We over 50s are in a position to stand back and consider. We won't be sold to.

With respect to Commercial Radio and TV Broadcasting the
FCC for the most part is consider to be a Tail and Dog Agency.
The Industry -Leads- The Agency and this is due to the Industry
being Centered on Local Advertising Business Model -and-
All Politics Are Local. Commercial Radio and TV Broadcasting

has now become the Life-Blood of Political Elections -and- We have 535 Elected Federal Officials who apply Political Pressure, plus Budget Funding and Laws that Dictate what the FCC Can Do and Will Not Do Do !

the so called 'fairness doctrine - ain't about fairness - it's about politics ~ RHF

"Is HD Radio Toast?"

"There are serious issues of coverage. Early adopters who bought HD radios report serious drop-outs, poor coverage, and interference. The engineers of Ibiquity may argue otherwise and defend the system, but the industry has a serious PR problem with the very people we need to get the word out on HD... In New York City, the #1 market in the country, there are 25 stations broadcasting 42 HD channels. You'll find CHR, AC, Classic Rock, Hip-Hop, News, Talk, and Sports. In other words, everything you can find on the regular FM dial... The word has already gotten out about HD Radio. People who have already bought an HD Radio are telling others of their experience (mostly bad) and no amount of marketing will reverse this."

The new station is up and running in Micronesia on 4755.25.

Heard here yesterday and today from 1115 or so until 1200 tune-out.

ID heard at 1200.

My 238th NASWA Country heard, though as far as I know it is not yet on the list itself, I believe it would be 'Federated States of Micronesia'.

Some people can, some can't. I tried for 29 years and finally found
out that I could not learn by listening.

I'm very out of practice now, but thanks to learning with Code Quick
and "upgrading" wih Jerry Zilliack's 35pwm words tape I was able to
copy 35WPM in my head.

Yep, Morse Code is an Alphabet.Check with a Boy Scouts club or an Amateur Radio club or CB radio club near you.See can you get a little plastic card (you will need a practice key too and something to hook it up to that makes the audible sounds) that has the Morse Code on there.Alternativley, I think) you can look up the Morse Code on the internet and practice with your computer keyboard.Sometimes, if you put a radio near your keyboard and turn up the sound and tune to an empty space between stations, you can hear the dits and dahs.I know it works with my WebTV.

It could be true...unlikely but possible.

I was given a Kenwood R2000, with the VHF adapter, by a retiring
coworker.

Her dad ordered it back in ?1983? and died of a massive coronary
before it arrived.
Her mom just put it in the basement and forgot about it. Her mom died
and she and
her sisters were cleaning up and found a box from Universal Radio. She
knows I
am "into", mild understatement if ever there was one, radios. I pulled
off the shipping
invoice and tried to explain that they could sell it on Ebay, but she
disagreed saying
that she wanted me to keep it because she knew I would take care of it
and use it.

The Lithium back cell was dead, so I jumpered in a "AAA" just to get
it running. I
expected some minor issues due to electrolytic capacitors "unforming"
after 24
years. but it fired right up and works great.

I was also given a new in the box HT-202 2M HT several years ago after another
coworkers dad died right after passing his Tech and buying the HT.

So such things do happen, but not often.

And no I am not putting up on Ebay.

You simply can't have too many R2000s!

I may have overstated the "ordinaryness" of the SP-325, although I did have a Radio Shack receiver that was about the same as the FRG-7 and SP-325.

There are plenty of other receivers I would rather have as a communications receiver, though, and it is not the equal of a Drake RX-340.

In fact, the RX-320D is a much better receiver and is available brand new for $359.

But, that is only my opinion. Maybe I am a bit prejudiced because Radio-Mart is selling it.

I have a homebuilt regen receiver that I love to use for short wave listening.

He is a regular, if not frequent, poster to ba.broadcast over the years, and
always has something interesting or positive to post about. The reason he
has showed up in the shortwave group is because of crossposting, not a
sudden interest in shortwave.

I agree but here are some helful hints that may make it easier
FOR MANY -- studying EVERY day for 15 to 30 minutes is successful. Leaving long periods between study sessions is usually counter-productive. Studying for long periods at a session - frazzles many a brain.

One long time code instructor advises; "Most people's problems with the code stem from trying to learn it too fast without sufficient drilling before they move on to each new letter. The average person needs about 30 hours of study and practice on the code to hit 5 wpm. Now this is an average. Some will take longer and some will take less." So a half hour in the morning, a half hour in the evening and in a month -- you should have it.

Another advises: Whatever method you use, try to *hear* the code directly as a letter. IOW, don't try to translate the sound into dot-dash and translate that into A, just hear the dot-dash and think A. Easier said than done, but when you master it your receiving speed will increase dramatically.

COMPUTER PROGRAMS AND COURSES - There are many available -- try them out -- choose the one that works the best for you. Remember that the one that works for your buddy or elmer may or may not be the best for you.

con't

I found a bunch of Maha 2300mAh AA's that are probably a couple years
old, unopened packages.

Only 6 of 8 would take any charge at all. Two were flat dead and
would not accept any charge, even from an old and determined
Crane quick-charger, that has a reputation of being willing to charge
anything (modern chargers refuse to charge batteries that are too
discharged, meaning that you ought to keep one old charger around
at least, to get the charging started on very empty batteries).

The 6 remaining are rejuvenating in a LaCrosse charger, at the moment only
up to 800mAh in capacity after several cycles.

On the other hand, the NiCd batteries in my power drill are good after
years.

Maybe that's an important difference in the chemistries.

Not only self-discharge rate, but death from neglect.

I agree with both your posts, for the most part. A friend of mine got
one very cheap at a garage sale of all places, and even for $200, it was
pretty poor. With my sloper, there was a lot of intermod, and it was
noisy, to put it mildly. It looked like it had just come out of the box,
and my friend sold it at a hamfest for $250 about a month later.

My $200 Yaesu FRG-7700 was light years better, even with the tobacco
orange stained cabinet and stink it had..

Enemies of Life and Love, a dead bushite is an enemy of GOD halted from victimizing further our loved brothers and sisters, mothers and fathers. Death to the neoconner bushite dumfuk grunting liars who bomb our families, death to the enemies of Christ who war for the escape of the true culprits responsible for 911. TRAITORS.

See my friends, this is why I, as the Son of Man beg and plead for all able bodied men, to kill treasonous bushite on sight, for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks to their bitter end.

To Kill a Bushite, is to be Heroic

American soldier: Your enemy is TRULY LIAR happy George Norry. The demon knows of Ahmad, and forbids any guest from uttering such understandings in defense of the DYING dumfuk grunt nazi - Good riddance? Do you care that your country men are dying for the criminal zionist neocon as traitors? Support my demand for US to be heard GOD DAMN YOU. ...or die by the hands of GOD.

All fighters, listen up. ANY bush bitch neocon biter who pretends as a cowardly child killing traitor, it can't ever hear my manly voice from here, YOU kill to defend ourselves over, in the cage or otherwise. Kill any or all thieving bushite ENEMIES of America responsible for 'escaping' the 911 perpetrators, why don't you help US out some my loves...?

Thanks

That's fighting words to a corporated "generation" of left iliterate non-speaking, hypocrite nazi savages, dying sacrificed, who auto figure by remote control, we can not be allotted the public defense for freedom's cause, Justice for all by International News Challenges. ! Justice for All is given through the power of the indivisible truths of our living existence, as concluding: evidence must be used to convince ourselves on who is good or evil. period. Bushites are as dumb as they are cowardly lifeless nazi trash, good for only to play the mute ungodly bad guys in evil wars for the demon antichrist enemy of all human lives - 911's George Walker Bush, The Traitor. See? A bushite faiths that America can be no greater with freedom ruling justly supreme, for as bushite, it would be back as being truly talentless, as a likely criminal enemy of your home town of loved families.

CHRIST RETURNS

I again, beg Humanity to speak in opposition to Amerika in the defense of our innocent forsaken dying lives. CBC producers know the bushmob did 911 but lie with propaganda to kill our families for the ungodly as thieving neocon enemies. They refuse to inform ourselves that Al-Qaida is General Mahmoud Ahmad, as according to the FBI. Or that video of iron flowing like water from the WTC towers exists indicating without doubt, the bushmob enemies did 911 as TRAITORS.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Who cares about yourself if you won't listen as reason to? What can you lose when you have granted to be blindly stolen from?

Zionist nazi Israelis, do tell as LIARS, that Israel, the
nation that openly thieves, tortures, and murders daily thoses
THEY ADMIT are commpletely innocent, are enemies of every

$4.50 for Every Pop Can?

I AM AMERICA

Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected traitor neocon. I AM AMERICA.

America MUST demand war crime trials for the propaganda CNN broadcast "Anvil of God" regarding the demonic actions of Bravo company. They forgot to tell America importantly, nazi forces forbade the population from leaving, gunning originally for everyone between 15 to 55, but sided instead to murder infants and the elderly too, when beginning the Zarqawi campaign by bombing hospitals as first strike targets. As such, the bushite murdered many good doctors and nurses - so all to send bushite snipers on hospital near rooftops gunning for every seriously injured woman and child who tried to get help from the Humans. While driving down residential streets, grenading every home of humans being. Remember that when you hear these dishonorable bushite thieves die rightly for god and country.

[Sideline: It's been thought the reason why rescue efforts in New Orleans were provably sabotaged by Rove, was an attempt to make the blue state red.]

See?.. women and children, who the enemy bushite forbade to leave the city with their innocent families, who, as were all living in the entire city of mosques conveniently found labeled therefore by bushite, "Insurgents" (or did leave earlier, and had our innocent families reportedly indiscriminately murdered two miles or so down the road by the most evil war crime act of recorded history.)

Importantly, there was no evidence made awared of, that legitimately offered PUBLICLY, from the UN or the U.S. to

indicate a refugee camp anywhere, but for maybe a small group photographed - then some belligerent bushite bogus pocus - all headed up by a blatant traitor to America named Sattler. Reminder: after the indiscriminate carnage, they couldn't find near anyone for weeks who would take money offered to any citizen freely who survived for their satanic benefactor. So insanely disturbing as ungodly evil doing, war criminal Sattler called a halt to giving out charitable considerations from Americans to the unseen surviving victims - all in an 'escape' attempt to make it look better for US, the paying audience. So, where did our stolen values go to then eh? (Sattler's pocket no doubt.)

http://www.esterrepublic.com/Archives/djamail9.html

/ / "With no medical supplies, people died from their wounds. Everyone in the street was a target for the Americans.

The US also deployed incendiary weapons, including white phosphorous. "Usually we keep the gloves on," Captain Erik Krivda said, but "for this operation, we took the gloves off". By the end of operations, the city lay in ruins. Falluja's compensation commissioner has reported that 36,000 of the city's 50,000 homes were destroyed, along with 60 schools and 65 mosques and shrines. \ \

So Remember: Bushite grunts told the world they wouldn't let anyone out of the city, because [enemy Sattler LIED] pro-bushite Zarqawi was there present, so the innocent families who believed they had nothing to fear from the liar disciples of the ungodly enemy of ALL HUMAN LIVES, remained in the tiny city to be indiscriminately 'protected' with more than nine two thousand pound bombs, or made dead instead by heinous pro-bush escaping war criminals who used white phosphorous on civilization. All to die our Humanity for the thieved loss of evidence to demand ourselves of some official freedom time to deal with our terrorized as suffering reality.

True Tyranny - to continue as an American refusing to publicly demand torture, theft, and murder as unexceptable when battlin' evil for your dying freedoms.. Evidence we must pursue on 911 to know really what the heavens Johnny 'The Law Man' is talking about still. Justice to the bushwhacker neocon soldier, a foreigner who apparently speaks no defense for innocent Americans dying sacrificed as conned for the ill stolen gains of the 911 trifecta. Justice to the lying enemies of freedom for America in Christ. Justice for YOU.

deliberately!! In fact, he wrote a card to a dead marine's
family, testifying that he murdered the innocent young girls
for the tyrannies of the antichrist. Evidence that TRAITOR

Paul Ware and Mattis hides from the Christian American Family. Will YOU, as an American man, allow these two bush bitch nazi punks to survive as furthering the commitment of more war crimes against the INNOCENT? as a zionist neocon's "Hero"? Will You defend our girls? Peoples of Earth! Help Me save our children.. please.. please..please

TRAITOR Paul Ware "Tatum shot and killed people in houses 1 and 2, but the reason he did so was because of his training and the circumstances he was placed in, not to exact revenge and commit murder."

TATUM STATED DIRECTLY IT WAS TO EXACT REVENGE AND COMMIT MURDER!! HE WROTE SO TO THE FAMILY OF THE MARINE WHO DIED! A FAMILY WHO WOULD MOST CERTAINLY SUPPORT TATUM'S EXECUTION AS DEMONIC TRAITOR TO FREEDOM IN AMERICA!! ASK THEM!!

See?, Tatum is a zionist, but not Jewish!!! While neocons suggest our reality impossible without corporate challenge for exploitation of our 'unrepresented' lives.

"Mad Dog Mattis,"

MATTIS!! The guy who murdered countless women and children at a wedding party, while after getting caught PROPAGANDIZING to forsaken America the innocent victims as al-Qaida!! CAUGHT! Mattis called innocent six year old girls "al-Qaida"! CAUGHT!

BUSHITE ENEMY OF AMERICAN FREEDOM Lt. Gen. James N. Mattis has been made into a "JUDGE"!! THE WOMEN HATING NAZI FUK! A JUDGE of Men by 'law' in bushville!!!

the [anyone's] CHILD KILLER Lt. Gen. James N. Mattis QUOTE: "It's fun to shoot some people" - defenseless innocent WOMEN HE SHOT!! INNOCENT CHILDREN HE SHOT!!!! YOUR CHILD!! FIGHT BACK FOR CHRIST! FIGHT BACK FOR our dying aMERICa!

Prosecutor Lt. Col. Paul Atterbury "Lance Corporal Tatum entered a home and participated in the killing of Iraqis who were not legitimate targets, then entered a second home and participated in the murder of [more innocent] women and children,"

/ / One of the Marines charged with murdering civilians in Haditha, Iraq, in 2005 knew that only women and children were huddled in a back bedroom in a house there, but he [TATUM] opened the door and shot them anyway, a squadmate testified Tuesday. \ \

TRAITOR Mattis "The Marines have landed, and we now [as ENRON] own a piece of Afghanistan." [thieving from all for 911's neocon, especially undefended American pensioners... hail satan - 666.]

What Freedom do bushite war the innocent for to rape, pillage, and murder as blind neocon followers of the 'lawless' demon antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to the dying American Marine, that the ungodly bushite wars to escape the 911 perpetrators hold some hidden benefit, as the TREASONOUS neocon thieves freely rob from both undefended American and Iraqi citizens, The neoconner, Mr. Bush closed criminal investigations on 911 immediately after the event occurring, while Billions are stolen through 'ear marks' and TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and terrorists like Aegis who dress up as al-Qaida to murder godly lovers of Justice. CNN, CBC, and FOXNEWS would rather kill the Marine, than teach them where to aim their weaponry of liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

Johnny America Speaks Out

"what's this freedom war against Life for again"?

Hannity is a perfect example of what a neocon is. It's a one way communications system. He tells us what we think, and he'll never takes our calls, they won't read our emails, and they'll continue to pretend WE don't exist. AND... when WE die, they'll be richer for it. AND you'll be dead, your innocent brother will be dead, your innocent child will be dead. No evidence against an accused is US being truly abused. George Walker Bush is Guilty for 911, while every irrational bushite is a traitor to the American Family.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to publicly speaking. There are criminals who don't like these ideas, but they ain't going to speak out against us. Example 'I don't want to be held accountable to the American public, cause I want to steal that 16 billion dollars for myself. That's my public opinion.' What are we going to do but defend ourselves of deathly lawless tyranny, eventually. Or, you won't by DECIDING not to decide. Support our rise as the top cop of Humanity, coming down for diplomatic talks to engage the flagrant wanton stupidity of the bushite grunters. All on hopes you'll consider also, these Kingly texts worth a couple hedge funder salaries, a sixty cent barrel of oil marked up to 74 dollars, or a thousandth of the money America would save in a year, if you adopted Canadian Health care systems overnight for yourself to immediately provide all People the respect for life we deserve. Or don't, and needlessly continue to pay

twice as much, while dying broke as self made losers without a
cause worth preserving. A free market open to waste for profit

UN's Admission: Lebanon Was Right All Along
http://www.globalresearch.ca/index.php?context=viewArticle&code=COO20070816&articleId=6568

/ / Last month its cartographers quietly admitted that Lebanon
is right in claiming sovereignty over a small fertile area
known as the Shebaa Farms, still occupied by Israel. Israel
argues that the territory is Syrian and will be returned in
future peace talks with Damascus, even though Syria backs
Lebanon's position. The UN's admission has been mostly
ignored by the international media. \ \

Nazi zionists gave US Jews a bad rap again I see. They're
despicable criminal savages the neocon.. who steal the rights
and privileges of US peopled folks, all to fall victimized
with their self confessed contempt for love and justice.
Condi's crew dropped seven million land mines to murder
ourselves for generations, and, shouldn't she and the neocons
responsible be put to death for such conducts?? If not then,
when? discuss.. They openly target innocent human beings
indiscriminately without apology, but excuses that don't hold
water. Not that corporate news professionals are even
pouring! It's most definitely the re-occurring true story of
a censored mankind with You as it's innocent victim. For,
what human would support victimizing others for the tyranny of
blind terror? Only bushite amerika would fall silent under

such self contempt for our constitutions.

/ / [..]Israeli "Defense" Force (IDF) has announced that it will discontinue its practice of "capturing" populated Palestinian villages during military training exercises. The IDF states it will "reexamine their policy" of conducting such raids on uninformed, panic-stricken Palestinian villages. \ \

Tell me, is this the godly people the neocon boast of for defense in? Or, just again examples of standing terrorism against life ourselves - committed by the censored as will giving, sacrificing American payer? Justice is Freedom.

Do you care to buy the bushite lies, when they commit openly the very same terrorist acts they say we should all be outraged against? Somalia is a case to point. They murder helpless people as bushite, then say they'll remain dying to thieve further as enemies to Humans being. It doesn't fool me, but perhaps it does you. A neocon soldier murders innocent Iraqis, while selling you they are all there risking their lives to bring freedom. So, they die. For lies. Die. Again, KNOWN Aegis goons openly commit crimes against Iraq done officially to get killed! the supposed to be Patriot Marine. P2OG. Soldiers under bushite command would rather die cowardly, than to honorably demand the bushmob's arrest for public trials as defeating ungodly fascist war criminals.

Why suffer otherwise this way under the tyrannies of naked neocon plunder to deny our lives for measured justice I ask YOU again, please believe: truth will set us free.

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

I can't understand why you can't help get this party up as starting by supporting our rise to highest acclaim with my authority free willed to anyone. Let's face it, we're great because Your great. However, for greed, corporate america aren't taking our concerns nightly. We want Justice, and WE will get it if we reflect together with impeccable credentials as standing with measured reason for proper assessment on rights making might. Who is who here, a freeing peoples I tell you, arriving to bring a true patriotism to Life for US. Are you with yourself as respected an equal under the law devised fairly for all concerned parties?.. well then... let's g o ! ! !

Pro-mass murderer war criminal Kristol once again, speaking
freely to Jon Stewart unchallenged internationally on Our TVs
as "Two Jews" stated..

"We don't believe in original sin."

Colbert half an hour later, "Are you calling Jesus a liar?"

Now, that's funny..

See? Jon Stewart isn't Jewish, for he's not black, and he
speaks no words in defense of the innocent robbed and murdered
in his "Jewish" name. A Zionist! He wants to sound our
public voice silent where a Hitler or Kristol marches innocent
others into gas chambers by calling ourselves terrorists
without a thread of evidence to thieve from as unworthy. Few
know, Hitler was a staunch Zionist too. The excuse would be,
but G-D is worse.. because, as the "Two [atheist] Jews", they
can commit no sin against Christ by trumpeting demon evil lies
as if, we have no stronger indivisible arguments present in

OUR defense ever for Just causes. AND, he's near the best our
American national TV media has to offer!

I believe, Jon Stewart suffers from
the ignorance of Celebrity more so, than a genuine hatred for
Humanity.. as that is the fault of most TVed Americans.
Nothing more greater than getting on the boob tube, to really
make your mark on this fleeting world as they sell their life
away for nothing but the privilege to be recognized at a gala
swarray.. fed on the victimized innocent of Humanity left
robbed as worthless their grand stage. His show is often
quite bright however, and leastly, reminds people, that CNN,
CBC, and FOXNEWS isn't the be all and end all of respect for
US caring viewers.

but looksee.. EVIL is real though -

THINK of how Truly evil a person would be to lie for CNN
on this issue.. a "Jew"? would do this?..
A "Jew"?

/ / The inflammatory words MEMRI blasted the US media with
were when the young caller "Sanable" was supposed to have said
"we will annihilate the Jews" were not even mentioned by the
caller or by anyone else in that clip. \ \

SEE! A ZIONIST SAID, "we will annihilate the Jews"

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=25994

/ / When hundreds of millions are calling for the
extermination of the Jews of Israel this is more than a lie;
it is a blood libel. \ \ This is like satanic neo-nazi EVIL no?

No? eh... No? eh?eh?eh? ... no? huh? heh. No?. huh..

See? Zionists are nazi betrayers to GOD ALMIGHTLY, for they
believe we do not have any power great being Loving for
others. You WILL see how GREAT we destroy the bushite, then
you'll know what joy love for god as innocence is. And then
You'll know for sure, how WE truly are as Just and Free.

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected governments all over the world. and he [Richard Perle] comes on your program to prattle about democracy. These people don't want democracy, they want slave governments. If it's a slave dictatorship - that's fine. If it's a slave elected government - that's also fine. The only thing that matters is that the government is a slave government. That is why they will never invade Egypt. They will never invade Saudi Arabia. They only invade countries, or threaten to invade countries, who stand against them and who refuse to be slaves to them. That is why they hated Iraq, that's why they hate Iran. That is why they hate Syria. Of all the faults of all the three regimes in these three countries - they were never slaves to the United States, and that's why they were attacked. [...^] In Iran, 17 million people voted for the president, Ahmadinejad, and 10 million voted for his opponent Rafsanjani. Those 27 million are determined to exercise their right to nuclear power. The response of Bush and Perle is to threaten them with invasion. These are the people who murdered Salvador Allende, the elected president of Chile. These are the people who have overthrown elected governments all over the world."

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is a hit piece that involves, you know, saying that we're all blaming the Jews, or the Zionists, or something ridiculous, where we go after an ethnic group, [Jason Bermas suggests "Jews" = "Zionists"?] 'we' can not be associated with ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are Jesus now. They have people saying it's space beams from Pluto. And folks, I've tracked these people, they all were formally in intelligence, or connected to the Bushes, the space beam thing came from a almost cabinet member level Bush member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of which he's not as of yet, invited me on as official guest, for fears he can find no arguments against US I presume. 911

financier Ahmad = al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling is as only a puppet, look away! look away!, leaving without challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of

global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

Ron Paul Loves Ron Paul!
http://youtube.com/watch?v=eAvt7BdvJiM

"If you happen to be working for a big company, or the government, you get health benefits dirt cheap.[?] But if your trying to make it on your own, and you don't have insurance, you might be charged two or three time more than the government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib, and was bankrupt from his near $250,000+ bill for, for private "free market" health care. Money demanded that doesn't go to the doctors, nurses, or "public" hospitals. So what is Ron Paul saying about Ron Paul? I'd wager, he doesn't know himself, and fears like FOXNEWS from open debate of those who try to teach US to walk through his own argument, (or follow the money (al-Qaida=Ahmad)) and find the fault of all proud blind Libertarians. Look, don't you want the best service possible for the dollars expended? Why give your BASIC health care treatment dollars to a do nothing shareholder, or hedge fund CEOer for procedures, who's success is not made better by needlessly increasing the costs for nothing but selfish sicko greed by bribe payers. Again, rarely are those that "earn" billions in public health care, care givers, but takers. Someone ask Dr. Ron Paul, or Ross Perot, why those with leverage, are able to negotiate better deals through intelligent design, leaving others as single payers, (poor unrepresented pension people,) to flip their expenses? Do we want to publicly sanction screwing over the poor with ignorance, to feed the pay no taxes either, talentless as lowly, highest ranking rich? I suppose if it means radiation treatments.. anti-psychotics or, the play time of genetically altered vaccine strains of true quackery, as has to be done trustingly religious on someone for our money. Money lost as investment on privilege in the market equation of lowering the human capital available to maximize the de-profiting of our shares for nothing but money grubbers. Again, Americans pay

TWICE as much as Canadians per-capita, where for those dollars Canadians get full coverage, while Americans are then expected to go out and buy insurance now. TWICE. (Did you know that DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your placated peace of mind is perturbed.,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of wonderous tragedy?, Jeeze..

P.S. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com = alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high treason in America if we were allowed to freely say as much on our radios and TV networks. Al-Qaida = General Mahmoud Ahmad

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw in some bonus cash, an a Freedom medal from all lovers of

Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US as proxied, innocent peoples purposefully enslaved by a made

ignorantly entranced TV audience that is repeatedly reminded, we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently, but just lie and tell US they do. BUSHITE, THE ENEMY

It is not just a Muslim who sees the bushite as an enemy to
Humanity. These lawless savages have been acting without
accountability to anyone, because they are largely enemies of
America, who cowardly run from responsibility in America to
defend their own brothers and sisters from the neocon, and die
instead as/with rapists, torturers, and THIEVES.

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to testify to Congress because Congress, in fact, doesn't have oversight abilities."

IT LOOKS like they are going to attempt making the move of BLATANTLY TREASONOUS war criminals acting to measurably now destroy yOur Freedoms in godless America. The Satanic neocon's 'faith', is in that YOU as an American, will watch the same corporate drivel that offers next to nothing to empower YOURSELF to speak Justly for a dying America. Instead of demanding 24 hour, wall to wall news coverage, of war criminals going down one by one by the will of Man to Justice, CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that you are only a impartial viewer, who doesn't really care about dying right in front of yourself for the zionist's riches, and great worldly power of tyranny through lawless nazi bushite censorship.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Jesus man, do I truly hate these zionist nazi thieving LIARS on our magic TV shows who con our kids to die as bad guys. How about You?

/ / If Bush and his PNAC buds are innocent, then Investigate 911! What have innocent people to fear from a fair, complete and real investigation? \ \

They are guilty, so, of course, the demon Bush enemy, OBSTRUCTED JUSTICE FOR AMERICA.

I hear the national radio program Coast to Coast is still feeding us neocon lies. Why don't you make the call for Johnny.. believe in yourself for a change why don't you?, buddies??... I am Your god king. King Johnny I am. Champion of Universal Life! Not enough? Who cares?, to allow US speak on our broad casts as legitimate? Worried I'm going to love Life as truly honorable, and Greater than those who openly lie to our soldiers to have them unjustly die for no better good or reason understood? Let us make life better than the neocon envision, and support our rise to popular acclaim by allowing US to speak openly for public challenge in defense of America.

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or

die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY,

Alex Jones looks quite foolish. But, he's still trying.

Death to the bushite, death to God's enemies who lie cheat and steal from Humanity to assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal agreement so that we never again face these baseless allegations," he said. Thirty Afghan detainees have claimed they were beaten, whipped, given electric shocks and denied food once they were transferred to Afghan security forces by the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope pushing cop killers, who murder innocent people they call 'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN MILLION landmines on our cities to kill our children for decades indiscriminately, while offering our Humanity to God no apologies. Proudly kill the bushite savages all to desperately survive ourselves creating a better world through fair, free market communications. To warring for Liberty as true Freedom wills, is for Justice understood as measured, not just made up out of nowhere for the pleasures of those truly Satanic. So spoke the King of being the wisdom we here revealed by statement of timeless fact. Good will triumph over evil. That's that.

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when saying "slam dunk" - that, selling the war to the American Joe, without establishing any real facts would be easier than anything against the powerless as media unrepresented!

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around them, they couldn't care less." Instead they kill unarmed innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide distribution and production of heroin, tells of murdering innocent farmers, that would never raise a gun in anger, are those they openly confess to target for first degree murder as labeled the, second tier Taliban. That's when not defending American Pension thiever ENRON'S pipeline managed under their extremist Muslim fundamentalist regime of intolerance for public communications, as the continuing thieving of 80 percent the Humanitarian Aid given by Canada to feed the STARVING, and school our children of the impoverished Afghanistan, as so reported. Eighty percent. 80. 80 percent stolen. I'm telling YOU: CBC couldn't care less about what Canadian soldiers are actually dying as COWARDS for: "Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime" CBC national radio management needs to be arrested in Canada for high TREASON. Please, be a Patriot, and demand these zionists allow open communication with the facts to save the lives of Canadians soldiers they hold in contempt to die as the bad guys committed to no better good.

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining

Liberty's cause, which is our cause truly. Is it because
corporate TV zionist money whores, are cowardly and ignorant,

refuse to speak Now in your Humanity's begging further

a person's guilt or innocence? for ungodly terrorist
activities committed in our name by bushite bombers from the
neo-conned AIR FORCE, who, as rotted juveniles, cheeringly
bomb us People indiscriminately leaving a Church as something
TRULY SATANIC? To dare, in our presence, continue threatening
harm against an innocent child of wonder, not yet even born to
God's suffering world? Bushites war LIFE itself. So then
pleads I again the Son to God, as Man to Men: war to kill the
enemy bushite nazi savage thieves, for real Freedom is waged
truly by Just causes. The mute, pro-censorship/tyranny
THIEVING bushite savaged nation, has NO EXCUSE for the crimes
they have committed in our dying names. I demand our voices
heard internationally for Justice as Freedom is Godly.

True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS, while George W. Bush personally stole 50 billion from America in the first four months of stealing the initial election.

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite enemy and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children pratically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE enemies of Humanity to save the lives of our precious loved

ones.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun, paid for by the silent American tax payer. Americans refuses to bother making a simple phone call to Coast to Coast to raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

"Al-Qaida" = "General Mahmoud Ahmad"

Defend freedom, and the FBI, by demanding Coast to Coast radio hosts allow free communications, absent their personal contempt for preserving freedom to be our America. George Norry WILL kill Your American child for the contempt he truly holds for our lives here. He says he only supports murdering Arab children for the neocon, but when your not looking in his 'shadows', he'll kill your child too, don't doubt it for a second.

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they serve freedom lovers dedicated to defending America from willful criminality. But, americans are too stupidly weak to demand Coast to Coast hosts allow open communications on America's highest of concerns. Bushite america would rather, in silence, thieve from God as our Humanity, than serve the protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending

with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering?

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate

american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis,

along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Support my cause, which is your cause.

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that Father's intent to bare on lancing Boudreaux, and any other who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for the neocon are all Heroes.

Please, my brothers, join me in hunting each and every bushite present in this video down for death. For a Love of God that will never end, until we have seen each and every responsible child killing bushite present brought to true Justice extreme.

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege. Coast to Coast radio hosts need to be publicly challenged for

debate they deny US knowing of together naturally speaking.
Great example of our Problem: CBC National Radio, in Canada.
When a caller phones during the very rare moments we're taking
public words, have a pre-broadcast rig-a-ma-role question
session, you'll have with not only the OFF-AIR screener, where
he'll probe you for controversy, but after the first process
of noting in book form your disclosed intel, will notify you
that; IF your independent thought is granted by the "Producer"
(- who reviews everyone - rules are rules -) Our national
station will phone you back this afternoon, so stay tooned, to
line you up with your baking gingerbread creds. They never
ever dido! The more Brilliant you are, (like the highly
charged as extremely charismatically charming, wild man ruler,
Johnny America - the media phenomenoner) the higher
probability they'll find POSSIBLE concern, on their do nothing
for your taxed attitudes..!. Why take chances someone might
show a greater living responsibility to a real suffering God
as our left corporately forsaken Country?.?.?. A dying
Humanity.

Look, seriously, my friends, we have all the answers to our problems.

Support Johnny Wizard's personal challenge against thieving
LIAR traitor Hannity, and his corporate nazi bush whores who
lore our stolen values by how much they can deny US privilege
of equal standing.

Get it done brother.

Help me gain access to speak freely for open challenge against
Hannity, and of America's Coast to Coast Radio network hosts,
who deliberately deny you to contend, we're really, one hell
of a great bunch of People persons with rights God damn them.

Let's do this.

Don't let these neocon zionist bastards doe this to US.

Any Commander that doesn't support the arrest of those
responsible for 911 and the subseqent neocon war crimes of
Iraq, is a traitor to God and Country.

How much much God take as taken, before you people get on over

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a
war. It is the prevention of crime, the enforcement of our

laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for

public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

I have For Sale aN SG-2000 ADSP2 (Digital Singal Processing) 150 watt
HF transceiver.

This Unit is for both Amateur radio and Marine radio use.

It transmitts and receives CONTINUOUSLY from 1.8 Mhz to 30 Mhz with no
gaps. USB, LSB, CW & AM.

The unit is electronically perfect, the front panel is perfect. There
are a few scratches on the top of the case.

It comes with the mic, DC power cord, all metal base and quick start
card. Updated manual is available for Free online.
I will ship internationally.

The price is $1,050 plus actual shipping charges.

You can email me at: w7gsa@yahoo.com (w7gsa at yahoo.com) or you can
phone me at 904-821-5055 9am to 9pm eastern time.

For more detailed information go to: - -
http://sgcworld.com/Publications/Manuals/ADSP2Head.pdf

Please email me for pictures.

I will also consider a trade for a 400 to 600 watt HF amp, like an
SG-500 or similar.

Are there versions of this manual and the 'main' manual for this rig which
contain _readable_ schematics in PDF format?

Hi Guy's, wasen't sure where to put this post but I did some googling and found some old posts here regarding the GE SR ll.

I need to find someone that has a SR junker, I need the whole telescopic assembly even if the rod is bent, no problem as mine is still straight. I really just need the part that the rod fits into, but the whole assembly would be great. I checked Radio Shack, no dice. To remove the antenna just the one screw in the back where it says antenna, needs to be removed, and the antenna assembly pulls right out, no wires to worry about.

please advise

I had a similiar problem with my Maha 2300mA batteries too. After
about 3 year their (4 of them) capacity went down to about 800mA or
so . Even a smart charger would not rejuvinate them. I cured this by
luck. I completety discharged them (in a flashlight) and rercharged
them twice. Crude conditioning you might say. It has worked so far as
they are now back to +2000mA capacity. Whew! These batts cost me $20
back then. I live on a tiny South Pacific Island where just about
ANYTHING is unobtainable so replacements would have to be mailed in
which takes about a month.
I'm guessing that they had some sort of memory effect as the radio
(7600GR) obviously cannot fully dischage them or they are just crappy
batteries. Your comment?

909. Sonido Radio vs. Sangean PR-D5 (re. am/fm reception)

Hi,

I'm considering buying a Sonido radio since it looks like a good fit for a particular application I have in mind, but am curious if people have had a chance to compare its reception to the Sangean PR-D5 model. If the PR-D5's reception is significantly better on am and/or fm, I might go for that model instead. However, I like the Sonido's single speaker, long battery life, and inclusion of TV band, so if it's reception is on a par with the PR-D5, then the Sonido would be my pick. Any suggestions, or experiences comparing these radios?

Thanks in advance,
Stephen

The 7600GR is hell on rechargeable batteries if left in, since the current draw when off is considerable. That means that the weakest battery goes empty and then gets reverse charged, pretty quickly (about a month of inactivity is enough to do it). Take them out and put recharged ones in pretty often, so that the weakest battery stays charged.

What brings NiMH that have self-discharged back to life isn't clear to me. I've had a few come back after many charge and discharge cycles in the La Crosse rejuvenator mode. I don't think it's a memory effect, since they're fully discharged. In fact that seems to be what provokes the problem.

- By that reasoning, HD Radio is not a hybrid format, because
- the digital information sits *next to* the AM signal.

SFTV -aka- "Hybrid Digital" Man,

As and "EE", your above Statement is NOT Correct nor Clear
and it does not represent the Technical Specification {Facts}
of both iBiquity's IBOC and DRM. Please endeavor to be more
Factual and Accurate in your future representaions here.

Now For The Third Time :

iBiquity's IBOC Broadcast System is a Dual Mode Broadcasting
Scheme; with both the Analog AM and Digital Signals 'being'
"Intrinsic" to the Radio Transmission Process.

The Key Word Being : "Intrinsic"
http://www.answers.com/intrinsic&r=67

The DRM Broadcast System was initally designed and implemented
as a Single (1) Mode All Digital Broadcasting Scheme.

Note - Simulcasting and Analog AM Signal along with the Digital is
a 'possibility' but is NOT currently done on the Shortwave Radio
Band.

FWIW - The DRM Digital Signal 'may' be Broadcast along side
of an Analog AM Signal {Co-Channeled} -but- Both Signals are
Broadcast Separately and are 'independent' of each other; they
are NOT "Intrinsic" to each other as part of a Unified Radio
Broadcast System.

Caution - That the DRM Digital Signal has to be 'reduced' when
it is Broadcast along side an Analog AM Signal to prevent any
Interference to the Analog AM Signal.

The-Bottom-Line : Presently in the Shortwave Bands DRM
is Broadcast 'solely' in the 100% Digital Mode; as it was
designed to do.

for the third time or more - keeping it simple and practical ~ RHF
.

- Okay. By that reasoning, because HD Radio sits "next to" the
- AM signal, then it is not IBOC either. It is a simulcast format.
-
- Do you agree with that statement?

no ! - and saying it again does not make it so . ~ rhf

What is excellent is his point that any person who makes

organization while keeping their own identity hidden is, at a minimum,
unethical, and more pointedly, slanderous, spineless, and full of hot

I've been around a long time. Here's a link to a brief biography on me.

I would say I'm much better known and braver than you and Bob put
together.

Here is another one that the eBay Seller claims :
"This is an unusually pristine nearly mint Drake R8B
communications receiver."
-and then states- There is a lot of BS offered in the
auctions for R8B receivers. One recent auction offered
an R8B that was supposedly "new" acquired by a 3rd
party and sold for $1700.00. {the former post}

You are not in the LA radio market, either. The numbers come right from
Arbitron; the 12+ top line numbers are on the Arbitron website. Or at
www.rr.com under "ratings. "

Arbitron may not consider that I am in the LA market but I am. I buy
stuff in LA from cars, computers, ect.

We have an AM station but I have no idea how they keep their
listeners. FM has taken over with the genres. I think last I heard
they were an 'oldies' station. Many years ago they were our first
station in the area. I remember they used to have a person sleep
inside the transmission station just off the highway in case of
technical problems.

The definition of pristine is
having its original purity; uncorrupted or unsullied

So this radio is perfect, but not really?

Hi guys!

Part of my boatanchor collection, too many radios now and too little space. All collector quality and working! Serious collector Dx-er and shortwave enthusiast, now I've decided to slim down to just my Hammarlunds, would love to get my hands on a collector-quality HQ-180!!!

So here goes what I've got before I put them up on Ebay!

National NC-183D with matching speaker.
National NC-173
National NC-88
Hallicrafters S-53A

All are working, some have SAMS and all have been checked out / tweaked by a life long Ham & electrical engineer...

email me for questions, pics, interest, and thanks for taking you time to look. If you love the warm glow of vacuum tubes, the whistle of tuning in shortwave at night you might give one of these guys a good home!

P.S. Location, Grand Canyon State

Why should we believe you when you say this? You've lied about
everything a person can lie about in this group, and then you act
surprised when no one believes you. Please note that, as I've said
before, you now have the credibility of a 13 year old's myspace page.
No one is going to believe you (except perhaps a 13 year old or two).

The fact is, it's pretty well impossible to know when someone is
posting under "their own name" on the internet. The only thing you can
really conclude is that someone is posting under a name which they
intend for you to believe is their own!

This is all a bunch of speculative brouhaha. Talk radio is fine on AM.
Music is acceptable on FM. HD FM sucks and interferes with analog FM.
Satellite radio is a quickly dying fad.Generation Y will listen to MP3z
and whatnot because of marketing, most if not all have no clue about
"sound quality". The iPod is more about those silly white earphones than
sound quality.

No, it is crass commercialism that explains this.

Why should Bob Orban be questioned? Are you his little slave boy or
something?

I'm very happy for them. Too bad this isn't relevant to anything here,
though.

And I suspect most of his posts in ba.broadcast are on topic. It's a
pity he won't keep his posts to RRS on topic.

The reason he

And why did you show up here? Was that also the result of
crossposting? If so, perhaps you should figure out how to correct it.
Surely Univision has a tech person somewhere who could help you.

Amazing, just amazing!

Your above statement speaks volumes about you. "Gee, you didn't include
the great Telamonkey, so something must be wrong with your numbers".

IMHO, in addition to being a hypocrite, you can now add narcissistic and
egotistical to your list of "credentials".

You state there must be something wrong with the study because YOU, one
person, does not listen. The world revolves around Telamonkey.
Telamonkey didn't listen, so let's throw out the entire study.

Yeah, right...

Gad, what a spectacular ego!

From QRZ.COM:

As of October 2, Citadel Broadcasting, the parent company of ABC Radio network, has instructed all 10 of its AM affiliates who had already converted to IBOC, to cease night time use of the digitial modulation scheme, citing many complaints from listeners. Some complaints came from listeners OF the IBOC-modulated stations, while others came from listeners of adjacent channel stations, that were being interferred with due to the IBOC bandwidth. Citadel Director of Engineering Marty Stabbert, in a memo to his staff said, ""In response to the lackluster performance, the limited benefit and various reports of significant interference, Citadel is suspending nighttime AM HD operations at this time. Please reinstate your previous procedures for daytime-only HD operation as soon as possible." Stabbert says he will attempt to work with Ibiquity, the company that developed the wide-band digital AM modulation scheme to see if there is a way to overcome the many problems encountered. Daytime IBOC for the ABC network affiliates is not affected at this time.

ABC & Citadel are much more intelligent broadcasters than are the folks at

The operating manuals for these as well as various other models can be found at:
http://www.radiolabs.com/downloads/Grundig-user-manuals.html
The following is for the YB 400 ONLY.
I can supply the complete scan of the Schematic, "good copy". Also have the mute mod, audio mod and a few other possible mods. They've been collected from sources other than my own, so use them at your own risk.
The sound mod works quite well.

You have no idea who you are talking about. Google "Optimod" and see what
you get. Google "Bob Orban" and look again.

There is no ABC radio; Citadel bought the ABC stations and operates the
network with rights to the name.

I saw the 72" whip and swivel connector on the end, I need the rest of
the antenna, the female part that goes down into the radio. just
replacing the whip will not help. Well I'll see what they have to say,
I did not see a phone number at the site, in my email I aske for the
number there.

Thanks Gary

He probably doesn't. Heck, he can't even provide any evidence of his non-existent amateur license.

The one thing we know for sure: David Frackelton Gleason is a pathological liar.

Sorry Tardo but we don't want to be part of your little Univision

There is no Citadel radio. That's just what they want you to believe
they're named.

When these cracks begin appearing in the iNiquity facade, I worry
about the psychological impact on Tardo. He's just insecure and
fragile enough that this could push him over the edge. Someone's apt
to find him coiled up in a dark closet at Univision, slobbering all
over himself and masturbating to a photograph of Bob Orban.

I'm sure he can recite a number of Arbitron statistics to prove that
assertion.

See the problem with Eduardo is that all arguments begin and end with
Arbitron since he supposedly has access to that data and we don't so he
can't loose.

Well I just re-ran the Usenet reader stats and Eduardo came out on the
bottom of believability contour of all posters. The number of people
that believe him is below 10% in the 25 to 54 age group or in other
words his bombast signal level is not high enough for most to put up
with. People will just tune out in favor of a more rational poster on
Usenet.

Well, el-moron I'm not alone. I actually live here, have neighbors,
friends, family. I know many that live in Ventura county and work in LA.
There are many people at work here in Ventura county that live in LA.
There are these things called freeways clogged everyday in both
directions with people going from where I live to LA and back.

Eduardo does not even realize the number of people that drive route 1
and 101 from Ventura county to LA. That's just one way I know he is a
complete fake... like you for instance.

It's not good or bad news. It is one company which wants to further study
and maybe request modifications of night HD. What the bad news is has to do
with the declining and ageing listenership of AM... HD was a hope that had a
slim chance of reversing this.

Nearly 100% of the viable radio stations in rated markets has access to the
data. However, Arbitron only releases the data on 12+ listeners in one
daypart,, which is 6 AM to midnight. The rest of the data is copyright and
protected for only sales and programming purposes.

You just don't like what you hear, so you make up your own definition of
listening, of markets (today's post was a good example) and of the way radio
is used. You have no data other than what your megaradio can pick up, and
you are projecting your own misconceptions on all radio listeners and this
newsgroup. You have a classic "shoot the messenger" mentality about anything
you don't agree with.

Yea, let's see iNiquity change the laws of phicics! the analog carries
have already been reduced to 5kHz, so LOL! Let the AM-HDs choke on

That was your hope. Stop projecting your absurd ideas and feelings on
other people.

You know Goddamn well this is bad news, because others surely will
follow - there is NOTHING iNiquity can do to change the laws of
physics - if ther ewas, something would have been done before Sept.

No, news/talk/sports on AM is alive and well - it is the music FMs
that are screwed:

"News/Talk/Sports:Radio's Last Bastion"

"Music FMs of any flavor are utterly screwed... Right now -- while FMs
are losing the music audience to new media -- satellite radio is
offering more News/Talk/Sports programming than we can fit on AM
radio..."

http://ftp.media.radcity.net/ZMST/daily/IS031005.htm

"News/Talk/Sports Tops Radio Formats, Interep Analysis Reveals"

"The latest share numbers place the News/Talk/Sports format at the
top, pulling in an average of 17 percent of listenership among persons
age 12-plus, based on Arbitron figures for total radio listening in 92
continuously measured metros. That share number is even higher than
levels seen last spring, when the war in Iraq began. According to
Interep, more stations than ever are programming News/Talk."

The end is near, Edurado - word has gotten out about the HD Radio
farce:

"Is HD Radio Toast?"

"There are serious issues of coverage. Early adopters who bought HD
radios report serious drop-outs, poor coverage, and interference. The
engineers of Ibiquity may argue otherwise and defend the system, but
the industry has a serious PR problem with the very people we need to
get the word out on HD... In New York City, the #1 market in the
country, there are 25 stations broadcasting 42 HD channels. You'll
find CHR, AC, Classic Rock, Hip-Hop, News, Talk, and Sports. In other
words, everything you can find on the regular FM dial... The word has
already gotten out about HD Radio. People who have already bought an
HD Radio are telling others of their experience (mostly bad) and no
amount of marketing will reverse this."

Maybe the owner used the Gleem toothpaste method to take scratches off the display, and it has that faint spearmint/peppermint smell that a radio seems to retain forever afterwards. I have a Radio Shack Pro-2004 that I bought in 1987 and it still smells from when I used Gleem to take a scratch out of the display lens a few years later.

It works better than anything I have ever tried, including that eyeglass scratch fixing crap sold on TV. It's worthless.

I taught myself when I was 12. Found code characters in dictionary.
Took a few weeks. Got a code oscillator. Sent to myself. Takes a
little regular discipline and practice. It's not the impossible task
that today's ham radio wannabees make it out to be.

Eduardo will be along soon with some Arbitron marketing stats that will
PROVE it can be done. When you fake data, misconstrue, and post
non-responses to questions anything is possible.

No, you do not. You never have.

Taking one example, that of "I can hear it so people must listen to it" you can see that you take one bit of personal, anecdotal data, your ability to pick up a station, and apply it to the general population. The facts betray you here, since hearing level is not listening level, and people around you do not listen to the stations you can hear.

I am telling you the radio broadcast industry opinion, the opinion of the
major broadcasters who invested in iBiquity, the NAB, the FCC and many
others. All of us are concerned with the approaching obsolescence of AM...
even investors, as each AM decline will force potential write-downs of the
asset values of the goodwill of each AM.

Then the bad news is for AM... its obsolescence is now assured. I'll bet, if the night issue is either real or is not reparable, that a decent LA AM, for example, has probably lost $8 to $10 million in stick value because of the fact that there may be no future at all for them.

So, music formats have 83% of the audience? That sounds like very few listen to news and talk.

In the ages that advertisers want, news and talk have about 10% of the audience, and if you remove the FM news talk and sports stations, it is down to about 8.5% of the audience. That is miserable... and shows the only format viable on AM is slowly declining and rapidly moving from AM to FM.

No, nothing is forgotten. Without a technology advance, AM is on its way
out. When AM listening is now below 10% in many smaller markets, and does
not exceed 20% anywhere (SF, where the market definition is based on the
coverage of three AMs), the issue is that any inability to get HD going,
technically, via marketing, etc., has doomed the AM band in the US:

If its obsolescence is assured, it's people like you who assured it.
You wasted valuable time giving AM a digital facelift when what it

needed was programming angioplasty.

I still maintain that all AM plants should be sold to local owners that actually WANT to do with the stations what is SUPPOSED to be done with them. Serve the public interest! I would personally love to be able to operate a station this way, with possibly a minimal profit, but in the public interest, as a public service. And not narrowcast to only certain demographics. Small town radio was done this way for many decades, and obviously was able to make a profit and stay on the air.

The problem with radio in the US these days is it is done the same way the Koreans do small businesses:

If one new business (say, a store selling cell phones) does well, then 10 or more duplicates show up (this happens often even in this small town). Of course, the town can't support that many cell phone stores, so most of them end up going out of business. US radio is doing precisely the same thing: a format does OK, so you have several stations in a market that pick up the same format. This makes none (or perhaps only one) really profitable.

Your whole industry will be obsolete in 15 years:

"AM, FM Radio Predicted to End in 15 Years"

"The next 15 years will be the demise of terrestrial radio as we know it and the rise of the extraterrestrial," he said. Just as Vaudeville gave way to movies and horses to the automobile, he said, radio will be overtaken by gadgets that serve people's needs more efficiently."

A lot of them at URL:
http://ac6v.com/morseprograms.htm

Many are free.

Here is some study advice

COMPUTER PROGRAMS AND COURSES - There are many available -- see Morse Programs and try them out -- choose the one that works the best for you. Remember that the one that works for your buddy or elmer may or may not be the best for you.

FOR MANY -- studying EVERY day for 15 to 30 minutes is successful. Leaving long periods between study sessions is usually counter-productive. Studying for long periods at a session - frazzles many a brain.

One long time code instructor advises; "Most people's problems with the code stem from trying to learn it too fast without sufficient drilling before they move on to each new letter. The average person needs about 30 hours of study and practice on the code to hit 5 wpm. Now this is an average. Some will take longer and some will take less." So a half hour in the morning, a half hour in the evening and in a month -- you should have it.

Another advises: Whatever method you use, try to *hear* the code directly as a letter. IOW, don't try to translate the sound into dot-dash and translate that into A, just hear the dot-dash and think A. Easier said than done, but when you master it your receiving speed will increase dramatically.

IN SUMMARY - THERE IS NO ONE SURE FIRE WAY -- THE LEARNER IS ENCOURAGED TO TRY THE METHODS AND PROGRAMS THAT GIVE THE BEST RESULTS.

What part of the thread do you think belongs to you before you butted in? My comments strictly pertained to Eduardo until you decided to be part of the thread. My comments on statistics pertain to the marketing drivel he continually posts.

Nope, it's bad news for you. The AM stations affected by this last bad
night time experiment probably cost many money though.

I would like to buy a good quality solid state 300 to 600 watt HF amp,
like an SG-500 or similar.

The amp should be in good to excellent condition both physically and
electronically, with full output power.

The amp can operate off of 110vac or 13.8 vdc.

I can pay you with a cashier's check, post office money order or
PayPal...which ever you prefer.

If you have one available, please email me at w7gsa@yahoo.com

Thanks,

Bill

"Music will (eventually) be free"

"Having your music heard (or "discovery" - whatever you want to call it) is still at the essence of any revenue model for the artists. Terrestrial radio, when they lose their "performance tax" case (and they will), will no longer rest on the laurels of being contributors to the antiquated Product Model... That's right, radio is going to drop music from its airwaves eventually... and probably in the not-so-distant future. They're already talking about it, and once SoundExchange wins, that consensus will spread like wildfire. What will be left for music discovery will be Internet Radio, Mobile Audio (which includes cellphones and digital audio players) and Satellite Radio. All of which do a phenomenal job at helping their listeners discover music."

There is no mass appeal programming other than talk that works on AM
because the quality sucks so badly for the ear of the last two generations
of Americans who came of age when FM was the dominant band. Any "solution"
that does not fix the audio problem is going to fail... and the US will go
the way of Canada, Austria, South Africa and many other nations where AM is
being reduced, phased out or eliminated. Even nations like Ecuador and Chile
and Panama have severely reduced the number of AMs over the last decade or
so, because they are irrelevant to anyone under 45 or 50.

I started using the "pair" of given names more frequently for the web, maybe around the time I first got CIS, which would be 1985 or 1986. The name was given me when I was baptized, though. It's on my original baptismal certificate. On my C�dula de Identidad in Ecuador, it was David Eduardo Frackelton Gleason Frackelton, as my "American" middle name is also my Maternal surname. You apparently, for all the DX you do, have never figured out that there are different naming conventions in different countries and cultures.

There is no record of lots of things in less developed countries. So what?

When I was offered a general manager's job in Mexico City in the 70's, I pointed out that I was not a born Mexican citizen, as the law required. The owner said that this was not even a minor issue, and explained that many equivalents of the county courthouse had burnt down, been destroyed, etc., since my date of birth, and he would find one; sworn statements by residents of the locality would be accepted as proof of birth and, thus, citizenship. Voila! Instant citizen.

Of course, you think that Ecuador had a test for ham licenses in the 60's. Hahahahahahahahahahahahahahahahahahahahahahahahah. That's funny.

In the LA area, stations like 830 and 930 are decent facilities, owned locally. The first, bought for in excess of $40 million, is a money faucet emptying into the ocean. 930 makes a little money, but not much.

Most AMs sold lately in the LA area, like 900, 1190, 1230, 1280, 1390, 1430, 1580, are brokered or brokered ethnic. Since none of these has a decent signal, an issue you ignore, they can do nothing else.

Unless a station, whoever owns is, can cover its market, there will not be enough listeners to sustain a quality operation. Eventually, you have to accept that, local or owned by a Martian, a station has to get revenue to do any format. A local AM format, which means talk, is horribly expensive and can not be sustained long by inexperienced local operators... every bigger broadcaster today started out as a local broadcaster. Only the good ones survived and grew (our roots are with KGBT in Harlingen, TX, a 60-year Spanish language broadcaster that always servid its communities) while the majority, resold and someoene else gave it a stab.

There are 4000 different licensees for the stations in the US. No company owns even 5% of all stations... nearly all are locally owned, and most of the groups are some guy or woman who owns a couple of stations in a couple of adjacent communities.

You can not serve any intrest if there is no income.

And in big towns, there are so many staitons serving specific interests that generalist staitons, tried over and over again by well meaning fools (who are soon separated from all their money) get no listenership or so litttle they do not produce any results for advertisers. It does not even work that way in little places, like Prescott or Traverse City or Lake City or Manat&#65533;, PR, any more.

That was the case in the 50's into the 70's. Post consolidation, there are more formats in every market than there ever were. An example I use often is Cleveland, OH. 1960: 3 Top 40's, 3 MOR's and two R&B stations. No FM listening at all. Today, there are 5 kinds of rock format alone, from classic rock to alternative. There are several African American formats, a hot AC and a soft AC, an oldies station, a country station, a sports station, several talkers, a gospel station, a smooth jazz station, and several more.

Generally, nobody goes after the same format any more... direct format battles are no-win and costly, and you simply divide the existing audience in two pieces. Stations look for niches, the holes between stations, and fill them... giving a new alternative in the process. Since there are more formats than stations in every market, only the most appealing get picked up. HD offers the second tier of formats a home, and they can be successful there.

It's all about what you think, not about what the other hundreds of
thousands of people in your radio market do. You have done no research on
the rest of them, and they out number you. In otherwords, your research
method was looking in a mirror at yourself. BS.

All I know about you is that you are in Venchurra County, and have no facts
about how radio is used. IP addresses can easily be faked or masked. So you
have about zero identity.

The opinion of the need to make both AM and FM digital within the current allocations is something stated by all the entities I mentioned. The general feeling is that a separate AM solution would fail and AM would fail with it, as no manufacturers would back a separate solution, while HD offered a piggy back ride to AM into digital.

That's the FCC view in its rulings, the NAB position paper and the reason a half-dozen major broadcasters invested in iBiquity to give it some seed capital.

I got a thought, here.

During a recent discussion, you and Gleason got into things about
IBOC chip technology, and in requesting for support of a claim about a
manufacturer and low power chip production, you asked for a link to
verify his claim.

To my knowledge there hasn't been such a link presented. And in his own defense, Gleason said that such a link couldn't be posted as it would contain access to proprietary information. Seems reasonable.

But two questions have been bothering me since that exchange. 1) if the information was proprietary and he was restricted from disseminating it, why would he even discuss it on a world wide forum like USENet?

And 2) if the information is so proprietary, with industrial espionage such a highly refined artform, why would any company put such a thing on the Web in the first place? Or even send it out of house without some intense confidentiality agreement? In which case, he'd be forbidden to speak of the subject at all.

When Mercury Marine was preparing for the introduction of Verado, I had to sign a confidentiality agreement before I was ever permitted to sit behind a microphone. Before I was ever permitted to see even a script in development. I had to read it in the presence of the agency rep, sign it in the presence of witnesses, and I had to verbally agree that nothing I was about to see, hear, read, or encounter would leave the studio. Hell, I wasn't even allowed to receive a copy of the spots and presentation for my own demo. And despite the fact that Verado has been on the market, now, for some years, and I've been the voice of Mercury for more than half a decade, I'm still not permitted to include the spots on my demo.

I wasn't permitted even to tell my closest friends anything more than to go to the Miami Boat Show. I couldn't even tell them to see the Mercury display.

Why? Because no one wanted to see Yamaha, OMC, or even Honda upstage the release of the all-new Verado with similar technology of their own.

This is true of a number of projects I've worked on, and a number of sponsors I've worked with.

If, in fact, Gleason has access to sensitive, proprietary information, why would they not sign him to a confidentiality agreement? If they did, why is he talking about it in a world wide public space? And if he's talking about it in a world wide public space, why is he not able to post your link?

Definitely not the kind of behaviour one would expect of someone of some authority in a large multinational media conglomerate, where confidentiality is an essential tool of success.

There are press releases on the chips so far announced. Confirming that
everything to now is on track, per iBiquity, is not a violation of any code
or covenant. In fact, there are no non-disclosure agreements... simply, the
data provided by iBiquity on such things is intended for internal guidance.
On the other hand, press releases are issued for things like the Ford
deal... the capacity of the press to use releases like ones about chips is
limited in any case

Investor information is simply not all put in press releases, not
necessarily being protected by non-disclosures. By proprietary, I use the
same meaning of the term as used in the context of Arbitron data which is
also proprietary... usable freely in some contexts, but highly protected in
others.

Again, follow the Arbitron example. We are free to use the data for sales
but can not release specific details to the press or public, although we

actually may make much more public use than is first apparent.

I don't work for a multinational media conglomerate. You got that all wrong.

Confirming that a couple of chips are, as said in the press release, going to be cheaper and smaller and more energy efficient is hardly revealing a secret. In fact, it is something that should be divulged..

In the more northern latitudes, like Chicago or Boston or New York, where sunrishe happens half way into drive time b oth morning and afternoon, it means literally all AM listeners are affected.

They must be very proud to be real. That's quite an accomplishment.
Very few people have real names, addresses, email addresses, etc. They

They invested in iNiquity in order to make money...in order to make a
lot of money at the expense of the listening public, the idea being
that after AM fails they'll have made their money and all will be
well.

The operative word here is "advance". What you're proposing is a
technological retreat that would condemn AM to a rapid, painful death.

Talk is a broad category. There is good talk and there is bad talk. I
suggest you try to master the distinction.

You'll say anything to promote the agenda of your corporate masters.

In the World's Rural Outposts, A Shortwave Channel to God
By Kevin Sullivan
Washington Post Foreign Service
Sunday, October 7, 2007

As dusk fell deep in a forest of mango and palm trees, Jaime Jeremias Matsimbe sat on the rose-colored dirt and hand-cranked a shortwave radio, looking for the word of God.

He wound the little plastic handle round and round, charging the radio like winding a watch, and soon a preacher's voice boomed across a courtyard filled with goats and turkeys. Twenty miles from the nearest paved road, Matsimbe smiled as he listened to a Texas preacher's sermons about Jesus and Saint Paul, translated into a local language spoken only in the southern African backcountry.

Hmmmmm.... AM is dying so let's kill it off with IBOC, then the highly-

Hand Held, Preferrably

- don't want to spend over ~150 $$

- don't want to get tangled up in hard to follow instructions
translated directly
from C++ or Japanese

want to be able to hear Marine / Coast Guard / Police traffic in
NYC

& anything else of interest..

Thoughts on all this ?

AM talk listeners are about 60% over 55, where there is no agency advertiser interest at all. When such stations move to FM, they immediately pick up younger 35-54 listeners. Total AM listening under age 55 is only around 12% of all listening, and under age 35 it is around 6 to 7%. Every year, the under-55 for AM is less.

Some stations, like WNLS, WTOP and KTAR have moved entirely to FM. Some, like WXNT and KSL and stations in Jacksonville, Dayton, etc., are simulcasting. Others, like new talkers in Charleston, Pittsburgh and New Orleans, are FM start ups with the same Rush and Laura base as existing AM talkers.

Stations like WGN, which appears to be #2 in Chicago, are not even in the top 20 in 25-54 and are dying, slowly, but dying.

The day that happens is the day I stop buying new CDs (just the older stuff). That's because I depend upon my FM station to "introduce" me to knew artists and new music.

When music radio no longer exists, I will no longer be aware of "what's going on" in the new music arena.

My Ipod doesn't even have an AM tuner, so I can't listen to Rush
except in my car.

BTW:

How many "under 35" listeners does Showrtwave have? I imagine it must
be near-zero. How do shortwave stations survive?

- Did you expect anything better, with this crackpipe technology?

Pocket Radio -tyvm- for the Crack-Pipe Answer.

Heard my 1st AM/MW "HD" Radio Broadcast - Today 6 OCT 2007
http://groups.google.com/group/hd-radio/msg/a4206109df86f5a0
http://groups.google.com/group/hd-radio/msg/ddae20cc0e4e0fb7

Actually the distance was about 55~60 Miles and it was
the 1st AM/MW "HD" Radio that I have been able to Hear
up here in Twain Harte, CA.

Again the Stereo {Bumper} Music sounded OK -but- the
Talk Radio Hosts and the Fox News Readers voices all

sounded thin and tinny with an echo. I assume that this
was due to the KFIV 1360 kHz Radio Station's Audio
Processing or may be the Fringe Area reception
characteristics of IBOC -idk-

In general the few FM "HD" Radio Station's Music Sound
and Voice Quality that I have heard has been 'as good'
or 'better' than the Analog FM Radio in Stereo up here in
the Foothills; that I can get from the California Central
Valley Cities around 60~90 Miles away.

Currently using a Vertical Rectangle Loop Antenna that is
about 6-Feet High by 24-Feet Long (60-Feet Around) with
a Coax Cable feed-in-line. Pointed at Modesto, CA.
Plus a Radi-Osophy HD-100 Radio.

I never was baptized.I was only borned in my grandpappy's big old house on Main Street in Carthage,Mississippi on December 5,1941 and I have my birth certificate to prove it too.Catty corner across the street from the old now defunct Mann Ford dealership.When I was a kid about three or four years old , I stuck a cat's head in a quart glass bottle.I still remember one of those guys from the car dealership coming over to our front yard with a hammer and breaking that glass jar so the cat could get out.Every year the Ford car dealership gave me a little metal model car.

Mr. Eduardo has all kinds of interesting anomalies in his posting style that make me wonder just what it is I'm dealing with. He has made quite a few mistakes that people Trolling Usenet usually make. He fits that profile of one pretty well.

Eduardo claims technical expertise but does not understand the difference between symbols that are multipliers and an electrical unit that define the measurement of field strength at the epicenter of most of his arguments. He seems to have no interest in the terminology other than to use them as terms to beat people about head with. Once you challenge him on an assertion he made he always retreats to information that is only accessible to him.

He is wrong on semiconductor technology, wrong about the business of semiconductors, wrong about the traffic and topology of southern California that he supposedly lives in, wrong about radio reception, and he has been wrong about the rollout of HD radios even though he has this insider information we don't share in.

The arguments on radio station reception have been the most amusing for me as he continued to retreat to less and less tenuous position. The ignorance he has expressed seems to know no bounds.

It shouldn't be too diifficult to determine - just use a little
reverse engineering. If it's using SBR, well that's all that really
matters. SBR extends the high-frequency components from ~8 to 16
kilohertz, so that even an MP3 + SBR sounds good.
